Gordon Wolman, 2012-12-06 About four years ago Dr Gilbert White visited China and sowed the seeds of this project through conversations with Drs Huang and Gong of the Chinese Academy of Sciences and Mr Long of the Yellow River Conservancy Commission After some additional rounds of communications by letter the plan for a workshop evolved and Drs Wolman and Brush visited with Dr Sabadell of the National Science Foundation to begin the initial planning In March 1987 Dr Brush visited China and the details were worked out for the October 1987 workshop At the outset it was recognized that the 10 American scientists and engineers had very little knowledge of the Yellow River and none had ever seen it Therefore it became important that field trips be scheduled before the workshop to better set the stage for fruitful discussions It was also acknowledged that the American participants could not present papers about the Yellow River per se so their offerings reflected their general knowledge of rivers using other rivers as examples On the other hand the Chinese participants were all well into the difficult problems of harnessing the Yellow River and made their presentations accordingly Despite these differences the subject matter was the unifying thread and cross communication was excellent

Franca, Michael Pfister, 2014-08-12 The behaviour of river systems is a result of the complex interaction between flow sediments morphology and habitats Furthermore rivers are often used as a source of water supply and energy production as well as a waterway for transportation The main challenge faced by river engineers today in collaboration with environmental and ecological scientists is to restore the channelized rivers under the constraints of high urbanization and limited space as well as sustainable water use During the seventh International Conference on Fluvial Hydraulics River Flow 2014 at cole Polytechnique Fédérale de Lausanne EPFL Switzerland scientists and professionals from all over the world addressed this challenge and exchanged their knowledge regarding fluvial hydraulics and river morphology This book comprises the proceedings of the high quality contributions of the participants which reflect the state of the art in the fields of river hydrodynamics morphodynamics sediment transport river engineering and restoration The conference was organized under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR Past River Flow conferences have witnessed a significant increase in participation of our community of river engineers and researchers confirming the need for such a forum      **Hydraulic**

River Mechanics M.S. Yalin,2015-07-14 Understanding the mechanism and behaviour of rivers flowing in alluvium is a most challenging subject The conditions presented by a natural river are far from simple the flow varies with location and time and the granular structure and cohesive properties of the alluvium are rarely homogeneous River Mechanics addresses this subject and aims to improve the understanding and formulation of the fluvial processes which occur in rivers Topics covered include the interpretation of turbulence in the light of recent advances in the field and current thinking on the regime concept **Principles of River Hydraulics** Aronne Armanini,2017-10-30 This book presents key principles of the

hydraulics of river basins with a unique focus on the interplay between stream flows and sediment transport Addressing a number of basic topics related to the hydraulics of natural waterways it above all emphasizes applicative aspects in order to provide the reader with a solid grasp of river engineering The first chapter explores many of the fixed base hydraulic topics that are normally neglected in traditional texts namely the effects on motion produced by the vegetation and macroroughnesses that characterize many mountain streams The remaining chapters are devoted entirely to hydraulics with mobile riverbeds and put particular emphasis on inhomogeneous river channels The book s approach goes beyond classical treatments so as to not only introduce readers to the fundamentals of mobile riverbeds but also enable today s river engineers to successfully design and maintain natural riverbeds River, Coastal and Estuarine Morphodynamics: RCEM
