This volume demonstrates how from the beginning of the Atlantic slave trade enslaved and free Africans in the Americas used Catholicism and Christian derived celebrations as spaces for autonomous cultural expression social organization and political empowerment Their appropriation of Catholic based celebrations calls into question the long held idea that Africans and their descendants in the diaspora either resignedly accepted Christianity or else transformed its religious rituals into syncretic objects of stealthy resistance In cities and on plantations throughout the Americas men and women of African birth or descent staged mock battles against heathens elected Christian queens and kings with great pageantry and gathered in festive rituals to express their devotion to saints Many of these traditions endure in the twenty first century The contributors to this volume draw connections between these Afro Catholic festivals observed from North America to South America and the Caribbean and their precedents in the early modern kingdom of Kongo one of the main regions of origin of men and women enslaved in the New World This transatlantic perspective offers a useful counterpoint to the Yoruba focus prevailing in studies of African diasporic religions and reveals how Kongo infused Catholicism constituted a site for the formation of black Atlantic tradition Afro Catholic Festivals in the Americas complicates the notion of Christianity as a European tool of domination and enhances our comprehension of the formation and trajectory of black religious culture on the American continent It will be of great interest to scholars of African diaspora religion Christianity and performance In addition to the editor the contributors include Kevin Dawson Jeroen Dewulf Junia Ferreira Furtado Michael Iyanaga Dianne M Stewart Miguel A Valerio and Lisa Voigt **Recharting the Black Atlantic** Annalisa Oboe, Anna Scacchi, 2011-04-13 This book focuses on the migrations and metamorphoses of black bodies practices and discourses around the Atlantic particularly with regard to current issues such as questions of identity political and human rights cosmopolitics and mnemo history

Blackness Without Ethnicity L. Sansone, 2003-08-01 Blackness Without Ethnicity draws on fifteen years of his research in Bahia Rio Suriname and Amsterdam Sansone uses his findings to explore the very different ways that race and ethnicity are constructed in Brazil and the rest of Latin America He compares these Latin American conceptions of race to dominate notions of race that are defined by a black white polarity and clearly identifiable ethnicities formulations he sees as highly influenced by the US and to a lesser degree Western Europe Sansone argues that understanding more complex and ambiguous notions of culture and identity will expand the international discourse on race and move it away from American dominated notions that are not adequate to describe racial difference in other countries and also in the countries where the notions originated He also explores the effects of globalization on constructions of race

The Transformation of Black Music Sam Floyd, Melanie Zeck, Guthrie Ramsey, 2017-02-28 Powerful and embracing The Transformation of Black Music explores the full spectrum of black musics over the past thousand years as Africans and their descendants have traveled around the globe making celebrated music both in their homelands and throughout the Diaspora Authors Samuel A. Floyd, Melanie Zeck and Guthrie Ramsey brilliantly discuss how the music has blossomed permeated present traditions and created new practices As a companion to the ground breaking The Power of Black Music this text brilliantly situates emerging morphing and influential black musics in a broader framework of cultural political and social histories Grappling with subjects frequently omitted from traditional musical texts The Transformation of Black Music is guided by more than just the ideals of inclusivity and representation This work covers overlooked topics that include classical musicians of African descent

and builds upon the contributions of esteemed predecessors in the field of black music study. Providing a sweeping list of figures rarely included in conventional music history and theory textbooks, the text elucidates the findings of ethnomusicologists, cultural historians, Americanists, Africanists, and anthropologists and weaves these accounts into a powerful and informative narrative. Taking its readers on a journey one that has never been attempted in a single volume alone, this book reflects the musical phenomena generated by forced African migration and collective memory and considers the kinds of powerful stories that these musics were meant to tell. Filling in critical musical and historical gaps previously ignored, authors Floyd Zeck and Ramsey infuse an engaging musical dialogue with a deeper understanding of the interrelationships between black musical genres and mainstream music. *The Transformation of Black Music* will solidify not only the inestimable value of black musics but also the importance and relevance of black music research to all musical endeavors.

The SAGE Handbook of Cultural Analysis Tony Bennett, John Frow, 2008-03-26 A genuine one-stop reference point for the many many differing strands of cultural analysis. This isn't just one contender among many for the title of best multidisciplinary overview; this is a true heavyweight. Matt Hills, Cardiff University. An achievement and a delight both compelling and useful. Beverley Skeggs, Goldsmiths University of London. With the cultural turn, the concept of culture has assumed enormous importance in our understanding of the interrelations between social, political, and economic structures, patterns of everyday interaction, and systems of meaning-making. In *The SAGE Handbook of Cultural Analysis*, the leading figures in their fields explore the implications of this paradigm shift. Part I looks at the major disciplines of knowledge in the humanities and social sciences, asking how they have been reshaped by the cultural turn and how they have elaborated distinctive new objects of knowledge. Parts II and III examine the questions arising from a practice of analysis in which the researcher is drawn reflexively into the object of study and in which methodological frameworks are rarely given in advance. Addressed to academics and advanced students in all fields of the social sciences and humanities, *The SAGE Handbook of Cultural Analysis* is at once a synthesis of advances in the field with a comprehensive coverage of the scholarly literature and a collection of original and provocative essays by some of the brightest intellectuals of our time.

Articulating The Global And The Local Ann Cvetkovich, 2018-02-12 This book explores how discourses of the local, the particular, the everyday, and the situated are being transformed by new discourses of globalization and transnationalism as used both by government and business and in critical academic discourse. Unlike other studies that have focused on the politics and economics of globalization, *Articulating the Global and the Local* highlights the importance of culture and provides models for a cultural studies that addresses globalization and the dialectic of local and global forces. Arguing for the inseparability of global and local analysis, the book demonstrates how global forces enter into local situations and how, in turn, global relations are articulated through local events, identities, and cultures. It includes studies of a wide range of cultural forms, including sports, poetry, pedagogy, ecology, dance, cities, and democracy. *Articulating the Global and the Local* makes the ambitious claim that
