Ownership of Knowledge Dagmar Schafer,Annapurna Mamidipudi,Marius Buning,2023-07-18 A framework for knowledge ownership that challenges the mechanisms of inequality in modern society Scholars of science technology medicine and law have all tended to emphasize knowledge as the sum of human understanding and its ownership as possession by law Breaking with traditional discourse on knowledge property as something that concerns mainly words and intellectual history or science and law Dagmar Sch fer Annapurna Mamidipudi and Marius Buning propose technology as a central heuristic for studying the many implications of knowledge ownership Toward this end they focus on the notions of knowledge and ownership in courtrooms workshops policy and research practices while also shedding light on scholarship itself as a powerful tool for making explicit the politics inherent in knowledge practices and social order The book presents case studies showing how diverse knowledge economies are created and how inequalities arise from them Unlike scholars who have fragmented this discourse across the disciplines of anthropology sociology and history the editors highlight recent developments in the emerging field of the global history of knowledge as science as economy and as culture The case studies reveal how notions of knowing and owning emerge because they reciprocally produce and determine each other's limits and possibilities that is how we know inevitably affects how we can own what we know and how we own always impacts how and what we are able to know Contributors Dagmar Sch fer Annapurna Mamidipudi Cynthia Brokaw Marius Buning Viren Murthy Marjolijn Bol Amy E Slaton James Leach Myles W Jackson Lissant Bolton Vivek S Oak J rn Oeder

Copyright Law Benedict Atkinson,2017-07-05 This volume shows how since 1950 the growth of copyright regulation has followed and enabled the extraordinary economic growth of the entertainment broadcasting software and communications industries It reproduces articles written by an extensive list of leading thinkers US scholars represented in readings include James Boyle Lawrence Lessig Pamela Samuelson Mark Lemley

Alfred Yen Julie Cohen Peter Jaszi and Eben Moglen Leading non US contributors include Alan Story Brian Fitzgerald and Peter Drahos These and other authors explain copyright origins the development of the law the theory of enclosure international trends recent developments and current and future directions Today the copyright system is often portrayed as an engine of growth and effective regulation as a predictor of economic development However critics see dangers in the expansion of intellectual property rights The articles in this volume focus principally on the digital age examining how copyright regulation is likely to affect goals of dissemination and access *Searching the Law, 3d Edition* Frank Bae,Edward Bander,Francis Doyle,Joel Fishman,Paul Richert,2021-12-13 Selected Statutes and International Agreements on Patent, Copyright, Trademark, and Unfair Competition Paul Goldstein,R. Anthony Reese,2012 This compact volume contains all of the key patent copyright trademark and unfair competition statutes and related international agreements in a form convenient for student use This edition incorporates all of the changes made by the Leahy Smith America Invents Act adopted in September 2011 which substantially rewrote the U S Patent Act The amended statute appears as the main text but the volume also continues to include the existing provisions that are being gradually phased out by the new act In addition to the full text of the federal Patent Copyright and Trademark statutes it includes the principal intellectual property treaties and agreements as well as the Restatement Third of Unfair Competition and the Uniform Trade Secrets Act

Annual Survey of International & Comparative Law ,1999 *Constitutional Rights and Liberties* William B. Lockhart,1991 **Selected Intellectual Property and Unfair Competition** Roger E. Schechter,2000 *California Cases on Security Transactions in Land* Richard Callender Maxwell,1992 Accounting Issues for Lawyers Ted J. Fiflis,1991 This book in its four editions pioneered the emphasis on revenues and earnings recognition and realization which has been the story of the accounting difficulties of the past decade The author has insisted on rigorous understanding of fundamentals and underlying principles as well as the dynamics of accounting finance and law which lead to the issues lawyers face in the modern service economy today Although the current popular interest in accounting fraud and planned changes in oversight give an impression of new issues this work is further evidence of timeliness in well received teaching materials **Legal Control of Water Resources** Joseph L.
