Watermarks Leslie A. Geddes, 2020-08-25 An exploration of depictions and use of water within Renaissance Italy and especially in the work of polymath Leonardo da Vinci Both a practical necessity and a powerful symbol water presents one of the most challenging problems in visual art due to its formlessness clarity and mutability In Renaissance Italy it was a nearly inexhaustible subject of inquiry for artists engineers and architects alike it represented an element to be productively harnessed and a force of untamed nature Watermarks places the depiction and use of water within an intellectual history of early modern Italy examining the parallel technological and aesthetic challenges of mastering water and the scientific and artistic practices that emerged in response to them Focusing primarily on the wide ranging work of Leonardo da Vinci 1452 1519 at once an artist scientist and inventor Leslie Geddes shows how the deployment of artistic media such as ink and watercolor closely correlated with the engineering challenges of controlling water in the natural world For da Vinci and his peers she argues drawing was an essential form of visual thinking Geddes analyses a wide range of da Vinci s subject matter including machine drawings water management schemes and depictions of the natural landscape and demonstrates how drawing as an intellectual practice a form of scientific investigation and a visual representation constituted a distinct mode of problem solving integral to his understanding of the natural environment Throughout Geddes draws important connections between works by da Vinci that have long been overlooked the artistic and engineering practices of his day and critical questions about the nature of seeing and depicting the almost unseeable during the early modern period

Environment and Philosophy Emily Brady, with Jane Howarth, Vernon Pratt, 2005-07-26 Environment and Philosophy provides an accessible introduction to the radical challenges that environmentalism poses to concepts that have become almost second nature in the modern world These include the ideas of science and objectivity the conventional placement of the human being within the environment the individualism of conventional Modern thought Written in an accessible way for those without a background in philosophy this text examines ways of thinking about ourselves nature and our relationship with nature It offers an introduction to the phenomenological perspective on environmental issues and also to the questions of what natural beauty is

Modern Theories of Art: From Winckelmann to Baudelaire

Moshe Barasch, 1990-02 Annotation In this volume the third in his classic series of texts surveying the history of art theory Moshe Barasch traces the hidden patterns and interlocking themes in the study of art from Impressionism to Abstract Art Barasch details the immense social changes in the creation presentation and reception of art which have set the history of art theory on a vertiginous new course the decreased relevance of workshops and art schools the replacement of the treatise by the critical review and the interrelation of new modes of scientific inquiry with artistic theory and praxis The consequent changes in the ways in which critics as well as artists conceptualized paintings and sculptures were radical marked by an obsession with intense immediate sensory experiences psychological reflection on the effects of art and a magnetic pull to the exotic and alien making for the most exciting and fertile period in the history of art criticism American Journal of Archaeology, 1922

Ruskin (Routledge Revivals)

George P. Landow, 2015-06-11 Ruskin the great Victorian critics of art and society had an enormous influence on his age and our own A highly successful propagandist for the arts he did much both to popularize high art and to bring it to the masses A brilliant theorist and practical critics of realism he also produced the finest nineteenth century discussions of fantasy the grotesque and pictorial symbolism Most who have written about this outstanding Victorian polymath have approached him either as literary critics or as art historians In this book which was first published in 1985 George P Landow provides a more balanced view and offers a strikingly new approach which reveals that Ruskin wrote throughout his career as an interpreter an exegete His interpretations covered many fields of human experience and endeavour not only paintings poems and buildings but also contemporary social issues such as the discontent of the working classes Strategic Sustainability

Daniel Fogel, 2016-03-22 Strategic Sustainability examines how organizations can implement environmental sustainability science theories and ways of thinking to become more competitive Including examples and ideas implemented in various countries it is based on known scientific principles about the natural world and organizational principles focusing on the work domain The intersection of these two realms of research creates a powerful and new approach to comprehensive seemingly contradictory issues Daniel S Fogel draws from disparate fields and creates a story about organizations their future and how people are part of the problem and more importantly part of the solution Readers will find ways to take action to improve organizations and avoid denigrating our natural environment learning to be mindful of the urgency we should feel to improve our impact on the world The focus on the natural environment provides a powerful focus for creating value in organizations and addressing the major challenges we all face Advanced sustainability students working professionals and board members managers and legislators responsible for governing organizations or implementing public policy will find this book useful A companion website features an instructor s manual with test questions as well as 38 10 minute videos for classroom use *Architectural and Engineering Research and Practice*

Transmedial Landscapes and

Modern Chinese Painting Juliane Noth, 2023-11-20 Chinese ink painters of the Republican period 1911-1949 creatively engaged with a range of art forms in addition to ink such as oil painting, drawing, photography and woodblock prints. They transformed their medium of choice in innovative ways, reinterpreting both its history and its theoretical foundations. Juliane Noth offers a new understanding of these compelling experiments in Chinese painting by studying them as transmedial practice at once shaped by and integral to the modern global art world. *Transmedial Landscapes and Modern Chinese Painting* shines a spotlight on the mid-1930s, a period of intense productivity in which Chinese artists created an enormous number of artworks and theoretical texts. The book focuses on the works of three seminal artists: Huang Binhong, He Tianjian, and Yu Jianhua, facilitating fresh insights into this formative stage of their careers and into their collaborations in artworks and publications. In a nuanced reading of paintings, photographs, and literary and theoretical texts, Noth shows how artworks and discussions about the future of ink painting were intimately linked to the reshaping of the country through infrastructure development and tourism, thus leading to the creation of a uniquely modern Chinese landscape imagery. **Art and**

Asal HOJJATİ, İlkay ÖZDEMİR, Didem Güneş YILMAZ, Kamuran KARAAĞAÇ, Gonca BÜYÜKMIHÇI, Ayşegül AKŞEHİRLİOĞLU, 2022-12-25 *Art and Architecture Theory Practice and Experience* Livre de Lyon *Sustainable Resilient Built Environments* Rama Devi Nandineni, Susan Ang, Norwina Binti Mohd Nawawi, 2024-07-05 The proceedings of Sustainable Resilient Built Environments are based on the SRBE 2022 conference held in December 2022. It focuses on the advances under the overarching theme of Sustainability. The concept of Sustainability has been conventionally defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs. In scientific literature, sustainable development has been analysed using different qualitative approaches such as economic, social, ecological, cultural, institutional, ethical, and political. In this edited volume, the concepts of both sustainability and resilience are considered to open up useful pathways towards achieving sustainable buildings and infrastructure. Though the concepts of sustainability and resilience are considered to help improve the built environment, the interrelations and interdependence between these two concepts are not clearly evident. This has led to the questions such as: Is the sustainable built environment always resilient? Is the resilient built environment always sustainable? What more is needed for sustainability? In exploring these pertinent questions, the proposed edited volume is expected to unveil and disseminate new insights on the themes related to sustainable and resilient built environment. The themes of the proceedings lay a platform for researchers and professionals to integrate the aspects including smart innovation, technologies, green energy, efficiency, carbon reduction, sustainability, and resilience with regard to buildings and other built infrastructure. Specific objectives included as per the five themes are as follows: Environment, Design, and
