Sharing Lives, Dividing Assets Joanna Miles, Rebecca Probert, 2009-08-18 With many couples separating each year the question of how to determine the financial and property consequences of such separation has always been a problem area within family law Should the principles be the same for married and cohabiting couples Should the division of assets reflect the parties own expectations or norms imposed by society These are just two of the questions which the essays in this collection seek to explore Recent cases in the House of Lords have seen willingness on the part of the judges to seek out empirical studies to inform their deliberations but if the law is to engage with empirical data then much more information is needed both about the arrangements people make during their relationships and about the impact of the law when a relationship breaks down This inter disciplinary work brings together leading academics in the fields of law economics sociology and psychology in an attempt to provide some of the missing empirical information Part I sets out the legal framework and identifies the importance of empirical studies for this area Part II examines how couples whether cohabitants or spouses manage their money during their relationships Part III then considers the impact that the law currently has on separating couples examining how legal principles translate into reality and what their consequences are for the parties Finally Part IV considers the issue of legal rationality it may be rational for the law to be shaped by patterns of behaviour but how far will individual couples allow their behaviour to be shaped by the law **Lone**

Motherhood in Twentieth-Century Britain , 1998-05-07 During the 1990s lone mothers reached the top of the political agenda viewed as both a drain on public expenditure and a moral threat What has been missing from the debate is an understanding of how we have got to where we are This timely new study by three leading experts in the field sets out first to investigate the demographics of lone motherhood how the pathways into lone motherhood have changed and whether the changes of the last quarter of a century are as dramatic as they appear Second it looks at the wider context for the changes in lone motherhood in terms of ideas about marriage and the changes in the construction of the never married mother from victim in the 1950s to parasite in the late 1980s Finally it examines the way in which policies have defined the problem of

lone motherhood over time and the way in which lone mothers have been treated with regard to housing social security and employment The study concludes that there is little possibility of putting the genie back in the bottle in terms of reducing the number of lone mothers efforts to do so by reducing public expenditure on them may be effective but at the expense of the children involved Instead the authors urge policy makers to change focus again and pay more attention to investing in children

Developments in National Social Security Legislation European Committee for Social Cohesion, Council of Europe, 2000-01-01 Women, Pensions, and Divorce Andrea Garman, 1996 Family Law, Gender and the State Alison Diduck, Felicity Kaganas, 2012-02-07 The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities Theirs is an important and ambitious book that aims ultimately at a feminist restatement of family law The book is written and referenced in such depth that it is a useful resource for legal as well as social science researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What's more they undersell themselves by describing their book as Text Cases and Materials because they have woven by far the largest proportion of the cases and materials into the text Helen Reece Times Higher Education May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers insights and ideas with broader significance Mary Childs Child and Family Law Quarterly September 2002 The arguments are provocative the analysis is stimulating and the materials amassed strongly support the authors aim to question the axiomatic status of what is traditionally designated as the family Fiona E Raitt Infant and Child Development September 2002 It is not often that one can say of a textbook in Law that it makes interesting reading with quite the enthusiasm that can be expressed for this text This new publication offers something that few textbooks seem to

offer a book you CAN open up virtually anywhere and find an interesting piece on almost any aspect of the broad family law spectrum Penny Booth *The Law Teacher* September 2002 All the major themes in feminist and constructionist perspectives in family law are presented together with a wealth of readings and extensive references As a teaching manual it is excellent a coherent feminist perspective across the entire range of family law Marty Slaughter *Feminist Legal Studies* July 2003

Statistical Policy Division, 1978 *When Marriage Ends* Hans-Jürgen Andreß, Dina Hummelsheim, 2009-01-01 *When Marriage Ends* offers a comprehensive and insightful contribution to the study of economic effects of divorce and it also contributes to the comparative study of family policies and family law regimes in Europe The book can be recommended not only to students and researchers interested in family studies but also to legal and public policy practitioners Jana Chaloupkov *Central European Journal of Public Policy* This is a double faced book which should be read by everybody who is concerned about the societal effects of divorce It shows that divorce has negative economic and social consequences not only in the Anglo Saxon countries but also in the most generous welfare states of Europe where divorce is widely accepted Moreover these effects are more negative for women than for men even in the most gender equalitarian welfare state But it also shows that social policies can mitigate these negative consequences Jaap Dronkers *European University Institute Italy* In recent decades the probability of divorce and separation among married and cohabiting couples has increased significantly in most European countries Focusing on both economic and social aspects this comprehensive volume explores the consequences of partnership dissolution at the individual level The contributors use personal characteristics properties of the partnerships and the institutional context to explain coping behaviours The book comprises reports on eight countries which have tentatively been classified as the male breadwinner Belgium and Germany the dual earner Denmark Finland and Sweden the

market Great Britain and the family model Spain and Greece It also contains four cross national comparative studies addressing the wider impacts of divorce including labour force participation residential mobility and housing household income and poverty and lifestyle deprivation Complemented by the editors authoritative introduction this timely study will prove invaluable to graduate students and researchers interested in the economics and sociology of the family Legal and public policy practitioners will also find the book an insightful addition to the current literature *Compendium of HHS Evaluations and Relevant Other Studies* ,1990 Statistical Reporter ,1978 Statistical Reporter United States. Obligation and Commitment in Family Law Gillian Douglas,2018-04-19 A tension lies at the heart of family law Expressed in the language of rights and duties it seeks to impose enforceable obligations on individuals linked to each other by ties that are usually regarded as based on love or blood Taking a contextual approach that draws on history sociology and social policy as well as law and legal theory this book examines the concept of obligation as it has been developed in family law and the difficulties the law has had in translating it from a theoretical and ideological concept into the basis of enforceable actions and duties Increasingly the idea of commitment has been offered as the key organising principle for the recognition of family relationships often as a means of rebutting claims that family ties are becoming attenuated but the meaning and scope of this concept have not been explored The book traces how the notion of commitment is understood and how far it has come to be used as a rationale for imposing the core legal obligations which underpin care and caring within families **Social Security Research Yearbook** ,1994
