*Lone Wolf Terror and the Rise of Leaderless Resistance* George Michael,2012-09-15 On July 22 2011 Anders Behring Breivik detonated a car bomb in downtown Oslo Norway He didn t stop there traveling several hours from the city to ambush a youth camp while the rest of

Norway was distracted by his earlier attack That s where the facts end But what motivated him Did he have help staging the attacks The evidence suggests a startling truth that this was the work of one man pursuing a mission he was convinced was just If Breivik did indeed act alone he wouldn t be the first Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations Eric Robert Rudolph embarked on a campaign of terror over several years including the Centennial Park bombing at the 1996 Olympics Ted Kaczynski was revealed to be the Unabomber that same year And these are only the most notable examples As George Michael demonstrates in Lone Wolf Terror and the Rise of Leaderless Resistance they are not isolated cases Rather they represent the new way warfare will be conducted in the twenty first century Lone Wolf Terror investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere

War and State Formation in Ancient China and Early Modern Europe Victoria Tin-bor Hui,2005-07-04 The Eurocentric conventional wisdom holds that the West is unique in having a multi state system in international relations and liberal democracy in state society relations At the same time the Sinocentric perspective believes that China is destined to have authoritarian rule under a unified empire In fact China in the Spring and Autumn and Warring States periods 656 221 BC was once a system of sovereign territorial states similar to Europe in the early modern period Both cases witnessed the prevalence of war formation of alliances development of the centralized bureaucracy emergence of citizenship rights and expansion of international trade This book first published in 2005 examines why China and Europe shared similar processes but experienced opposite outcomes This historical comparison of China and Europe challenges the presumption that Europe was destined to enjoy checks and balances while China was preordained to suffer under a coercive universal status

**A Global History of Pre-Modern Warfare** Kaushik Roy,2021-09-14 This book examines the military histories of the regions beyond Western Europe in the pre modern era Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE As regards the ancient period such works concentrate exclusively on Greece and Rome So global military history is actually the triumphal story of the West from Classical Greece onwards This volume focuses not only on the eastern part of Eurasia but also on South

America Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non Western regions in the pre modern era Further it evaluates whether warfare in non Western regions should be considered primitive or inferior when compared with Western warfare The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique it had also occurred in the Bronze Age the Classical era and in the medieval period This was due to the dynamism and innovativeness of non Western militaries and the interconnectedness that existed in parts of the Eurasian landmass Further those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents This book will be of much interest to students of military history strategic studies and world history

1830 *The Rise of Western Power* Jonathan Daly, 2021-01-14 In this second edition of *The Rise of Western Power* Jonathan Daly retains the broad sweep of his introduction to the history of Western civilization as well as introducing new material into every chapter enhancing the book's global coverage and engaging with the latest historical debates The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world Daly charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two World Wars the Holocaust imperialistic domination and the Atlantic slave trade Taking us through a series of revolutions he explores the contributions of other cultures and civilizations to the West's emergence weaving in historical geographical and cultural factors The new edition also contains more material on themes such as the environment and gender and additional coverage of India China and the Islamic world Daly's engaging narrative is accompanied by timelines maps and further reading suggestions along with a companion website featuring study questions over 100 primary sources and 60 historical maps to enable further study

**Age of Revolutions** Fareed Zakaria, 2024-03-26 A New York Times Bestseller A Wall Street Journal Best Book of 2024 The CNN host and best selling author explores the revolutions past and present that define the polarized and unstable age in which we live Populist rage ideological fracture economic and technological shocks war and an international system studded with catastrophic risk the early decades of the twenty first century may be the most revolutionary period in modern history But it is not the first Humans have lived and thrived through more than one great realignment What are these revolutions and how can they help us to understand our fraught world In this major work Fareed Zakaria masterfully investigates the eras and movements that have shaken norms while shaping the modern world Three such periods hold profound lessons for today First in the seventeenth century Netherlands a fascinating series of transformations made that tiny land the richest in the world and created politics as we know it today Next the French Revolution an explosive era that devoured its ideological children and left a bloody legacy that haunts us today Finally

the mother of all revolutions the Industrial Revolution which catapulted Great Britain and the US to global dominance and created the modern world Alongside these paradigm shifting historical events Zakaria probes four present day revolutions globalization technology identity and geopolitics For all their benefits the globalization and technology revolutions have produced profound disruptions and pervasive anxiety and our identity And increasingly identity is the battlefield on which the twenty first century s polarized politics are fought All this is set against a geopolitical revolution as great as the one that catapulted the United States to world power in the late nineteenth century Now we are entering a world in which the US is no longer the dominant power As we find ourselves at the nexus of four seismic revolutions we can easily imagine a dark future But Zakaria proves that pessimism is premature If we act wisely the liberal international order can be revived and populism relegated to the ash heap of history As few public intellectuals can Zakaria combines intellectual range deep historical insight and uncanny prescience to once again reframe and illuminate our turbulent present His bold compelling arguments make this book essential reading in our age of revolutions

**Military Medical Ethics, Volume 1 , Military History** Maevis Oakes,2024-10-16 Military History offers a comprehensive exploration of how warfare has shaped human civilization throughout the ages This engaging book traces the evolution of military strategies and technologies focusing on the development of land based warfare the rise of naval power and the interplay between technological advancements and military tactics From prehistoric tribal conflicts to the organized armies of ancient civilizations the book provides a chronological journey through major historical periods examining the continuous process of military innovation driven by technological progress and changing sociopolitical landscapes The book s unique approach integrates land and naval warfare into a cohesive narrative highlighting their interconnectedness and impact on global history It delves into fascinating topics such as the development of infantry tactics the revolutionary changes brought about by gunpowder and the evolution of naval warfare from early galleys to ironclad warships Drawing upon a wide range of primary sources and recent scholarship Military History balances scholarly rigor with accessible prose making it appealing to both students and general readers interested in the subject By examining the intricate relationship between military evolution and broader historical trends this book provides valuable insights into how warfare continues to influence geopolitics today It encourages readers to think critically about ongoing debates in the field such as the relative importance of technology versus tactics in determining military outcomes Through its holistic approach and engaging content Military History equips readers with a deeper understanding of how armed conflicts have transformed over millennia and shaped the course of human civilization
