The Painter's Methods and Materials A. P. Laurie, 2013-03-21
Many of the valuable techniques and materials formerly used in painting have been lost or forgotten With the convenience of the art supply store the artist is no longer forced to acquaint himself with many of the operations performed by the great craftsmen painters of the past The result is that the modern painter often does not understand the chemical and physical reasons for the steps he follows This book bridges the gap between artist and craftsman and gives the reader insights into the classical techniques of the great masters as well as the procedures followed today Professor Laurie has based his book on an intensive study of great master paintings and manuscripts as well as on actual experiment He covers techniques for painting on wood panels paper walls and canvas and for dealing with watercolors tempera fresco pigments and colors balsams resins turpentine varnishes waxes sizings and various oils such as walnuts linseed and poppy The reader will also find much information on the behavior of light through various refractions prism effect in layers of paint and the cleaning and preservation of pictures The discussion is illustrated by 48 full page plates These reproductions of actual paintings by major and minor masters Rembrandt Lippi Michelangelo Botticelli Rubens Hals and others were selected to show specific points of painting condition or technical procedures Microphotographs are used to show cross sections of painting age cracks flaking pigment particles and similar material

Theory-Based Data Analysis for the Social Sciences Carol S. Aneshensel, 2013 This book presents the elaboration model for the multivariate analysis of observational quantitative data This model entails the systematic introduction of third variables to the analysis of a focal relationship between one independent and one dependent variable to ascertain whether an inference of causality is justified Two complementary

strategies are used an exclusionary strategy that rules out alternative explanations such as spuriousness and redundancy with competing theories and an inclusive strategy that connects the focal relationship to a network of other relationships including the hypothesized causal mechanisms linking the focal independent variable to the focal dependent variable The primary emphasis is on the translation of theory into a logical analytic strategy and the interpretation of results The elaboration model is applied with case studies drawn from newly published research that serve as prototypes for aligning theory and the data analytic plan used to test it these studies are drawn from a wide range of substantive topics in the social sciences such as emotion management in the workplace subjective age identification during the transition to adulthood and the relationship between religious and paranormal beliefs The second application of the elaboration model is in the form of original data analysis presented in two Analysis Journals that are integrated throughout the text and implement the full elaboration model Using real data not contrived examples the text provides a step by step guide through the process of integrating theory with data analysis in order to arrive at meaningful answers to research questions
