Congress. Senate. Committee on Appropriations,1968 Urban Latin America Alejandro Portes,John Walton,2014-09-10 Much research on the city in developing societies has focused mainly on one of three areas planning demography or economics and has emphasized either power elites or the masses but not both The published literature on Latin America has reflected these interests and has so far failed to provide a comprehensive view of Latin American urbanization Urban Latin America is an attempt to integrate research on Latin American social organization within a single theoretical framework development as fundamentally a political problem Alejandro Portes and John Walton have included material on both elites and marginal populations and on the three major areas of research in order to formulate and address some of the key questions about the structure of urban politics in Latin America Following an introduction that delineates the scope of Latin American urban studies Portes discusses the Latin American city as a creation of European colonialism He goes on to examine political behavior among the poor with central reference to system support and countersystem potential

Walton provides material for a comparative study of four cities Monterrey and Guadalajara in Mexico and Medellín and Cali in Colombia He also summarizes a large number of urban elite studies and develops a theoretical interpretation of their collective results based on class structure and vertical integration Material in each chapter is cross referenced to other chapters and the authors have used a common methodological approach in synthesizing and interpreting the research literature In the final chapter they generalize current findings elaborating on the interface between elite and mass politics in the urban situation They make some observations on approaching changes and pinpoint possible research strategies for the future

Local Elites In Western Democracies Samuel J. Eldersveld, 2019-03-07 Much insightful scholarship has been devoted to the elaboration of the nature and functions of elites in modern societies The theories and paradigms which have emerged have evoked both strong support as well as considerable criticism Testing this conception of the role of elites is a primary goal of the analysis presented here We investigate in great detail in these three democratic systems the level of elites concern for their problems their sense of responsibility and power to act their relations with community groups and the public and their values And throughout the analysis we keep in mind the question of effective action This study both builds on and diverges from the early comparative research on local elites

The Politics of the Elite Modesto Gayo, María Luisa Méndez, 2023-11-24 This book is a study of class formation at the top of the social hierarchies during the turbulent and changing early twenty first century Contrary to perceptions that privileged individuals exist according to little more than market and economic logics the book provides evidence that they are by no means absent from politics and civic engagement Adopting a focus on reproduction distinction and politics it delves into the complex relationship between cohesion and fragmentation that exists within the most privileged groups formed over the course of the contemporary neoliberal period By knitting a dialogue between spatial analysis multiple correspondence analysis and in depth interviews the book provides insights into the intricate relations between institutions and political subjectivities and the role of space and mothering in the political socialisation of Chile's most privileged families The result is a dense description of a social class fragmented by subtle ideological lines based upon economic inheritance socialisation within homogeneous family environments paths into the labour market and social and political activities This book will constitute a much needed research resource for academics students and professionals in areas such as elite studies social stratification inequality social reproduction accumulation political socialisation and contemporary conservative progressive views

Dudley Plunkett, Mary Jean Bowman, 2014-07-15 Many Americans who trace their roots to communities similar to those of Appalachian Kentucky are becoming aware of the extent to which the problems of such communities represent the price paid for keeping alive traditions that are beginning to be missed in the wider society Using fresh data and ingenious ways of letting local people speak for themselves Mary Jean Bowman and H. Dudley Plunkett have thrown light on how isolated small town people respond to the encroachment of modern America with its organized economy mass communications media reliance on more and more schooling and persistent drive for social change The study reveals a pervasive tension between old ways and new aspirations Sometimes the new is in alliance with the national culture but often tensions between regional and national ways are acute The authors put little faith in naive attempts to engineer social change in Appalachia attempts they suggest are based on dubious cultural assumptions and misconceived strategies This study of one region in one nation can be a model for the study of similar patterns of change elsewhere **Power, Politics, and Society** Betty A. Dobratz, 2015-10-14 Power Politics Society An Introduction to Political Sociology discusses how sociologists have organized the study of politics into conceptual frameworks and how each of these frameworks foster a sociological perspective on power and politics in society This includes discussing how these frameworks can be applied to understanding current issues and other real life aspects of politics The authors connect with students by engaging them in activities where they complete their own applications of theory hypothesis testing and forms of inquiry **Zionist Israel and Apartheid South Africa** Amneh Badran, 2009-09-10 This book is a comparison of two ethnic national apartheid states South Africa and Israel which have been in conflict and how internal dissent has developed In particular it examines the evolution of effective white protest in South Africa and explores the reasons why comparably powerful movements have not emerged in Israel The book reveals patterns of behaviour shared by groups in both cases It argues that although the role played by protest groups in peace

building may be limited a tipping point or magic point can become as significant as other major factors It highlights the role played by intermediate variables that affect the pathways of protest groups such as changes in the international system the visions and strategies of resistance movements and their degree of success the economic relationship between the dominant and dominated side and the legitimacy of the ideology in power apartheid or Zionism Although the politics and roles of protest groups in both cases share some similarities differences remain Whilst white protest groups moved towards an inclusive peace agenda that adopts the ANC vision of a united non racial democratic South Africa the Jewish Israeli protest groups are still by majority entrenched in their support for an exclusive Jewish state And as such they support separation between the two peoples and a limited division of mandatory Palestine Eretz Israel This timely book sheds light on a controversial and explosive political issue Israel being compared to apartheid South Africa *Regional Russia in Transition*
