Methods In Biliary Research:

Methods in Biliary Research Maurizio Muraca, 1994-11-28 This exciting new book brings together the most significant information on the procedures that have generated most of the recent progress in hepatobiliary pathophysiology The authors describe their unique experiences including specific technical and analytical problems Since workers in the field often specialize within a limited area the methodology covering each of the main aspects in hepatobiliary research is particularly useful The book also includes an exhaustive reference list

Shock Wave Lithotripsy James Lingeman, 2013-06-29

Extracorporeal shock wave lithotripsy (ESWL) arrived in the United States in February of 1984 with explosive impact in the field of urology. The first ESWL treatment in the United States with the Dornier H device occurred at the Methodist Hospital of Indiana and by the end of 1984. In spite of the rapidly the United States ESWL study group had accrued over 2,500 ESWL treatments, accumulated experience at the six institutions involved in the FDA trial of the Dornier HM device, other urologists in this country and around the world had little opportunity to gain knowledge about the utilization of this revolutionary technique. For this reason, the Methodist Hospital of Indiana organized the first symposium on shock wave lithotripsy in February of 1985. Interest in this meeting was intense as approval of the Dornier device had occurred only a few weeks earlier in December of 1984. Because of the success of this initial meeting, subsequent meetings have been held annually in Indianapolis. Following the third annual symposium on extracorporeal shock wave lithotripsy in March of 1987, a number of participants and attendees requested that the information presented at the meeting be made available. Therefore, plans were made to publish the proceedings of the next meeting, which occurred March 5 and 6, 1988. The Methodist Hospital of Indiana's 4th Symposium on Shock Wave Lithotripsy: State of the Art was the best attended meeting to date with over 650 registrants from 36 states and 24 countries.

Methods in gastrointestinal cancers Shuyun Rao, Imayavaramban Lakshmanan, Shantibhusan Senapati, Zhendong Jin, 2023-05-16

Biliary Tract Surgery Chihua Fang, Wan Yee Lau, 2021-05-11

This book presents the latest application of digital medical imaging technology in biliary tract surgery, including three-dimensional visualization, preoperative evaluation, preoperative surgical planning, and simulated biliary surgery. Digital surgical diagnosis and treatment of cholecystolithiasis, bile duct stones, hepatolithiasis, gallbladder cancer, and bile duct cancer is described in details with more than 900 illustrations. Written by experts with wealth of clinical experience, it will be a useful reference for general surgeons as well as practitioners in related disciplines.
