Teoh, K.H. Lee, 2012-12-06 Recent advances in the field of fracture of engineering materials and structures have increasingly indicated its multidisciplinary nature This area of research now involves scientists and engineers who work in materials science applied mathematics and mechanics and also computer scientists The present volume which contains the Proceedings of the Joint FEFG ICF International Conference on Fracture of Engineering Materials and Structures held in Singapore from the 6th to 8th of August 1991 is a testimony of this multidisciplinary nature This International Conference was the Second

Symposium of the Far East Fracture Group FEFG and thus provided a unique opportunity for researchers and engineers in the Far East region to exchange and acquire knowledge of new advances and applications in fracture The Conference was also the Inter Quadrennial International Conference on Fracture ICF for 1991 and thus appealed to researchers in the international arena who wished to take advantage of this meeting to present their findings The Conference has brought together over 130 participants from more than 24 countries and they represented government and industrial research laboratories as well as academic institutions It has thus achieved its objective of bringing together scientists and engineers with different backgrounds and perspectives but with a common interest in new developments in the fracture of engineering materials and structures This volume contains 4 keynote papers 4 invited papers and 130 contributed papers **Marine Structures Research Recommendations** National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Marine Structures, 1997-06-08 Engineering Materials, Structures, Systems and Methods for a More Sustainable Future Alphose Zingoni, 2025-08-07 Engineering Materials Structures Systems and Methods for a More Sustainable Future comprises 275 papers that were presented at SEMC 2025 the Ninth International Conference on Structural Engineering Mechanics and Computation This event held in Cape Town South Africa from 1 to 3 September 2025 was attended by around 300 participants from 42 countries worldwide The Proceedings are divided into 15 sections The various topics may be grouped into five broad categories covering i the mechanics of materials solids and structures ii numerical modelling computational simulations and experimental testing iii analysis design and construction in the traditional engineering materials iv innovative engineering materials structures and methods v maintenance long term performance life cycle considerations and sustainable construction Engineering Materials Structures Systems and Methods for a More Sustainable Future will be of interest to civil structural mechanical marine and aerospace engineers as well as planners and architects Two versions of the papers are available full papers of length six pages are included in the e book while short papers of length two pages intended to be concise but self contained summaries of the full papers are in the printed book *Tubular Structures XIII* Ben Young, 2010-11-12 Tubular Structures XIII contains the latest scientific and engineering developments in the field of tubular steel structures as presented at the 13th International Symposium on Tubular Structures ISTS13 Hong Kong 15 17 December 2010 The International Symposium on Tubular Structures ISTS has a longstanding reputation for being the principal showcase for manufactured tubing and the prime international forum for discussion of research developments and applications in this field The Symposium presentations herein include one invited ISTS Kurobane Lecture together with all the technical papers Various key and emerging subjects in the field of hollow structural sections are covered such as special applications and case studies static and fatigue behaviour of connections joints concrete filled and composite tubular members and offshore structures stainless steel and aluminium structures earthquake and dynamic resistance specification and standard developments material
