Ring of Stone Circles Stan Abbott, 2022-11-22 An accessible exploration of England's prehistoric past through the clues set in stone by our ancient ancestors Stan Abbott explores Britain's neolithic remains including Castlerigg and Long Meg and her Daughters In Ring of Stone Circles Stan Abbott sets out to explore one part of England for the visible clues to our mysterious past from the Neolithic and Bronze Ages stone circles and standing stones in Cumbria the Northern English county that boasts more of these monuments than any other Here the country's tallest mountains are ringed by almost fifty circles and henges most of them sited in the foothills or on outlying plateaux But why were these built We may never have a definitive answer to this question but by observing and comparing sites a greater understanding emerges Were some circles built for ritualistic purposes or perhaps astronomical Were they burial sites or simply meeting places Join Stan Abbott as he searches for the hidden stories these great monuments guard and might reveal if we get to know them

Exploring Archaeoastronomy Liz Henty, 2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyline is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology's approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy's marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyline archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today
