**Metropolitan America** Amos Henry Hawley, 1975      **Metropolitan America in Contemporary Perspective** Amos Henry Hawley, Vincent P. Rock, 1975      **Metropolitan America**, 1975      Urban Geography in America, 1950-2000 Brian J.L Berry, James Wheeler, 2014-05-01 Urban Geography in America offers a comprehensive historiography of this major field. Compiling the best essays from the flagship journal Urban Geography it shows the evolution of the field from the 1950s to 2000 as it shifted from data driven social science modeling in the 1960s to the more critical perspectives of the 1970s to postmodernism in the 1980s to feminism and globalization in the 1990s. It covers all the major trends and figures and features some of the most important names in the field. Ultimately this will be a necessary reference for all scholars in the field and all graduate students taking introductory courses and preparing for their comprehensive exams.

*Transportation and Behavior* Irwin Altman, 2013-06-29 The present volume in our series Human Behavior and Environment is devoted to a specific topic continuing the pattern established in the last two volumes. The current theme is behavioral science aspects of transportation. This topic was chosen to exemplify a problem area of practical import to which psychologists, sociologists and other behavioral and social scientists can make and have been making notable contributions. Our volume includes papers from a variety of psychological perspectives including human factors, environmental psychology and behavior modification along with other contributions from a sociologist and a transportation engineer interested in behavioral science contributions to transportation. Joining us as guest editor for this volume is Peter Everett, an environmental psychologist whose area of specialty is the study of behavioral components of transportation systems. Volume 6 of our series currently in preparation will be devoted to behavior and the natural environment. A provisional table of contents for that volume appears on page v.

**When Government Fails** Mark Baldassare,1998-06-01 When Orange County California filed for Chapter 9 protection on December 6 1994 it became the largest municipality in United States history to declare bankruptcy In the first comprehensive analysis of this momentous fiscal crisis Mark Baldassare uncovers the many twists and turns from the dark days in December 1994 to the financial recovery of June 1996 Utilizing a wealth of primary materials from the county government and Merrill Lynch as well as interviews with key officials and players in this drama Mark Baldassare untangles the causes of this 1 64 billion fiasco He finds three factors critical to understanding the bankruptcy one the political fragmentation of the numerous local governments in the area two the fiscal conservatism underlying voters feelings about their tax dollars three the financial austerity in state government and in meeting rising state expenditures Baldassare finds that these forces help to explain how a county known for its affluence and conservative politics could have allowed its cities school water transportation and sanitation agencies to be held hostage to this failed investment pool Meticulously examining the events that led up to the bankruptcy the local officials response to the fiscal emergency and the road to fiscal recovery as well as the governmental reforms engendered by the crisis When Government Fails is a dramatic and instructive economic morality tale Eminently readable it underlines the dangers inherent in a freewheeling bull economy and the imperatives of local and state governments to protect fiscal assets As Baldassare shows Orange County need not and should not happen again

**Perceiving Environmental Quality** Kenneth Craik,2013-03-09 The purpose of this publication is

to report on a series of research workshops which examined the place of environmental perception in a comprehensive system of indices for assessing and monitoring trends in environmental quality The specific objectives of the workshops were to 1 define the state of the art in research on perception of environmental quality and identify salient conceptual and methodological issues 2 delineate potential uses of perceived environmental quality indices PEQIs and related issues regarding ways in which PEQIs might enhance implementation revision or refinement of policy orientations 3 identify the types of research which would assess adequately the efficacy of the development and the application of PEQIs and 4 out line a realistic pragmatic research strategy that relates to potential uses and identified policy issues The workshops were supported by a grant from the National Science Foundation No GSOC75 0782 and were held during the spring and summer of 1975 in Amherst Massachusetts and New York City Contributed chapters for this volume were commissioned with funds from the Institute for Man and Environment University of Massachusetts Scientific contributors to the understanding of environmental perception have increased substantially over the last decade along with recognition that this realm of knowledge is crucial for an informed perspective on the impact of man on the environment At the same time there exists general consensus that the field remains diffuse and uncoordinated Lowenthal 1972b
