Ebook: Sociology: A Brief Introduction Schaefer, 2014-10-16 Ebook Sociology A Brief Introduction **Sociology of Marriage and the Family** Randall Collins, Scott Coltrane, 1991 This sociological analysis of the system of marriage and family focuses on the family as an institution in society It uniquely encompasses many facets of society and students are able to learn about family seen through a cultural and historical perspective The book sets a high conceptual standard but uses informal writing and minimal jargon It presents the perspectives of critical and questioning academics feminists progressives anti racists independent thinkers cross disciplinary types etc within a scholarly well researched text It addresses a host of real world issues and practical concerns **21st Century Sociology: A Reference Handbook** Clifton D. Bryant, Dennis L. Peck, 2007 Publisher Description **Marital and Sexual Lifestyles in the United States** Linda P Rouse, 2013-12-16 Learn the changing role of sexuality in American life This helpful book offers a solid background in the sociology of family life and personal sexuality Marital and Sexual Lifestyles in the United States Attitudes Behaviors and Relationships in Social Context is designed to give readers a broad view of the diversity of contemporary U S attitudes behaviors and relationships It also covers basic sociological concepts and research methods Most human sexuality texts focus on the individual whereas texts designed for sociology courses on the family downplay individual sexual expression Marital and Sexual Lifestyles in the United States integrates the two approaches The choices of the individual take on additional meaning when seen within a unified historical statistical and conceptual framework Marital and Sexual Lifestyles in the United States gives readers the

tools to consider such pressing issues as Does the divorce rate mean that the institution of marriage is in trouble Are children's futures impaired if they come from single parent households Should same sex couples be allowed to marry How does marriage differ from cohabitation What are the real sexual differences between the genders What is sexual morality How much confidence can we place in studies of human sexuality by such social scientists as Alfred Kinsey and Masters and Johnson These questions and others like them are placed in the context of U S social trends beginning with the 1950s and moving toward today Plentifully illustrated with tables charts and figures that show where we are going as well as where we have been Marital and Sexual Lifestyles in the United States gives a clear perspective on relationships in social context

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4

The Other Half Jacqueline P. Wiseman, 1991 This current study has emerged from two decades of the author's investigations in related areas alcoholism and domestic relations Its canvas is broadly comparative drawing on interviews and data gathered in the United States and Finland The domestic drama of The Other Half is played out both in the private scene of the home and the more public scene of the workplace and against these two differing national backgrounds Despite the many expected and perceived cultural differences between the countries the effects of alcoholism on the family are shown to be the same Dr Wiseman's study offers theoretical insights gleaned from its perspective on alcoholism as an interactive phenomenon to which the concepts of G H Mead and Blumer can be applied to illuminate the carefully presented data and go beyond them New terrain in studies of alcoholism is thereby explored including such themes as the social construction by the subjects of their husbands drinking their marriage and their self images the strategy of coping mechanisms and the effects of the crisis of alcoholism on gender sex roles and power differentials The Other Half complements Dr Wiseman's prize winning work on the treatment of Skid Row alcoholics Stations

of the Lost while involving issues of greater complexity on both the methodological and theoretical plane Women and the Family Beth Hess, Marvin B Sussman, 2014-06-17 Despite the pervasive changes that have taken place in women's lives in the past twenty five years increased participation in the labor force the attainment of higher levels of education and higher salaries comparable changes in the division of family labor and in the roles of men have lagged considerably In this timely book the editors and other experts in feminism and family studies examine the effects of two decades of influence by the women's movement on sex roles and child rearing While applauding some positive changes the contributors point to powerful forces of resistance to equality between the sexes especially the question of family the fear of depriving children of maternal attachment and the belief that working mothers are placing their own interests above those of other family members as an issue that until fully addressed prevents genuine equality between the sexes **Family Life in Black America** Robert Joseph Taylor, James S. Jackson, Linda M. Chatters, 1997-08-13 Most studies of Black families have had a problem focus offering a narrow view of important issues such as out of wedlock births single parent families and childhood poverty Family Life in Black America moves away from this negative perspective and instead deals with a wide range of issues including sexuality procreation infancy adulthood adolescence cohabitation parenting grandparenting and ageing A fresh aspect of this book is the amount of diversity it reveals within black families and the forces that shape limit and enhance them *Divided Time* Richard Layte, 2018-12-17 Published in 1999 Housework and child care are a major part of most people's lives The growth of part time work amongst women is just one example of the way our economy is structured to accommodate this fact Yet very little research has been done on this subject in Britain and what little has been done tends to be small scale and impressionistic This book examines how couples divide their time between domestic and paid work and the effect that tensions between the two can have It provides valuable evidence on how domestic work is organized and why when women are more likely to be employed than men have not increased their share of domestic work Representative evidence is combined with previous small scale research to show how private troubles are related to massive social and economic changes in British society Evidence of this sort has never been presented before in the British context **A Handbook for the Study of Mental Health** Teresa L. Scheid, Tony N. Brown, 2009-11-16 The second edition of A Handbook for the Study of Mental Health provides a comprehensive review of the sociology of mental health Chapters by leading scholars and researchers present an overview of historical social and institutional frameworks Part I examines social factors that shape psychiatric diagnosis and the measurement of mental health and illness theories that explain the definition and treatment of mental disorders and cultural variability Part II investigates effects of social context considering class gender race and age and the critical role played by stress marriage work and social support Part III focuses on the organization delivery and evaluation of mental health services including the criminalization of mental illness the challenges posed by HIV and the importance of stigma This is a key research reference source that will be useful to both undergraduates and graduate

students studying mental health and illness from any number of disciplines

Causal Analysis with Event History Data Using Stata Hans-Peter Blossfeld, Götz Rohwer, Gwendolin J. Blossfeld, 2025-07-28 This third edition of *Causal Analysis with Event History Data Using Stata* provides an updated introduction to event history modeling along with many instructive Stata examples Using the latest Stata software each of these practical examples develops a research question points to useful contextual background information gives a brief account of the underlying statistical concepts describes the organization of input data and the application of Stata statistical procedures and assists the reader in interpreting the content of the results obtained Emphasizing the strengths and limitations of continuous time event history analysis in different fields of social science applications this book demonstrates that event history models provide a useful approach to uncover causal relationships or to map a system of causal relationships In particular this book demonstrates how long term processes can be studied how different forms of duration dependencies can be estimated using nonparametric parametric and semiparametric models and how parallel and interdependent dynamic systems can be analyzed from a causal analytical point of view using the method of episode splitting The book also shows how changing contextual information at the micro meso and macro levels can be easily integrated into a dynamic analysis of longitudinal data Finally the book addresses the problem of unobserved heterogeneity of time constant and time dependent omitted variables and makes suggestions for dealing with these sometimes difficult methodological problems *Causal Analysis with Event History Data Using Stata* is an invaluable resource for both novice and experienced researchers from a variety of fields e g sociology economics political science education psychology demography epidemiology management research and organizational studies as well as medicine and clinical applications who need an introductory textbook on continuous time event history analysis and who are looking for a practical handbook for their longitudinal research

Handbook of Interpersonal Commitment and Relationship Stability Jeffrey M. Adams, Warren H. Jones, 1999-09-30 A fundamental assumption underlying the formation of our most important relationships is that they will persist indefinitely into the future As an acquaintanceship turns into a friendship for example both members of this newly formed interpersonal bond are likely to expect that their interactions will become increasingly frequent diverse and intimate over time This expectation is perhaps most apparent in romantically involved couples who through a variety of verbal and symbolic means make explicit pledges to a long lasting relationship In either case it is clear that these relationships represent something valuable to the individuals involved and are pursued with great enthusiasm Virtually all close relationships are formed within the context of mutually rewarding interactions and or strong physical attraction between partners Friends and romantically involved couples alike are drawn to one another because of similarity of attitudes interests and personality and quite simply because they enjoy one another's company This enjoyment coupled with the novelty that characterizes new relationships almost makes the continuation of the relationship a foregone conclusion As relationships progress however their novelty fades conflicts may arise between partners negative life events may occur and

the satisfaction that previously characterized the relationships may diminish

The Psychosocial Interior of the Family Gerald Handel, Gail G. Whitchurch, 1994 This long awaited fourth edition has the same goal as the preceding editions to understand families in terms of the kinds of interaction through which family life is constructed The changes in the family as an institution have influenced these processes just as they have influenced the ways we understand and write about them But even in these postmodern circumstances an underlying premise of the volume is that two partners establish a family because they have selected each other as distinctively meaningful to one another They will affirm modify elaborate or retreat from various aspects of the relationship through interaction over time and in changing circumstances This volume contains the best available interdisciplinary work on the social psychology of the family More than half of the selections are new to this edition which incorporates a variety of theoretical and research perspectives that provide the reader with a range of authoritative and up to date sources on the family and interpersonal relations The newer forms of family organization that have emerged in the more recent literature specifically single parent families stepfamilies and families of gay and lesbian domestic partners are included Authors have been drawn from a variety of disciplines including sociology communication family studies human development psychology anthropology and social work

Media, Sports, and Society Lawrence A. Wenner, 1989-08 Media Sports and Society provides a foundation for research on the communication of sports The volume is framed by a seminal article outlining the parameters of the communication of sports and pointing to major issues that need to be addressed in the relationship between sports and media Contributors examine the theoretical cultural and historical issues the production of media sports programming its content and its audience Individual chapters include a discussion of the spectacle of media sports a comparison of Super Bowl Football and World Cup Soccer a consideration of the spectators enjoyment of sports violence the rhetoric of winning and the American dream and a fascinating examination of gender harmony and sports in
