The Invention of International Order Glenda Sluga,2025-01-28 The story of the women financiers and other unsung figures who helped to shape the post Napoleonic global order In 1814 after decades of continental conflict an alliance of European empires captured Paris and exiled Napoleon Bonaparte defeating French military expansionism and establishing the Concert of Europe This new coalition planted the seeds for today s international order

wedding the idea of a durable peace to multilateralism diplomacy philanthropy and rights and making Europe its center Glenda Sluga reveals how at the end of the Napoleonic wars new conceptions of the politics between states were the work not only of European statesmen but also of politically ambitious aristocratic and bourgeois men and women who seized the moment at an extraordinary crossroads in history In this panoramic book Sluga reinvents the study of international politics its limitations and its potential She offers multifaceted portraits of the leading statesmen of the age such as Tsar Alexander Count Metternich and Viscount Castlereagh showing how they operated in the context of social networks often presided over by influential women even as they entrenched politics as a masculine endeavor In this history figures such as Madame de Staël and Countess Dorothea Lieven insist on shaping the political transformations underway while bankers influence economic developments and their families agitate for Jewish rights Monumental in scope this groundbreaking book chronicles the European women and men who embraced the promise of a new kind of politics in the aftermath of the Napoleonic wars and whose often paradoxical contributions to modern diplomacy and international politics still resonate today **Riches, Class, and Power** Edward Pessen, 2017-07-12 Until publication of *Riches, Classes and Power* Alexis de Tocqueville's vision of the United States as a generally egalitarian nation predominated While historians might quarrel about the social sources of egalitarianism they did not dispute the soundness of the basic model and Tocqueville's vision clearly dominated American's sense of itself as well A self acknowledged congenital skeptic Pessen decided to find out whether the facts of American life sustained Tocqueville's conclusions *Riches, Class and Power* represents more than five years intensive research on the wealth family backgrounds careers marriages residential patterns uses of leisure life styles social standing and influence and power of the wealthy in four of the five largest cities in the United States before the Civil War Pessen examines New York City Philadelphia Boston and the then separate city of Brooklyn in the 1820s and 1840s His claim is that the massive evidence on urban life of the time sharply refutes Tocqueville's thesis A National Book Award finalist for history *Riches, Class and Power* undoubtedly helped reshape America before the Civil War In his reintroduction to this paperback edition Pessen reviews the critical reaction and reconsiders the extent to which its findings are applicable to the social structure of small or frontier towns of the period He discusses whether unequal distribution of wealth in America results more from changes in historical circumstance or to shifts in demographic or age structure *Transatlantic Finance in the Age of Revolutions* Mark Edward Hay, 2024 This book examines the role of the Hope and Baring banking houses in financing the Louisiana Purchase during the Age of Revolutions It analyzes how international finance navigated this tumultuous period focusing on changes in the Amsterdam market for government lending and the shift of financial power to London The study uses primary sources to trace the financial transactions and diplomatic negotiations involved in the sale and purchase of Louisiana The author aims to provide insights into the historical context of international finance making the work accessible to both academic audiences and general readers interested in economic history **A Concise History of International Finance** Larry

Neal,2015-10-22 Ever since the financial crisis of 2008 doubts have been raised about the future of capitalism In this broad ranging survey of financial capitalism from antiquity to the present Larry Neal reveals the ways in which the financial innovations throughout history have increased trade and prosperity as well as improving standards of living These innovations have however all too often led to financial crises as a result of the failure of effective coordination among banks capital markets and governments The book examines this key interrelationship between financial innovation government regulation and financial crises across three thousand years showing through past successes and failures the key factors that underpin any successful recovery and sustain economic growth The result is both an essential introduction to financial capitalism and also a series of workable solutions that will help both to preserve the gains we have already achieved and to mitigate the dangers of future crises

Female Beauty Systems Christine Adams,Tracy Adams,2015-09-04 Female beauty systems everywhere are complex integrating markers of class status power and sexuality to perform the fundamental function of sorting individuals into categories of more or less desirable Heirs to the tradition of courtly love modern western female beauty systems tend to share the norm of man as pursuer woman as pursued having developed around the trope of the madly desiring poet or knight supplicating his aloof and lovely lady for her favor The apparent longevity of the courtly love tradition raises the question of whether the way in which it structures male desire in reaction to female beauty is part of a universal tendency an evolutionary adaptation despite clear evidence that female beauty systems are also in fact socially constructed and reflect enormous ambivalence about the power and performance of beauty Although modern western female beauty systems are routinely demystified and contested today the purveyors of culture that support them institutional intellectual artistic commercial and popular continue as they always have to construe women as objects of male desire Still within this basic structure the systems have varied greatly across time and space with women using beauty as a form of social capital in widely differing ways Moreover as individuals have begun to experience their bodies as malleable and endlessly transformable rather than unruly and unyielding many have begun to experience beauty less as a given and more as a project The nine essays collected here examine a number of different Western female beauty systems over the centuries considering how women have complied with contributed to profited or suffered from and resisted them
