Dietary Fiber David Kritchevsky, Charles T. Bonfield, James W. Anderson, 2012-12-06 Twenty years ago the very idea of an international conference on the fiber contained in plant food would have been totally inconceivable At that time fiber was generally viewed as an inert component of food of no nutritional value and consequently considered as a contaminant the removal of which would enhance the purity of a product It was measured by a now obsolete and almost worthless test introduced in the last century for veterinary rather than human nutrition and what was measured was referred to as crude fiber containing part of the cellulose and lignin but none of the numerous components of fiber now known to play important roles in the maintenance of health There were a few lone voices prior to the last two decades who had extolled the laxative properties of the undigested portion of food assuming that these were related to its irritant action on the bowel mucosa In retrospect this was a total misconception and softage would have been a more appropriate term than roughage since its presence insured soft not irritating colon content [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.),

Brain maturation and cognitive development Kathleen R. Gibson, Anne C. Petersen, Originally published in 1991 by Aldine De Gruyter **Brain Maturation and Cognitive Development** Anne Petersen, 2017-09-29 This volume adopts a unique multidisciplinary approach to the study of the development of the human brain and early behavior It includes chapters by researchers from several disciplines whose work addresses specific aspects of brain

behavioral interactions in development The chapters provide strong evidence that the development of both brain and behavior is a response to biological and environmental variations Language is also discussed and provides a useful example of biosocial development because linguistic and brain functions and development can be examined under controlled conditions of both genetic and environmental deprivation Research in this area has produced particularly exciting results pointing to the universality of language capacity among humans and illuminating the processes by which language competence develops Brain Maturation and Cognitive Development provides new views in the understanding of human nature and present new biosocially oriented research directions that are unique in their focus Millet's Healthy & Food Security in India Prof. P.Jayalakshmi,2023-05-01

Historically the amino acid tryptophan has been considered to play a role in cancer development and the aging process In recent times this nutrient has been associated with eosinophilia myalgia syndrome a new human disease that attacks the muscular system This detailed book examines the implications of the large measure of fresh information **ga Essential Nutrients in Carcinogenesis** Lionel A. Poirier,2012-12-06 For more than 50 years it has been recognized that diet influences cancer formation both in humans and in experimental animals In fact early investigators successfully retarded the onset of tumors in animals by dietary manipulation Such findings led to an early optimism that cancer would prove to be yet another disease resulting from dietary imbalances and might thus be amenable to prevention or cure by appropriate nutritional changes Subsequent studies showed that the influence of diet on cancer formation was not only very complex it also did not appear to play a direct causative role in carcinogenesis Thus during the mid 1950s scientific interest in diet and cancer greatly waned By the early 1970s however a resurging interest in diet and cancer became evident This field of activity has continued to grow Yet for over 20 years no comprehensive meeting has been held to summarize the major developments concerning dietary modification of carcinogenesis over a broad range of essential nutrients To fill this void a workshop was held on the role of essential nutrients in carcinogenesis from January 30 to February 1 1985 in Bethesda Maryland under the auspices of the National Cancer Institute This volume is a compilation of the presentations made at that meeting **Connective Tissue Disease**
