Mhc Vol 1 Antigen Processing And Presentation:

Antigen Processing and Presentation Protocols Joyce C. Solheim,2007-10-26 Antigen processing and presentation as a field explores a broad range of protein interactions and functions both intracellular in the cytoplasm and in the endoplasmic reticulum and at the cell surface between T cells and MHC molecules To investigate such a diverse array it is necessary that biochemical cell biology and immunological techniques all be employed The purpose of Antigen Processing and Presentation Protocols is therefore to detail the most up to date techniques being used in this burgeoning field Such techniques include those used to question how MHC binding peptides are generated to test how peptides are delivered to MHC molecules to analyze MHC peptide binding patterns and to assay the T cell response to MHC peptide Antigen Processing and Presentation Protocols should aid both those new and those experienced in this area of research in extending the questions that can be asked and answered by the application of these current methods For editorial assistance I would like to thank Angela Beninga and Rachael Turnquist

Translational Autoimmunity, Volume 1 Nima Rezaei,2021-10-22 Translational Autoimmunity Etiology of Autoimmune Diseases is the first volume of the Translational Immunology book series To attain its purpose as a detailed translational step to tackle autoimmunity this volume sufficiently addresses basic questions on how the immune system is designed to distinguish self from nonself It discusses the known mechanisms that lead to the maintenance of self tolerance presents potential triggers and malfunctions that impede normal immune processes and demonstrates how the immune system induces an autoreactive state that results in the recognition of self antigens seen in autoimmune conditions Includes coverage of basic immunology the clinical aspects of autoimmunity and translational immunology studies in autoimmunity Presents key concepts supported by a systematic appraisal of the most recent evidence Assists students at all the academic levels while also being applicable to scientists who work with autoimmunity Designed for learning teaching review testing practice and research
