key assumption in both approaches On the other hand similarly to Fairclough van Dijk acknowledges three different perspectives text discourse practice and sociocultural practice and emphasizes on the link between textual analysis and sociocultural analysis However van Dijk differentiates himself from both Fairclough and Wodak in his understanding of social events or of social institutions and power relations To van Dijk social cognitions mediate between micro and macro levels of society between discourse and action between the individual and the group Therefore the focus on social cognition governs the process of analysis
