political agencies were heavily invested in creating a unified national identity in an attempt to merge the previously fragmented populace as a result of the Revolution. The commercial medium of film became an important tool to acquaint a diverse urban audience with the nuances of Mexican national identity and music played an essential and persuasive role in the process. In this heterogeneous environment, cinema and its music continuously reshaped the contested fluctuating space of Mexican identity, functioning both as a sign and symptom of social and political change.

Grande Raymond Jonas, 2024-04-16 Largely forgotten today, the Second Mexican Empire was a transformative nineteenth-century moment. Raymond Jonas explores the conspiracy of European rulers and Mexican conservatives to erect an Old World empire on New World soil. Though quixotic, it was a scheme with a purpose: to contain both Mexican democracy and the rising United States.

Taking Back the Academy! Jim Downs, Jennifer Manion, 2004 This text is both an historical look at activism on campus since the 1960s and an exploration of the ways in which the historian's craft leads to social change. The Politics of Telecommunications In Mexico J. Clifton, 2015-12-22 This text argues that instead of leading toward greater democratization, Mexico's policies of privatization in the 1980s were used for personal benefit and to lubricate the existing state-labour relationship. It builds its case around the privatization of Mexico's telecommunications.

Peasants, Politics, and the Formation of Mexico's National State Peter F. Guardino, 1996 This is a study of the important but little-understood role of peasants in the formation of the Mexican national state from the end of the colonial era to the beginning of La Reforma, a moment in which liberalism became dominant in Mexican political culture. The book shows how Mexico's national political system was formed through local struggles and alliances that deeply involved elements of Mexico's impoverished rural masses, notably the peasants who took part in many of the local, regional, and national rebellions that characterized early nineteenth-century politics. These rebellions were not battles over whether or not there was to be a state; they were contests over what the state was to be. The author focuses on the region of Guerrero, whose peasantry were deeply involved in the two most important broadly-based revolts of the early nineteenth century: the War of Independence of 1810-21 and the 1853-55 Revolution of Ayutla, the rebellion that began La Reforma. The book's central contention is that there are fundamental links between state formation, elite politics, popular protest, and the construction of Mexico's modern political culture. Various elite groups advanced different models of the state, which in turn had different implications for and impacts on the lives of Mexico's lower classes. Contesting elites formed alliances with segments of Mexico's peasantry as well as the urban poor, and these alliances were crucial in determining national political outcomes. Thus, the

participation of wide sectors of the population in politics for varying reasons and the subsequent learning of tactics and elaborations of discourse left an enduring mark on Mexico's political system and culture

Mexicans at Arms Pedro Santi, 1996 The decades that followed independence from Spain in 1821 transformed Mexico from a strong stable colony to a republic suffering from economic decline political turmoil regional divisions and class hatred This chaotic state hindered efforts of the young republic to meet the aggressive expansionism of the United States between 1845 and 1848 Pedro Santi sheds new light on Mexican political history during the conflict a much neglected subject through a comprehensive examination of the only Mexican political bloc that wanted war with the United States Led by Valentin Gomez Farias this faction was the radical federalists who in 1846 took the name of *puros* Santi demonstrates the reasons for the failure of the *puros* efforts to gain political power and coordinate the war effort Examining the *puros* attempts to reestablish federalism in Mexico shape public opinion develop a civic militia and forge alliances with senior army officers and opposing political groups Santi maintains that the economic social and political troubles of Mexico nullified the *puros* endeavors to direct armed resistance against the Americans He also dispels some of the erroneous notions that the *puros* and Gomez Farias were self serving and corrupt and sold out Mexico to the United States for example that have been propagated by historians in the past

Angeles Mastretta Jane Elizabeth Lavery, 2005 The first major study on the works of the Mexican novelist Angeles Mastretta demonstrating the rich complexity and range of the author's fiction and essays The Mexican novelist Angeles Mastretta b 1949 has only recently received serious critical attention largely because her work has been seen as popular and therefore inappropriate for academic study This first major work to be published on Mastretta seeks to demonstrate the rich complexity and range of the author's fiction and essays In the tradition of Post Boom Latin American women's writing Mastretta's texts are motivated by a desire to speak primarily of the silenced experiences and voices of women Two of her novels referential and testimonial in style can be placed within the Mexican Revolutionary Novel tradition and explore the Revolutionary period and its consequences in the light of female experiences and perspectives The hitherto unexplored themes of female sexuality and bodily erotics in Mastretta's texts are also considered in this volume Her feminist works avoid facile simplifications heterogeneous and dialogical they interweave the historical and the fictional the everyday and the fantastic The originality of Mastretta's writing lies in its elusive postmodern ambiguities shimmering surfaces are often interrupted by unexpected depths and proliferating meanings cannot be fully circumscribed by critical analysis Jane Elizabeth Lavery lectures in Latin American Studies at the University of Kent

Forging Mexico, 1821-1835 Timothy E.

Anna, 2001-09-01 No struggle has been more contentious or of longer duration in Mexican national history than that between a centripetal power in the capital and the centrifugal federalism of the Mexican states Much as they do in the United States such tensions still endure in Mexico despite the centralising effect of the Mexican Revolution of 1910 20 Timothy E Anna turns his attention upon the crucial postindependence period of 1821 35 to understand both the theoretical and the practical causes of the development of this polarity He attempts to determine how much influence can be ascribed to such causes as the model of the United States the effect of European thinkers and the shifting self interest of various leaders and groups in Mexican society The result is a nuanced and thoughtful analysis of the development of one of the defining characteristics of the Mexican nation regional power and sovereignty of the state Forging Mexico 1821 1835 is a study both of the political history of the first republic and of the struggle to forge nationhood Timothy E Anna is Distinguished Professor of History at the University of Manitoba His books include The Fall of the Royal Government in Mexico City and The Mexican Empire of Iturbide

The University System and Economic Development in Mexico Since 1929 David Lorey, 1993-11-01 For decades Mexican leaders and scholars as well as outside observers have spoken of a Mexican university system in crisis expressing concern over student political activism and violence declining quality of instruction and facilities crowded campuses and lack of employment for graduates When the government harshly suppressed a student movement in 1968 world attention focused on the turmoil that was endemic in university life During the severe economic slump of the 1980s the fundamental weaknesses of the Mexican economy its inefficiency and inability to compete in the world were often attributed to failings of the university system Using original quantitative data on the graduates of all Mexican universities in a dozen major professional fields since 1929 the author explores the nature of this purported crisis by examining a series of questions about the Mexican university system How have the changing policy priorities of the Mexican government affected the university's education of professionals How have the Mexican economy's needs for professionals shaped the functioning of the university system Has Mexico trained enough professionals Have they been trained in the right fields Has the university been able to respond to demands for upward mobility through higher education The author's detailed analysis reveals a paradox to the extent that Mexican universities may not be producing the kinds of expertise needed for competing in the new global marketplace that educational quality has declined gradually over time and that the university has not contributed much to social mobility one may indeed speak of a crisis Yet because the university system has reached its present form in response to demands placed on it by government the economy and society responding pragmatically to circumstances beyond its control the author concludes that the crisis is not fundamentally a university crisis but rather one that lies in Mexican economy and society at large
