Rise And Fall Of World Orders:

The Rise and Fall of World Orders Torbjørn L. Knutsen, 1999 Drawing in lessons from 400 years of Great Power politics this volume challenges both the declinist arguments and the overstretched hypothesis of Paul Kennedy to develop an alternative approach to the debate on the rise and fall of the Great Powers The first half of the book compares the Spanish Dutch and the First and Second British world orders It identifies their common features in order to find the most salient causes for their rise as world powers and the most probable reasons for their decline The second half of the book addresses the American world order in the 20th century from Pax Americana to the End of US Hegemony The author sees the dissolution of the Soviet Union and the resurgence of the US as evidence of the role played by normative dimensions commonly underestimated in International Relations analysis Theoretically challenging Knutsen's volume provides a fresh approach to debates in international relations aimed at both students and scholars

India's Foreign Policy Discourse and its Conceptions of World Order Thorsten Wojczewski, 2018-06-27 Given India's growing power and aspirations in world politics there has been increasing interest among practitioners and scholars of international relations IR in how India views the world This book offers the first systematic investigation of the world order models in India's foreign policy discourse By examining how the signifier world order is endowed with meaning in the discourse it moves beyond Western centric IR and sheds light on how a state located outside the Western core conceptualizes world order Drawing on poststructuralism and discourse theory the book proposes a novel analytical framework for studying foreign policy discourses and understanding the changes and continuities in India's post cold war foreign policy It shows that foreign policy and world order have been crucial sites for the re production of India's identity by drawing a political frontier between the Self and a set of Others and placing India into a system of differences that constitutes what India is This text will be of key interest to scholars and students of Indian foreign policy foreign policy analysis South Asian studies IR and IR theory international political thought and global order studies

The End of American World Order Amitav Acharya, 2014-04-25 The age of Western hegemony is over Whether or not America itself is declining the post war liberal world order underpinned by US military economic and ideological primacy and supported by global institutions serving its power and purpose is coming to an end But what will take its place A Chinese world order A re constituted form of American hegemony A regionalized system of global cooperation including major and emerging powers In this timely and provocative book Amitav Acharya offers an incisive answer to this fundamental question While the US will remain a major force in world affairs he argues that it has lost the ability to shape world order after its own interests and image As a result the US will be one of a number of anchors including emerging powers regional forces and a concert of the old and new powers shaping a new world order Rejecting labels such as multipolar apolar or G Zero Acharya likens the emerging system to a multiplex theatre offering a choice of plots ideas directors power and action leadership under one roof Finally he reflects on the policies that the US emerging powers and regional actors must pursue to promote stability in this decentred but interdependent multiplex world Written by a leading scholar of the international relations of the non Western world and rising above partisan punditry this book represents a major contribution to debates over the post American era

States, Civilisations and the Reset of World Order Richard Higgott, 2021-09-16 This book evaluates the current state of world disorder at a time of growing populism nationalism and pandemic panic It distils the implications of the civilisational state for world order The retreat of US leadership is mirrored by the decline of both the material and normative liberal multilateral infrastructure it supported Meanwhile the rise of China as a challenger is accompanied in political economic and cultural terms by other emerging powers no longer bound to the norms of 20th century world affairs notably Turkey India China and Russia By emphasising a cultural lens of analysis alongside robust political and economic analysis the author offers a prescriptive agenda for the coming post pandemic age that recognises the changing powers of civilisational state and hybrid non state actors Without overestimating their probabilities he outlines prospects and preconditions for effective inter civilisational dialogue and proposes a series of minimal conditions for a multilateral reset This book will appeal to public and private decision makers the media the educated lay public and civil society actors interested in the rise of civilisational politics and its possible consequences for world affairs It will be of particular interest to students and researchers in the fields of politics international relations international political economy geopolitics strategic studies foreign policy and social psychology

World Order in Late Antiquity Kevin Blachford, 2024-11-07 The East Romans of Byzantium and the Sasanian Persians competed as geopolitical rivals for over four centuries between 224 to 628 AD Through a series of intractable conflicts these two great empires would develop a dual hierarchy that sought to divide the

known world between them Despite competing claims to universal rule mutual spheres of interest arose as both empires sought to create rules norms and standard practices of diplomatic behaviour to regulate their inter imperial rivalry Defined by contemporaries as the Two Eyes of the Earth this suzerain order aimed to hierarchically organize those considered as barbarians This period of late antiquity is rarely considered within the discipline of International Relations IR but through an English School approach Blachford examines the diverse suzerain order of late antiquity as barbarous nomadic tribes challenged the hierarchical ambitions of two rival empires who both claimed a unique role in the maintenance of world order

Civilizations and World Order Fred Dallmayr, M. Akif Kayapinar, Ismail Yaylaci, 2014-09-24 Civilizations and World Order Geopolitics and Cultural Difference examines the role of civilizations in the context of the existing and possible world orders from a cross cultural and inter disciplinary perspective Contributions seek to clarify the meaning of such complex and contested notions as civilization order and world order they do so by taking into account political economic cultural and philosophical dimensions of social life The book deals with its main theme from three angles or vectors first the geopolitical or power political context of civilizations secondly the different roles of civilizations or cultures against the backdrop of post coloniality and Orientalism and thirdly the importance of ideological and regional differences as factors supporting or obstructing world orders All in all the different contributions demonstrate the impact of competing civilizational trajectories on the functioning or malfunctioning of contemporary world order

New World Order and Small Regions Emil Avdaliani, 2022-08-29 The book provides a comprehensive understanding of the unfolding geopolitical changes in the South Caucasus in the age of increased great power competition across Eurasia Recent research on the geopolitics of the South Caucasus focuses either on interstate relations among Armenia Azerbaijan and Georgia or on each of regional actors Russia Turkey and Iran ties with the region's one or all three states Little attempt has been made to see the region's shifting geopolitical importance from a global perspective growing US China rivalry and shifting balance of power in Eurasia recalibration of the US military and diplomatic vision in western Eurasia to adjust to the Chinese challenge The book argues from a theoretical point of view that the increased competition in the region fits into the global pattern of unfolding great power competition when military and economic calculations drive regional powers to increase their influence on immediate neighborhoods sidelining the collective West from the negotiating table and the emerging new security architecture
