Japan And Asian Modernities Raud, 2012-11-12 The effect of Japan on the challenges and complexities of the modernisation process that globalisation has brought to the fore in Asia are the subject of this interdisciplinary volume by leading scholars in the field Using fascinating examples drawn from current business and organisational practice in Asia it focuses on the impact that Japanese modernity has made in Asia as a model to be imitated because of its apparent success in adopting western technologies while retaining its own cultural identity At the same time Japan itself is a dominant force in modernity in East and South East Asia exporting its own type of modernisation management and business practices and models of traditional social relations which do not necessarily correspond to the traditions of other Asian cultures This adds another element to the conventional model of modernity as a dialogue between West and East without considering Japan's special significance in the region any critical assessment of the modernising process in Asia would not be possible This emphasis is the special contribution of this innovative work which

aims to show the extent to which the experiences of one non Western modernity can influence others to highlight the problems of cultural identity that must be faced by modernising societies and above all aims to contribute to the larger debates on intercultural communication that are vital for achieving genuine understanding between representatives of different cultures traditions and world views Besides Asian and Japanese Studies specialists Japan and Asian Modernities is addressed to a larger audience of academics and specialists working in the areas of history of ideas political science the sociology and anthropology of business comparative cultural studies and economics or other disciplines related to contemporary East and South East Asia where the subject of alternative modernities is relevant

**Owning the Earth** Andro Linklater, 2014-01-01 Barely two centuries ago most of the world s productive land still belonged either communally to traditional societies or to the higher powers of monarch or church But that pattern and the ways of life that went with it were consigned to history as a result of the most creative and at the same time destructive cultural force in the modern era the idea of individual exclusive ownership of land This notion laid waste to traditional

communal civilisations displacing entire peoples from their homelands and brought into being a unique concept of individual freedom and a distinct form of representative government and democratic institutions Other great civilizations in Russia China and the Islamic world evolved very different structures of land ownership and thus very different forms of government and social responsibility The seventeenth century English surveyor William Petty was the first man to recognise the connection between private property and free market capitalism the American radical Wolf Ladejinsky redistributed land in Japan Taiwan and South Korea after the Second World War to make possible the emergence of Asian tiger economies Through the eyes of these remarkable individuals and many more including Chinese emperors and German peasants Andro Linklater here presents the evolution of land ownership to offer a radically new view of mankind s place on the planet
