Hollywood Presents Jules Verne Brian Taves, 2015-05-26 An illuminating look at how filmmakers have taken us around the world under the sea and to the center of the earth over the course of a century Milwaukee Express Even for those who have never read Jules Verne the author's very name conjures visions of the submarine in Twenty Thousand Leagues Under the Sea the epic race in Around the World in Eighty Days the spacecraft in From the Earth to the Moon and the daring descent in Journey to the Center of the Earth One of the most widely translated authors of all time Verne has inspired filmmakers since the early silent period and continues to fascinate audiences more than a century after his works were first published His riveting plots and vivid descriptions easily transform into compelling scripts and dramatic visual compositions In Hollywood Presents Jules Verne Brian Taves investigates the indelible mark that the author has left on English language cinema Adaptations of Verne's tales have taken many forms early movie shorts serials feature films miniseries and television shows and have been produced as both animated and live action films Taves illuminates how as these stories have been made and remade over the years each new adaptation looks back not only to Verne's words but also to previous screen incarnations He also examines how generations of actors have portrayed iconic characters such as Phileas Fogg and Captain Nemo and how these figures are treated in pastiches such as Journey 2 The Mysterious Island Investigating the biggest box office hits as well as lower budget productions this comprehensive study will appeal not only to fans of the writer's work but also to readers interested in the ever changing relationship between literature theater and film

The Future Revisited Francoise Schiltz, 2012-05-04 The Future Revisited examines Hollywood adaptations of Jules Verne stories and is an interdisciplinary study that offers a fresh perspective on film history French literature science fiction and America in the 1950s It is a fascinating and authoritative account of how the stories of Jules Verne a distinguished French novelist better known around the world as the father of science fiction and an accurate predictor of much of the twentieth century found particular resonance with US filmmakers in the 1950s Schiltz looks at four of the most popular films Around the World in 80 Days 20 000 Leagues Under the Sea Journey to the Center of the Earth and Mysterious Island and argues that there were many parallels between Verne's technological adventures and postwar America with its theme parks shopping malls Levittowns and plethora of consumer goods Just as nineteenth century readers of Verne's

books could experience travel from the comfort of their seats viewers of these films could be swept away on an imaginary flight a voyage in a submarine or a trek to the earth's core all in spectacular widescreen and with ground breaking special effects Yet the pleasures offered were ambivalent encounters with exotic places and cultures might have led the audience to question common assumptions such as gender roles seeing futuristic domestic spaces could highlight the confusion of attitudes to private and public life in suburbia and the films blending of nostalgia and progress might draw attention to society's tug of war between innovation and conformity
