The Doppelgänger Dimitris Vardoulakis, 2010 This book presents literature as the double of philosophy This relation is historically rooted in the genesis of the doppelgänger as literature's response to the philosophical focus on subjectivity the term doppelgänger was coined by the German author Jean Paul in 1796 as a critique of idealism's assertion of subjective autonomy individuality and human agency This critique prefigures late twentieth century extrapolations of the subject as decentered From this perspective the doppelgänger has a family resemblance to current conceptualizations of subjectivity It becomes the emblematic subject of modernity This book examines authors such as Franz Kafka Maurice Blanchot and Alexandros Papadiamantes and philosophers such as Immanuel Kant Walter Benjamin and Jacques Derrida to show how the doppelgänger emerges as a hidden and unexplored element both in conceptions of subjectivity and in philosophy's relation to literature
