The Classical Weekly ,1928 *The Epic Structure of Space 1999* John K. Balor,2018-02-18 This book contains transcripts from Online Alpha discussions where the epic and narrative structure of SPACE 1999 is being discussed by comparing episodes with themes characters and elements of plot from the Homeric Odyssey and Lewis Carroll s stories about Alice The discussion is motivated by questions raised in the scholarly literature and earlier Online Alpha debates about how to make sense of SPACE 1999 from the viewpoint of critical theory The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com

Weather Joel Rubin,2007-08-06 This series helps students find and execute a variety of projects with an overview of the scientific method *Analytic Essays in Folklore* Alan Dundes,2019-07-22 No detailed description available for Analytic Essays in Folklore The Ringed Planet, Second Edition Joshua Colwell,2019-11-22 On September 15 2017 the Cassini spacecraft sent its final transmission to the Earth as it entered the atmosphere of Saturn ending its historic 13 year mission at the ringed planet This book is a beautifully illustrated journey of discovery through the Saturn system Cassini s instruments have revealed never seen before details including the only extraterrestrial lakes known in the solar system and have provided unprecedented views of the rings moons and the planet itself Results from Cassini s dramatic Grand Finale of ring grazing and planet skimming orbits are included in this expanded and updated second edition Saturn is the jewel of the solar system The Cassini spacecraft has been exploring the ringed planet and its moons and rings since 2004 and has helped us solve many of its mysteries while generating a wealth of new questions Cassini has observed the bizarre mountains of Iapetus the geysers of Enceladus the lakes of Titan and the dynamic and evolving rings Along the way this book explores and

explains the fundamental processes that shape not just the Saturn system but planets and moons in general Written for the general audience with an emphasis on the fundamental physics of planetary systems The Ringed Planet is a fascinating exploration of the Saturn system that places Saturn in the context of the solar system as a whole Cassini's instruments have revealed Enceladus and Titan to have subsurface oceans of liquid water Its cameras have returned stunning images of rings in turmoil a tumbling moon the only extraterrestrial lakes known in the solar system a hexagon of clouds some of the highest mountains in the solar system and much more More than a journey of discovery at Saturn The Ringed Planet is also an introduction to how planetary systems work **Uranus, Neptune, Pluto, and the Outer Solar System** Linda T.

Elkins-Tanton, 2006 Explores the relationship between the Sun and the three outer planets of the solar system from the point of view of a planetary scientist examining the role of Uranus Neptune and Pluto as recorders of the formation of the solar system **"Tycos"--Rochester**, 1920 **Hope and Dignity** Emily Herring Wilson, Susan Mullally, 1992-09 From the Foreword by Maya Angelou In Hope and Dignity Emily Wilson and Susan Mullally have offered some answers to the question of Black survival Wilson a good and recognized poet traveled her adopted State of North Carolina she is originally from Georgia talking to older Black women and listening to their responses Interestingly the women collected in this book appear to be speaking more to their ancestors and even to their unborn progeny than to Emily Wilson and therein must lie the book's success For since Wilson is White it is natural to suspect anything Black people might say to her There is the old saying among Blacks If white people ask you where you are going tell them where you've been It is a compliment to Wilson to say that she was wise enough to pose her questions then stand aside so that the women could reflect privately on the pasts they have lived and even those they wished they had lived Mullally's photographs are inspired and to the point She has demonstrated as much sensitivity as Wilson and an equal amount of poetic curiosity The subjects appear as out of a mist suddenly clear and clearly mistresses of their real and imagined times They have overcome the cruel roles into which they had been cast by racism and ignorance They have wept over their hopeless fate and defied destiny by creating hope anew They have nursed by force a nation of hostile strangers and wrung from lifetimes of mean servitude and third class citizenship a dignity of indescribable elegance If I had it to do over Mrs Bryant explains I would just as soon have the days of back yonder as today I had But I'm sure the children can have so much more and so much more easier till this is better days for living but not the kind of living we was brought up with We had time to visit each other and had time to go see the sick and didn't have no thoughts of putting nobody in the rest home Maybe if there was four or five working on the farm one could stay at the house and wait on that sick person And it didn't put no bigger strain on them Now it seems like they have keyed up themselves for fine houses fine furniture fine cars fine everything until it takes them both to work the wife and the husband But used to if the man had to be sick the woman with the neighbor's aid could carry on Or if the woman had to be sick the neighbors would help do the chopping or do whatever she had been doing till she could get well Now there's no way

that no one hardly the way they've got themselves stretched out for wanting so much that they can carry on as well as we did. When mother stays at home with the children and works with them like I did, you near about know them. No way hardly they can fool you or nothing. I'm not giving myself no pat but nobody worked more hours than I did. These women are teachers comprehensively. Their accounts inform us that while life in North Carolina and in all the United States has been hard for the Black woman and man and child, it can be borne with dignity and it can be changed by hope. Salutes to Wilson and Mullally and humble thanks to all the women collected in this book. I understand them. They are my grandmothers. Author note: Emily Herring Wison is a writer in Winston-Salem, North Carolina. She is working with Margaret Supplee Smith on a history of women in North Carolina. Susan Mullally Clark is a photographer in Greensboro, North Carolina, who is currently working on a photographic study of brothers and sisters. Wilson and Clark traveled more than 20,000 miles through the South in the course of interviewing, lecturing, and photographing for *Hope and Dignity*.

1999: A Space Odyssey John K. Balor, 2018-08-03. Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series *Space: 1999* can be understood in relation to Stanley Kubrick's 2001 *A Space Odyssey* by looking at both narratives through the perspective of systems theory. As a result of doing so, an engaged debate concerned with the political and philosophical subtext of both stories developed. This book gives a full account of the debate with summaries of ideas and insights. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

Ask a Science Teacher Larry Scheckel, 2013-12-17. Fun and fascinating Q&As on topics from astronomy to zoology. A treasure. *Library Journal*. We've all grown so used to living in a world filled with wonders that we sometimes forget to wonder about them. What creates the wind? Do fish sleep? Why do we blink? All too often the explanations remain shrouded in mystery or behind a haze of technical language. For kids of all ages or those of us who should have raised our hands in science class but didn't, Larry Scheckel comes to the rescue. An award-winning science teacher and longtime columnist for his local newspaper, Scheckel is a master explainer with a trove of knowledge. Just ask the students and devoted readers who've spent years trying to stump him. In *Ask a Science Teacher*, Scheckel collects 250 of his favorite Q&As and provides refreshingly uncomplicated explanations. You'll learn how planes really fly, why the Earth is round, how microwaves heat food, and much more on topics including The Human Body, Earth Science, Astronomy, Chemistry, Physics, Technology, Zoology, Music, and conundrums that don't fit into any category. For any curious-minded reader, young or old. *Publishers Weekly*.

Worldly Acts and Sentient Things Robert A. Chodat, 2018-07-05. Ants, ghosts, cultures, thunderstorms, stock markets, robots, computers: this is just a partial list of the sentient things that have filled American literature over the last century. From modernism forward, writers have given life and voice to both the human and the nonhuman, and in the process addressed the motives, behaviors, and historical pressures that define lives or things both everyday and extraordinary. In *Worldly Acts and Sentient Things*, Robert Chodat exposes a major shortcoming in recent accounts of twentieth-century

discourse What is often seen as the death of agency is better described as the displacement of agency onto new and varied entities Writers as diverse as Gertrude Stein Saul Bellow Ralph Ellison and Don DeLillo are preoccupied with a cluster of related questions Which entities are capable of believing something saying something desiring hoping hating or doing Which things in turn do we treat as worthy of our care respect and worship Drawing on a philosophical tradition exemplified by Ludwig Wittgenstein and Wilfrid Sellars Chodat shows that the death of the Cartesian ego need not entail the elimination of purposeful action altogether Agents do not dissolve or die away in modern thought and literature they proliferate some in human forms some not Chodat distinguishes two ideas of agency in particular One locates purposes in embodied beings persons the other in disembodied entities presences *Worldly Acts and Sentient Things* is a an engaging blend of philosophy and literary theory for anyone interested in modern and contemporary literature narrative studies psychology ethics and cognitive science *Vintage Redux* Brenda Schweder,2013-03-20

Readers will learn how to recycle vintage jewelry into fun and trendy new art pieces Whether they have and heirloom piece of wedding jewelry or a grab bag of colorful costume jewelry from a thrift store Brenda Schweder s unique approach will show them how to use fun finds and collectibles in modern pieces that work with today s fashions and reflect the personalities of the wearers More than 30 projects featuring a variety of traditional and unusual pieces show readers of all skill levels a multitude of design possibilities **The Complete**

The Philosophical Magazine ,1800 *The Oxford Handbook of Light in Archaeology* Costas Papadopoulos,Holley Moyes,2021-12-09 Light has a fundamental role to play in our perception of the world Natural or artificial lightscapes orchestrate uses and experiences of space and in turn influence how people construct and negotiate their identities form social relationships and attribute meaning to im material practices Archaeological practice seeks to analyse the material culture of past societies by examining the interaction between people things and spaces As light is a crucial factor that

mediates these relationships understanding its principles and addressing illumination's impact on sensory experience and perception should be a fundamental pursuit in archaeology. However, in archaeological reasoning, studies of lightscapes have remained largely neglected and understudied. This volume provides a comprehensive and accessible consideration of light in archaeology and beyond by including dedicated and fully illustrated chapters covering diverse aspects of illumination in different spatial and temporal contexts from prehistory to the present. Written by leading international scholars, it interrogates the qualities and affordances of light in different contexts and in material environments, explores its manipulation, and problematises its elusive properties. The result is a synthesis of invaluable insights into sensory experience and perception, demonstrating illumination's vital impact on social, cultural, and artistic contexts.
