Бронхиальная астма остается одной из самых значимых медико-социальных проблем современной медицины. Несмотря на существующие усилия, предпринимаемые во всем мире по улучшению качества диагностики и лечения бронхиальной астмы, рост заболеваемости продолжается. Существующие методы лечения бронхиальной астмы не позволяют половине больных контролировать заболевание, что сопряжено с высоким риском развития обострений. Современный менеджмент бронхиальной астмы требует глубокого анализа факторов, обуславливающих прогрессирование заболевания и развитие обострений. Настоящая публикация – кумулятивный обзор материалов, представленных по проблеме бронхиальной астмы на последнем конгрессе Европейской академии аллергологии и клинической иммунологии, состоявшемся 26–30 мая 2018 г. в Мюнхене. В статье использованы материалы выступлений ведущих зарубежных специалистов в области аллергологии и клинической иммунологии. В сообщениях известных специалистов в области диагностики и лечения бронхиальной астмы изложены современные взгляды на проблему этой распространенной патологии, заболеваемость которой продолжает увеличиваться, особенно в детской популяции. Опираясь на последние достижения в области молекулярной аллергологии, клинической иммунологии, ученым удалось убедительно доказать гетерогенность бронхиальной астмы, необходимость применения новых диагностических и терапевтических методов: биомаркеров для установления фенотипа заболевания с назначением таргетного индивидуализированного лечения каждого пациента и биопрепаратов. Внимание специалистов было акцентировано на изучении особенностей возникновения и клинического течения неконтролируемой бронхиальной астмы, на внедрении новой классификационной структуры с указанием биологических маркеров каждого фенотипа неконтролируемой бронхиальной астмы. Представлен скорректированный вариант GINA с пересмотром терапевтической тактики, в том числе у детей. Конгресс EAACI (2018) внес значительный вклад в совершенствование диагностики и лечения бронхиальной астмы, что позволит направленно и эффективно лечить пациентов с различными вариантами клинического течения этого заболевания, улучшить качество их жизни, уменьшить число осложнений и снизить уровень инвалидизации.

Ключевые слова: бронхиальная астма; фенотипы; эндотипы; дети; биологические маркеры; ступенчатая терапия.

Asthma remains one of the most important medical and social problems of current medicine. Despite significant approaches the increase in its incidence continues. 334 million people worldwide are affected by this chronic disease and more than 250 thousand die every year. Current asthma treatment methods aren't useful to achieve asthma control in half of patients that associates with high risk of exacerbation of the disease. Modern asthma management requires a deep analysis of the factors responsible for the asthma progression and the development of exacerbations. The European Academy of Allergology and Clinical Immunology was held May 26–30, 2018 in Munich. The present publication sums up speeches of leading experts in the field of allergology and clinical immunology. Well-known experts in the
