Liminality in Tourism Robert S. Bristow, Ian Jenkins, 2021-09-05 Liminality is not typically associated with tourism even though it can be viewed as an intrinsic element of the social cultural experiences of tourism Liminality in Tourism Spatial and Temporal Considerations aims to build upon the tradition of liminality as expounded in social and anthropological disciplines elaborating on the theoretical principles and concepts found within certain aspects of the tourist

journey and tourist product The emergence of post modern society has impelled a change in the tourist gaze towards a more experiential and adventuresome globalised experience An important aspect of the tourist phenomenon of liminality is where a transformative experience is triggered by entering a liminoid tourist space leaving the tourist permanently psychologically transformed before returning to normalised society The narrative provides a new perspective on the tourist experience with a provocative examination into the multidimensional aspects of tourism by exploring tourism within the spatial and temporal aspects of liminal landscapes Covid 19 has further changed the rubric of tourism Until the current pandemic tourism has basically been a fun experience In a post pandemic world however the tourist is now facing an unknown future which will almost certainly affect tourism liminality This book presents the reader with a wealth of examples and case studies closely illustrating the association between tourism and liminal experiences The geographical perspectives explore the more subconscious outcomes of destination and tourist product consumption The book should be a useful reader to tourism geography where the theory of liminality can be synthesized into tourist experiences The chapters in this book were originally published as a special issue of the journal *Tourism Geographies* *New Wars and New Soldiers* Asst Prof Jessica Wolfendale, Dr Paolo Tripodi, 2013-03-28 Modern conflicts now bear little relation to traditional wars between states The threat of terrorism the creation of new military technologies the rise of private military companies and the increasing involvement of the military in counter terrorism and humanitarian operations all pose challenges to traditional ideas about the ethics of war the relevance of current international law governing armed conflict and Just War theory How then should military ethics approach these new forms of conflict Modern military ethics now includes work from disciplines as diverse as philosophy history sociology international relations politics and psychology This diversity of approaches suggests that the approach to contemporary military ethics that is best suited to understanding the wars of today is a broad multidisciplinary vision By bringing together contributors from philosophy international relations security studies and strategic studies this volume offers just such an interdisciplinary analysis The chapters in this volume explore the ethical issues posed by recent developments in both the nature and conduct of war as well as focusing on the role and needs of modern military personnel This comprehensive approach allows the reader to see the broad scope of modern military ethics and to understand the numerous questions about modern conflict that require critical scrutiny Aimed at both military and academic audiences this volume will be of significant interest to researchers and students in philosophy sociology military and strategic studies international relations politics and security studies **Framing the Rhetoric of a Leader** M. Degani, 2015-01-04 Based on a selection of 30 election campaign speeches during Obama's first run for the American presidency in 2008 this book investigates the Democratic presidential candidate's much celebrated rhetoric from a cognitive semantics point of view [Nine Commentaries on the Communist Party](#), 2015-02-04 [Nine Commentaries on the Communist Party](#) was published amidst one of Chinese Communist Party's most brutal persecution against the 100 million practitioners of Falun Gong in

China When loved ones and witnesses see innocent meditators behind bars tortured and harvested for their organs it is hard to stand on the sideline That is why so many Chinese people and those sympathetic to the cause are doing one thing they know they can do Spread the word quit the Party Personality, Identity, and Character Darcia Narváez, Daniel K. Lapsley, 2009-06-29 This edited volume features cutting edge work in moral psychology by pre eminent scholars in moral self identity moral character and moral personality **Nine Commentaries on the Communist Party** The Epoch Group, 2004 This groundbreaking book is systematically dismantling the Chinese Communist Party CCP It is a final verdict on the CCP that has been rapidly spreading in China During the CCP s 80 year history its lies dictatorship various political movements and crackdowns have wreaked unprecedented havoc on the land of China and caused irreversible damage to China s traditional moral values In today s China under the CCP s violent and despotic rule social tensions are dangerously high and crises are appearing in succession The Chinese communist regime is seated on an active volcano that may erupt at any moment The Nine Commentaries have posed the greatest challenge to the CCP s ideology since the party was established The book has struck a chord deep in the hearts of many Chinese people in China and around the world It is poised to be a major part in the rebirth of the nation s soul *Dialogue and the New Cosmopolitanism* Fred Dallmayr, 2022-11-28 Dialogue and the New Cosmopolitanism Conversations with Edward Demenchonok stands in opposition to the doctrine that might makes right and that the purpose of politics is to establish domination over others rather than justice and the good life for all In the pursuit of the latter goal the book stresses the importance of dialogue with participants who take seriously the views and interests of others and who seek to reach a fair solution In this sense the book supports the idea of cosmopolitanism which by contrast to empire involves multi lateral cooperation and thus the quest for a just cosmopolis The international contributors to this volume with their varied perspectives are all committed to this same quest Edited by Fred Dallmayr the chapters take the form of conversations with Edward Demenchonok a well known practitioner of international and cross cultural philosophy The conversations are structured in parts that stress the philosophical anthropological cultural and ethical dimensions of global dialogue In our conflicted world it is inspiring to find so many authors from different places agreeing on a shared vision **Handbook of Moral and Character Education** Larry Nucci, Darcia Narvaez, 2014-04-24 There is widespread agreement that schools should contribute to the moral development and character formation of their students In fact 80% of US states currently have mandates regarding character education However the pervasiveness of the support for moral and character education masks a high degree of controversy surrounding its meaning and methods The purpose of this handbook is to supplant the prevalent ideological rhetoric of the field with a comprehensive research oriented volume that both describes the extensive changes that have occurred over the last fifteen years and points forward to the future Now in its second edition this book includes the latest applications of developmental and cognitive psychology to moral and character education from preschool to college settings and much more Cognition, Literature, and History

Mark J. Bruhn, Donald R. Wehrs, 2013-11-26 *Cognition Literature and History* models the ways in which cognitive and literary studies may collaborate and thereby mutually advance. It shows how understanding of underlying structures of mind can productively inform literary analysis and historical inquiry and how formal and historical analysis of distinctive literary works can reciprocally enrich our understanding of those underlying structures. Applying the cognitive neuroscience of categorization, emotion, figurative thinking, narrativity, self-awareness, theory of mind, and wayfinding to the study of literary works and genres from diverse historical periods and cultures, the authors argue that literary experience proceeds from qualitatively heightens and selectively informs and even reforms our evolved and embodied capacities for thought and feeling. This volume investigates and locates the complex intersections of cognition, literature, and history in order to advance interdisciplinary discussion and research in poetics, literary history, and cognitive science.
