Kling, 2009-10-09 95 percent of Americans own some kind of cell phone It has become a tool that people feel lost without when forgotten at home or elsewhere This volume comprehensively covers the origins and evolution of cell phone technology Readers will consider its impact on society and future uses **Free Global Cities** Christian H Kälin, 2025-03-20 This book proposes a new solution to the problem of the migration crisis engulfing the world by creating safe harbours or Free Global Cities In the face of the largest displacement crisis on record even the most optimistic view of the future suggests that in the years ahead more and more people will migrate in order to survive The world requires places where refugees and other migrants forced to leave their homes have the opportunity to work study create start businesses and rebuild new lives for themselves and their families Free Global Cities can deal with this growing global crisis in a completely new way They are autonomous self governed subnational entities that provide a safe environment and rule of law that will create wealth and prosperity for its residents as well as for the nations hosting them Such a model would contribute significantly to handle the largest migration crisis in history which the world will be experiencing in the coming decades Critical Global Perspectives Binaya Subedi, 2010-03-01 The primary purpose of this book is to invite educators to re think what it means to critically conceptualize knowledge about the world In other words imagining curriculum in a critical way means decolonizing mainstream knowledge about global societies Such an approach re evaluates how we have come to know the world and asks us to consider the socio political context in which we have come to understand what constitutes an ethical global imagination A critical reading of the world calls for the need to examine alternative ways of knowing and teaching about the world a pedagogy that recognizes how diverse subjects have come to view the world A critical question this book raises is What are

the radical ways of re conceptualizing curriculum knowledge about global societies so that we can become accountable to the different ways people have come to experience the world Another question the book raises is how do we engage with complexities surrounding social differences such as gender race ethnicity religion etc in the global contexts Analyzing global issues and events through the prism of social difference opens up spaces to advocate a transformative framework for a global education curriculum Transformative in the sense that such a curriculum asks students to challenge stereotypes and engages students in advocating changes within local global contexts A critical global perspective advocates the value of going beyond the nation state centered approach to teaching about topics such as history politics culture etc It calls for the need to develop curriculum that accounts for transnational formations an intervention that asks us to go beyond issues that are confined within national borders Such a practice recognizes the complicated ways the local is connected to the global and vice versa and cautions against creating a hierarchy between national and global issues It also suggests the need to critically examine the pitfalls of forming dichotomies between the local or the national and the global or the center and the periphery
