**Urban Political** Theresa Enright,Ugo Rossi,2017-11-01 This book examines the political and economic trajectories of cities following the 2008 financial crisis The authors claim that in this era which they dub late neoliberalism urban spaces institutions subjectivities and organizational forms are undergoing processes of radical transformation and recomposition The volume deftly argues that the urban political horizon of late neoliberalism is ambivalent marked by many progressive mobilizations for equality and justice but also by regressive forces of austerity exploitation and domination *Social Policy and Public Policy* Lee Rainwater, This classic volume was originally designed as an introduction to social science perspectives on a broad range of social issues in American society specifically the complex social problems of the 1960s Because the volume is structured as a survey it is neither exhaustive or definitive It does provide a wide range of information about these problems as well as the many different policy initiatives that were developed to cope with them Readers can learn a great deal about the common themes predilections and quandaries that characterized United States responses to the complex problems of the 1960s and the patterns of inequality and injustice prevalent at that time The essays were selected to cover the range of substantive problematic issues of the period the social science perspectives that were brought to bear on them and the range of social science methodologies used Finally the selections emphasize the contributions that can be made to understanding social problems by intensive and rigorous social science research Journalists and popular writers use a common sense approach to their study of social problems and the results are often imaginative and incisive The tools of social scientists produce information and analyses that contribute far more to our understanding than even the most insightful journalist can achieve The selections in this volume highlight the deeper and more fundamental understanding of social issues that can come from rigorous analysis of government statistics and from special sample surveys from in depth ethnographic studies Lee Rainwater is professor emeritus of sociology at Harvard University He was one of the original founders of Transaction Publishers He has written books and articles in many professional journals **Bibliography of**

**Landscape Architecture, Environmental Design, and Planning** Antoinette Paris Powell,1987 *Interest Groups in U.S. Local Politics* Sarah Anzia,2023-09-15 Interest group scholarship has so far focused mainly on national politics and has had very little to say about interest groups in American cities counties school districts and special districts This special issue is a step toward remedying that it is a collection of articles and essays that examine some of the interest groups that are commonly active in US local politics The contributions herein discuss real estate developers tenant organizations teachers unions police unions and local PACs covering topics such as how they are organized how they engage in local politics some of the constraints on their influence and the nuanced ways in which ideology and identities can sometimes shape what coalitions are possible in the local context By bringing this work together in one place in a journal devoted to research on interest groups the hope is that this special issue will help to cement interest groups in local politics as the recognizable research focus it deserves to be **Explorations in Urban Theory** Michael Peter Smith,2017-07-12 For over three decades

urban theorist Michael Peter Smith has engaged in constructing innovative theories on central research questions in urban studies This book brings together his views on the state of urban theory sorting out the changing strengths and weaknesses in the field Smith refocuses attention on the cultural social and political practices of urban inhabitants particularly the way in which their everyday activities have contributed to the social construction of new ethnic identities and new meanings of urban citizenship Combining the methods of political economy and transnational ethnography he encourages us to think about new political spaces for practicing urban citizenship by analyzing the connections linking cities to the web of relations to other localities in which they are embedded Smith systematically analyzes the dynamics of community power and urban change under new globalizing trends and increased transnational mobility Expanding on his original conceptualization of transnational urbanism he frames urban political life within a wider transnational context of political practice in which an endless interplay of distinctly situated networks social practices and power relations are fought out at multiple scales in an inexorable politics of inclusion and exclusion     People & Politics in Urban America Robert W. Kweit, Mary G. Kweit, 2013-10-31 This revised textbook for courses on urban politics challenges the notion that the field is dominated by political economy showing that despite the undeniable importance of economic issues citizens do play a significant part in urban politics
