**Visual Culture** María Fernández,2013-12-15 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book Mar a Fern ndez uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation state Accordingly Fern ndez presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fern ndez organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity      **Mexican art** Justino Fernández,1966      **Art and Culture:**

**María Izquierdo and Frida Kahlo** Nancy Deffebach,2015-08-15 María Izquierdo 1902 1955 and Frida Kahlo 1907 1954 were the first two Mexican women artists to achieve international recognition During the height of the Mexican muralist movement they established successful careers as easel painters and created work that has become an integral part of Mexican modernism Although the iconic Kahlo is now more famous the two artists had comparable reputations during their lives Both were regularly included in major exhibitions of Mexican art and they were invariably the only women chosen for the most important professional activities and honors In a deeply informed study that prioritizes critical analysis over biographical interpretation Nancy Deffebach places Kahlo's and Izquierdo's oeuvres in their cultural context examining the ways in which the artists participated in the national and artistic discourses of postrevolutionary Mexico Through iconographic analysis of paintings and themes within each artist's oeuvre Deffebach discusses how the artists engaged intellectually with the issues and ideas of their era especially Mexican national identity and the role of women in society In a time when Mexican artistic and national discourses associated the nation with masculinity Izquierdo and Kahlo created images of women that deconstructed gender roles critiqued the status quo and presented more empowering alternatives for women Deffebach demonstrates that paradoxically Kahlo and Izquierdo became the most successful Mexican women artists of the modernist period while most directly challenging the prevailing ideas about gender and what constitutes important art

*A Handbook of Latinx Art* Rocío Aranda-Alvarado, Deborah Cullen-Morales, 2025. A curated selection of key texts and artists' voices exploring US Latinx art and art history from the 1960s to the present. *A Handbook of Latinx Art* is the first anthology to explore the rich, deep, and often overlooked contributions that Latinx artists have made to art in the United States. Drawn from wide-ranging sources, this volume includes texts by artists, critics, and scholars from the 1960s to the present that reflect the diversity of the Latinx experience across the nation, from the West Coast and the Mexican border to New York, Miami, and the Midwest. The anthology features essential writings by Mexican, American, Puerto Rican, Cuban, American, Dominican, American, and Central American artists to highlight how visionaries of diverse immigrant groups negotiate issues of participation and belonging, material style, and community in their own voices. These intersectional essays cut across region, gender, race, and class to lay out a complex, emerging field that reckons with different histories, geographies, and political engagements, and ultimately underscores the importance of Latinx artists to the history of American art.

**Art and Revolution in Latin America, 1910-1990** David Craven, 2006-01-01. In this uniquely wide-ranging book, David Craven investigates the extraordinary impact of three Latin American revolutions on the visual arts and on cultural policy. The three great upheavals in Mexico (1910-40), in Cuba (1959-89), and in Nicaragua (1979-90) were defining moments in twentieth-century life in the Americas. Craven discusses the structural logic of each movement's artistic project, by whom, how, and for whom artworks were produced, and assesses their legacies. In each case, he demonstrates how the consequences of the revolution reverberated in the arts and cultures far beyond national borders. The book not only examines specific artworks originating from each revolution's attempt to deal with the challenge of socializing the arts, but also the engagement of the working classes in Mexico, Cuba, and Nicaragua with a tradition of the fine arts made newly accessible through social transformation. Craven considers how each revolution dealt with the pressing problem of creating a dialogical art, one that reconfigures the

existing artistic resource rather than one that just reproduces a populist art to keep things as they were In addition the author charts the impact on the revolutionary processes of theories of art and education articulated by such thinkers as John Dewey and Paulo Freire The book provides a fascinating new view of the Latin American revolutionaries from artists to political leaders who defined art as a fundamental force for the transformation of society and who bequeathed new ways of thinking about the relations among art ideology and class within a revolutionary process
