Biology of the Mouse Histocompatibility-2 Complex J. de Klein, 2012-12-06 Somewhere I heard a story of a bridge and a painter The bridge was enormous and was made all of metal and the painter's job was to keep it from rusting He would start at one end and slowly proceed day by day month by month toward the other end painting the bridge But no sooner would he finish with the painting than the bridge would begin to rust again The rust too would start at one end and slowly proceed toward the other end systematically destroying the painter's endeavor And so the painter would return to where he had started and begin painting again slowly proceeding toward the other end of the bridge always just one step ahead of the rust And if the story is true the painter might still be painting that bridge a modern Sisyphus During the writing of this book the story of the painter and his bridge kept coming to mind The field the book covers has been developing so rapidly that like the painter I too had to return to where I had started and fight the rust of obsolescence But unlike the painter I had a deadline to meet which constituted a point of no return And so sending off this manuscript I have no choice but to watch the fruits of my endeavor be overtaken by the rust

Mouse Models of Human Cancer Eric C. Holland, 2004-08-27 Mice have become the species of choice for modeling the complex interactions between tumor cells and the host environment Mouse genetics are easily manipulated and a growing array of technology exists for this purpose Mouse models allow investigators to better understand causal relationships between specific genetic alterations and tumors utilize new imaging techniques and test novel therapies Recent developments along these lines show great promise for the development of new anti cancer treatments Mouse Models of Human Cancer provides researchers and students with a complete resource on the subject systematically presenting the principles methodologies applications and challenges

associated with this exciting field Offering a survey of the latest research and a description of future areas of interest this text Presents real experimental data Describes organ site specific mouse models Clearly identifies suitable models for further drug testing Critically analyzes current methodologies and their limitations Features numerous recognizable expert contributors Lists key Web sites reagents and companies From mouse handling and genetic engineering to preclinical trials Mouse Models of Human Cancer is a comprehensive guide to using these models and relating them to human disease Its uniform presentation describes organ specific models in clinical imaging and molecular terms and lays out the relevant genetics experimental approaches histological comparisons with human disease and conclusions Combining stellar chapter authors rich illustrations and clear up to date coverage Mouse Models of Human Cancer is an invaluable resource for advanced students and cutting edge researchers
