Mevania Da Centro Umbro A Municipio Romano:

Mevania Anna Eugenia Feruglio, Laura Bonomi Ponzi, Dorica Manconi, 1991 **The Oxford Handbook of Pre-Roman Italy (1000-49 BCE)** Marco Maiuro, Jane Botsford Johnson, 2024 The Oxford Handbook of Pre Roman Italy provides a comprehensive account of the many peoples who lived on the Italian peninsula during the last millennium BCE Written by more than fifty authors the book describes the diversity of these indigenous cultures their languages interactions and reciprocal influences It gives emphasis to Greek colonization the rise of aristocracies technological innovations and the spread of literacy which provided the urban texture that shaped the history of the Italian peninsula **A Roman Villa and a Late Roman Infant Cemetery** David Soren, Noelle Soren, 1998-12-31 **Continuity and Change in Ancient Umbrian Cult Places** Arianna Zapelloni Pavia, 2024-12-02 What difference did the Roman expansion make in the transformation of ancient Italy With its conservative nature and abundance of material evidence the religious sphere represents a unique lens through which we can study this process over time and across different sites Tapping into the transformation of Italy as a result of Rome's expansion this book problematizes the issue of Romanization and sheds light on the different processes of adaptation that occurred during the Roman conquest **Ancient Umbria** Guy Bradley, 2000-12-21 How should we understand the ways in which the regions of Italy were affected by Roman imperialism This book which is the first full scale treatment of ancient Umbria in any language takes a balanced view of the region's history in the first millennium BC focusing on local actions and motivations as much as the effect of outside influences and Roman policies Through a careful reading of all the types of evidence it provides an important challenge to traditional treatments emphasising the Romanization of the region arguing that this is a poor explanation for the complexity of local societies in the late Republican period Instead it proposes that other trends particularly the organization of states help to explain the fascinating plurality of identities that are evident in the imperial period and allow us to appreciate the diversity of local societies that emerged in both mountain and lowland areas of Umbria **Historical Dictionary of the Etruscans** Simon K.F. Stoddart, 2009-06-16 The Etruscans were the creators of one of the most highly developed cultures of the pre Roman Era Having at one time control over a significant part of the Mediterranean the Etruscans laid the foundation of the city of Rome They had their own language which has never been totally decoded and their art influenced such artists as Michelangelo While the Etruscans were eventually conquered by the Romans they left a rich culture behind The Historical Dictionary of the Etruscans relates the history of this culture focusing on aspects of their material culture and art history A chronology introductory essay bibliography appendix of museums and research institutes and hundreds of cross referenced dictionary entries on important persons places events and institutions provide an entry into a comparative study of the Etruscans **The Etruscan World** Jean MacIntosh Turfa, 2014-11-13 The Etruscans can be shown to have made significant and in some cases perhaps the first technical advances in the central and northern Mediterranean To the Etruscan people we can attribute such developments as the tie

beam truss in large wooden structures surveying and engineering drainage and water tunnels the development of the foresail for fast long distance sailing vessels fine techniques of metal production and other pyrotechnology post mortem C sections in medicine and more In art many technical and iconographic developments although they certainly happened first in Greece or the Near East are first seen in extant Etruscan works preserved in the lavish tombs and goods of Etruscan aristocrats These include early portraiture the first full length painted portrait the first perspective view of a human figure in monumental art specialized techniques of bronze casting and reduction fired pottery the bucchero phenomenon Etruscan contacts through trade treaty and intermarriage linked their culture with Sardinia Corsica and Sicily with the Italic tribes of the peninsula and with the Near Eastern kingdoms Greece and the Greek colonial world Iberia Gaul and the Punic network of North Africa and influenced the cultures of northern Europe In the past fifteen years striking advances have been made in scholarship and research techniques for Etruscan Studies Archaeological and scientific discoveries have changed our picture of the Etruscans and furnished us with new specialized information Thanks to the work of dozens of international scholars it is now possible to discuss topics of interest that could never before be researched such as Etruscan mining and metallurgy textile production foods and agriculture In this volume over 60 experts provide insights into all these aspects of Etruscan culture and more with many contributions available in English for the first time to allow the reader access to research that may not otherwise be available to them Lavishly illustrated The Etruscan World brings to life the culture and material past of the Etruscans and highlights key points of development in research making it essential reading for researchers academics and students of this fascinating civilization

Life and Death in the Roman Suburb Allison L. C. Emmerson, 2020 Life and Death in the Roman Suburb introduces new ways of understanding Roman cities as well as ancient attitudes towards death and the dead Drawing on recent archaeological projects from across Italy Emmerson shows how Roman cities created suburbs where the living and the dead came together in a new type of urban neighbourhood

Collegia Centonariorum Jinyu Liu, 2009 The collegia centonariorum were often seen as the municipal fire brigades or status groups of sorts in the Roman cities Through a close investigation of the chronological development and geographical distribution of the collegia centonariorum their legal privileges and the prosopographical data of members and patrons this volume reveals a much more complex picture of their origins characters and compositions in various regions from the first century BC to the fourth century AD Intricately connected with the textile economy the collegia centonariorum illustrate how elements as diverse as material demand from the military and the city of Rome legal infrastructure urban development and organizations of urban based craftsmen and tradesmen may have interfaced with each other in the Roman world
