Nurses Under Stress:

Nurses Under Stress Sharol F. Jacobson, H. Marie McGrath, 1983 **Mental Health in Healthcare Workers and its Associations with Psychosocial Work Conditions** Juan Jesús García-Iglesias, Murat Yildirim, Juan Gómez-Salgado, Yong Shian Shawn Goh, 2024-04-11 The work environment can be considered one of the main determining factors that can influence the mental health of workers especially as it regards the structural and organizational conditions to which the worker is subjected This work environment has positive effects when work provides satisfaction and well being or negative effects provoked by situations of stress inadequate working patterns and schedules possible situations of abuse and or harassment etc which may contribute to the appearance of alterations in the mental health of the worker *Work in the 21st Century* Frank J. Landy, Jeffrey M. Conte, 2010 The workplace in the 21st century is technological and multi cultural Work is often accomplished in teams This work provides students with an up to date knowledge based that will enable them to apply the principles of I O psychology to themselves supervisors subordinates and fellow workers **Stress and Coping in Nursing** Roy D. Bailey, Margaret Clarke, 2013-11-11 Increasingly stress as a concept is being used as an explanation of a wide variety of negative phenomena which are experienced by all people but which include nurses in particular and their patients Nursing has been identified as a high stress profession and one can hardly pick up a nursing journal or even read a newspaper article about nursing without finding the word stress used liberally Examples of its use are found in relation to sickness absence rates high level of nursing staff turnover discontent in nursing the effects of unemployment the effects of overwork having too much responsibility having too little responsibility or control the effects of constantly giving emotionally to others the causes of illness the effects of going into hospital delayed healing anxiety depression and alcoholism Given the heterogeneous nature of these phenomena some of which are the diametric opposite of others and that they are clearly being attributed to the one concept stress then that concept must necessarily be of importance within people s lives Or is it perhaps just a fashionable global but ultimately empty explanation Roy Bailey and I believe that stress is an extremely important concept Indeed we would argue that it is a meta concept rather than a concept which does indeed serve to explain many disparate phenomena **Encyclopedia of Nursing Research** Joyce J. Fitzpatrick, Meredith Wallace (PhD, RN.), 2006 From the world OCOs leading authorities in nursing research this thoroughly updated 2nd Edition of the Encyclopedia of Nursing Research presents key terms and concepts in nursing research comprehensively explained by over 200 expert contributors **Emotional functioning and post-traumatic outcomes in the aftermath of a traumatic event** Marialaura Di Tella, Lorys Castelli, Annunziata Romeo, 2023-01-31 *Stress, Burnout, and Addiction in the Nursing Profession* Herbert R. Warner Ph.D, 2014-03 This book is about the most common issues that confront a nurse on a daily basis It can cause him or her heartaches heartbreaks and heart troubles Stress is by far in my opinion a leading cause of heart problems sickness and depression in this country In this book I talk about awareness in our hospitals clinics and emergency

departments Everyone should feel comfortable and be confident of the nurse treating you or your loved ones we must also remember that nurses are also human beings with issues and problems like everyone else in this world This book is also a valuable asset to any nursing student considering going to nursing school or college to study medicine
