Service Learning Applications From The Research:

Service-learning Alan S. Waterman, 2014-03-18 Linking research and educational practice for the benefit of both is not a new idea. If practice such as service learning is a bold departure from the status quo, however, research is not just beneficial; it is critical. If schools are to become laboratories of democracy and entrepreneurship and if students are to become engaged as partners in renewal of their communities, a research case must be made for service learning. Does learning take place? Will other kinds of learning suffer? What kinds of practice are most effective? Clearly, solid research is essential if this transforming way of teaching and learning is to be fully integrated into American schooling and youth development institutions. The National Youth Leadership Council (NYLC) took a first step toward joining service learning practice with research in 1983. In 1991, NYLC created a center which initiated and encouraged program evaluation, formative research that informs and improves practice, and summative studies that measure results. This volume grew out of a National Service Learning Conference, an annual event convened by the NYLC. A day-long research seminar at the conference brought together researchers to discuss the latest developments among themselves and with practitioners. Impressive in their range and rigor, their papers offer documentation and analysis useful to an emerging research knowledge base. It is a starting point for the evidence needed to firmly establish service learning for K-12 age people as a widely accepted way of teaching and learning.

Service Learning Andrew Furco, Shelley H. Billig, 2002-03-01 The Advances in Service Learning Research book series was established to initiate the publication of a set of comprehensive research volumes that would present and discuss a wide range of issues in this broad field called service learning. Service learning is a multifaceted pedagogy that crosses all levels of schooling, has potential relevance to all academic and professional disciplines, is connected to a range of dynamic social issues, and operates within a broad range of community contexts. In terms of research, there is much terrain to cover before a full understanding of service learning can be achieved. This volume, the first in the annual book series, explores various themes, issues, and answers that bring us one step closer to understanding the essence of service learning. The chapters of this volume focus on a broad range of topics that address a variety of research issues on service learning in K-12 education, teacher education, and higher education. Through a wide-scope research lens, the volume explores definitional foundations of service learning, theoretical issues regarding service learning, the impacts of service learning, and methodological approaches to studying service learning. Collectively, the chapters of the book provide varying and at times opposing perspectives on some of the critical issues regarding service learning research and practice.

Where's the Learning in Service-Learning? Janet Eyler, 1999-05-07 As academic service learning continues to grow rapidly practitioners are discovering a pressing need for solid empirical research about learning outcomes Where s the Learning in Service Learning helps define learning expectations presents data about learning and links program characteristics with learning outcomes It is the first book to explore the experience of service learning as a valid learning activity

Service Learning Lorie Roy, Kelly Jensen, Alex Hershey Meyers, 2009 Roy brings together authors from the top tier schools to outline their programmes and surrounding efforts and provide examples of how to incorporate service learning into library and information science education

Applications of Service Learning in Higher Education Watson, Sandy White, 2024-03-22 In higher education a pressing issue has emerged how to authentically connect academic pursuits with real world challenges The last decade has witnessed an escalating call for heightened interaction between universities and the real world Demands have grown for higher education institutions to instill democratic citizenship and address students moral development In response to this rise in demand there has been a notable shift toward emphasizing service learning within academia As educators grapple with the imperative to seamlessly integrate theory and practice *Applications of Service Learning in Higher Education* steps into the forefront delving into the myriad applications of service learning to effectively address this critical issue *Applications of Service Learning in Higher Education* examines the complexities surrounding service learning in higher education At its core the book aims to showcase concrete examples of successful service learning applications acting as a catalyst for the integration of this transformative pedagogy into the academic fabric Beyond the surface the book delves into the intricate planning execution and assessment stages of service learning projects whether manifested within local communities or on an international scale It seeks to fill notable knowledge gaps particularly in less explored regions like Latin America and the Caribbean and underscores the significance of multidisciplinary experiences As the narrative unfolds the book addresses the symbiotic relationship between service learning and students programs of study transforming communities into vibrant classrooms where learning transcends traditional boundaries

Service-learning and Community Engagement Andrew D. Stolljes, 2008 In recent years there has been a virtual explosion of interest in service learning Impact studies have demonstrated a wide range of interpersonal outcomes including a sense of efficacy connection to community appreciation for diverse populations and interest in course work to name a few Yet critics have recently argued

that the developmental outcomes of service learning do not sufficiently examine cognitive development Further it is not clear whether interpersonal outcomes interact with the intellectual outcomes attributed to the courses affiliated with the service This groundbreaking book examines whether exposure to and immersion in a service learning program is in any way related to cognitive development The researcher identified traditionally aged college students who were selected by service learning faculty as demonstrating an exemplary commitment to and engagement in service learning This study utilized The Service Learning Model developed by Delve Mintz and Stewart 1990 to examine describe and assess depth of engagement in service at two points in time William Perry s Scheme of Intellectual and Ethical Development 1970 was used to examine possible cognitive development Results reveal a new pathway of deepening engagement in service The growing body of research on college student participation in service learning has documented the generally small positive effects of service learning on student development A casual observer may attribute this effort to be successful however a closer examination of service learning begs the question Is a small positive effect the type of learning we expect and are we accomplishing the learning objectives of the academy not to mention meeting community needs The focus on what students are learning rather than on how they learn best leaves us with an unsettling uncertainty regarding the outcomes of service learning In order to focus on how students may learn best this book focuses on an examination of individuals as compared with groups and of individuals that exhibit some of the outcomes that service learning claims to promote This book examines whether any students report that service learning enriches their course of study resulting in the development of critical thinking skills among other cognitive skills in addition to interpersonal skills This book shows that direct service experience involving an emotional or psychological affective connection with a community member or members receiving services prompts an assessment of the participants place in society In responding to these emotions students participated in service more frequently and with deeper engagement Exposure to and immersion in direct service experiences along with subsequent reflection prior to involvement in a service learning program are the mediating factors for the preparation of exemplars to initiate the interest necessary to develop cognitive skills This book shows that interpersonal affective development is the precursor for participants readiness for cognitive development in a service learning program A developmental scheme of engagement student development interactions recommendations for faculty for optimal development in service learning and recommendations for future practice are presented in this book that will be a valuable addition for all collections in education
