Dumke,Alain Abran,2008-08-19 This book constitutes the thoroughly refereed post proceedings of the International Workshop on Software Measurement IWSM Mensura 2007 held in Palma de Mallorca Spain in November 2007 The 16 revised full papers presented were carefully reviewed and selected for inclusion in the book The papers deal with aspects of software measurement like function points measurement effort and cost estimates prediction industrial experiences in software measurement planning and implementing measurement measurement based software process improvement best practices in software measurement usability and user interaction measurement measurement of open source projects teaching and learning software measurement as well as new trends and ontologies for software measurement
   Task Intelligence for Search and Recommendation Chirag Shah,Ryen W. White,2022-06-01 While great strides have been made in the field of search and recommendation there are still challenges and opportunities to address information access issues that involve solving tasks and accomplishing goals for a wide variety of users Specifically we lack intelligent systems that can detect not only the request an individual is making what but also understand and utilize the intention why and strategies how while providing information and enabling task completion Many scholars in the fields of information retrieval recommender systems productivity especially in task management and time management and artificial intelligence have recognized the importance of extracting and understanding people s tasks and the intentions behind performing those tasks in order to serve them better However we are still struggling to support them in task completion e g in search and assistance and it has been challenging to move beyond single query or single turn interactions The proliferation of intelligent agents has unlocked new modalities for interacting with information but these agents will need to be able to work understanding current and future contexts and assist users at task level This book will focus on task intelligence in the context of search and recommendation Chapter 1 introduces readers to the issues of detecting understanding and using task and task related information in an information episode with or without active searching This is followed by presenting several prominent ideas

and frameworks about how tasks are conceptualized and represented in Chapter 2 In Chapter 3 the narrative moves to showing how task type relates to user behaviors and search intentions A task can be explicitly expressed in some cases such as in a to do application but often it is unexpressed Chapter 4 covers these two scenarios with several related works and case studies Chapter 5 shows how task knowledge and task models can contribute to addressing emerging retrieval and recommendation problems Chapter 6 covers evaluation methodologies and metrics for task based systems with relevant case studies to demonstrate their uses Finally the book concludes in Chapter 7 with ideas for future directions in this important research area **Computational Methods in Medicinal Chemistry, Pharmacology, and Toxicology** Muhammad Ishfaq,2025-06-13 Computational Methods in Medicinal Chemistry Pharmacology and Toxicology is a comprehensive resource that offers an advanced overview of computational techniques employed in drug discovery design and toxicity prediction The book discusses various topics including molecular modeling virtual screening machine learning and network pharmacology It serves as an essential guide for researchers practitioners and students in pharmacology toxicology medicinal chemistry bioinformatics and systems biology fields showcasing practical applications and future perspectives on new technologies In addition to covering computational approaches the book provides real world examples of drug discovery candidate optimization and safety assessment Other sections explore computer applications in pharmacology and toxicology and discusses the importance of these methods in advancing medicinal research Offers comprehensive coverage of computational methods that are relevant to pharmacology and toxicology including molecular modeling virtual screening machine learning and network pharmacology Includes practical examples and case studies that demonstrate how these methods can be applied in drug discovery design and toxicity prediction Discusses emerging trends and future directions in the field of computational pharmacology and toxicology that can help readers stay up to date with the latest advances and anticipate future developments *Mastering Prompt Engineering* Anand Nayyar,Ajantha Devi Vairamani,Kuldeep Kaswan,2025-08-01 Mastering Prompt Engineering Deep Insights for Optimizing Large Language Models LLMs is a comprehensive guide that takes readers on a journey through the world of Large Language Models LLMs and prompt engineering Covering foundational concepts advanced techniques ethical considerations and real world case studies this book equips both novices and experts to navigate the complex LLM landscape It provides insights into LLM architecture training and prompt engineering methods while addressing ethical concerns such as bias and privacy Real world case studies showcase the practical application of prompt engineering in a wide range of settings This resource is not just for specialists but is a practical and ethically conscious guide for AI practitioners students scientific researchers and anyone interested in harnessing the potential of LLMs in natural language processing and generation Mastering Prompt Engineering serves as a gateway to a deeper understanding of LLMs and their responsible and effective utilization through its comprehensive ethical and practical approach Addresses ethical concerns and provides strategies for mitigating bias and ensuring responsible AI

practices Covers foundational concepts advanced techniques and the broader landscape of LLMs equipping readers with a well rounded understanding Serves as a gateway to a deeper understanding of LLMs and their responsible and effective utilization **Advanced Information Systems Engineering** Matthias Jarke,John Mylopoulos,Christoph Quix,Colette Rolland,Yannis Manolopoulos,Haralambos Mouratidis,Jennifer Horkoff,2014-06-05 This book constitutes the proceedings of 26th International Conference on Advanced Information Systems Engineering CAiSE 2014 held in Thessaloniki Greece in June 2014 The 41 papers and 3 keynotes presented were carefully reviewed and selected from 226 submissions The accepted papers were presented in 13 sessions clouds and services requirements product lines requirements elicitation processes risk and security process models data mining and streaming process mining models mining event logs databases software engineering <u>Ultimate MLOps for Machine Learning Models: Use Real Case Studies to Efficiently Build, Deploy, and Scale Machine Learning Pipelines with MLOps</u> Saurabh D.,2024-08-30 The only MLOps guide you ll ever need Key Features Acquire a comprehensive understanding of the entire MLOps lifecycle from model development to monitoring and governance Gain expertise in building efficient MLOps pipelines with the help of practical guidance with real world examples and case studies Develop advanced skills to implement scalable solutions by understanding the latest trends tools and best practices Book DescriptionThis book is an essential resource for professionals aiming to streamline and optimize their machine learning operations This comprehensive guide provides a thorough understanding of the MLOps life cycle from model development and training to deployment and monitoring By delving into the intricacies of each phase the book equips readers with the knowledge and tools needed to create robust scalable and efficient machine learning workflows Key chapters include a deep dive into essential MLOps tools and technologies effective data pipeline management and advanced model optimization techniques The book also addresses critical aspects such as scalability challenges data and model governance and security in machine learning operations Each topic is presented with practical insights and real world case studies enabling readers to apply best practices in their job roles Whether you are a data scientist ML engineer or IT professional this book empowers you to take your machine learning projects from concept to production with confidence It equips you with the practical skills to ensure your models are reliable secure and compliant with regulations By the end you will be well positioned to navigate the ever evolving landscape of MLOps and unlock the true potential of your machine learning initiatives What you will learn Implement and manage end to end machine learning lifecycles Utilize essential tools and technologies for MLOps effectively Design and optimize data pipelines for efficient model training Develop and train machine learning models with best practices Deploy monitor and maintain models in production environments Address scalability challenges and solutions in MLOps Implement robust security practices to protect your ML systems Ensure data governance model compliance and security in ML operations Understand emerging trends in MLOps and stay ahead of the curve Table of Contents1 Introduction to MLOps 2 Understanding Machine Learning Lifecycle 3 Essential Tools and
