everyday life In recent years the drift has been arrested by scholars in each discipline who have turned towards the other discipline in their research International Relations has undergone a historiographical turn while History has taken an international turn Rise of the International brings together scholars of International Relations and History to capture the emergence and development of the thought the relations and the systems that have come to be called international in western discourse The evidence offered by contributors to the volume suggests there has been no single stable unchanging concept or object of theoretical reflection or historical investigation that can be called the international but a variety of historically contingent conceptualizations across different contexts **Rise to Globalism** Stephen E. Assessing the Role of Globalisation in the Rise of New Right Attitudes in Germany and Italy Samuel Skipper,2016-09-26 This study examines the role of the various processes entailed in globalisation in the rise of the New Right in Italy and Germany The first section aims to clarify what is meant by the term globalisation for it is more easily used than defined Thus several perspectives such as those of the tranformationalists and the hyperglobalists are taken into account Then economic and cultural globalisation considered to be the most influential forms of globalisation are analysed in depth The second part specifically examines the Italian and the German cases by analysing the political and ideological discourse of successful New Right cultural movements and parties such as the Italian Northern League and National Alliance This analysis explains the difference between the populist New Right and the extreme right and how the rise of New Right parties can be linked with the strengthening of cultural and economic globalisation **Revisiting Globalization and the Rise of Global Production Networks** S. Javed Maswood,2017-07-24 This book takes issue with the likening of contemporary globalization to nineteenth century trade interdependence in which the defining feature of contemporary globalization is the spread of global production networks which were notably absent in the past Maswood demonstrates that the emergence of global production networks GPNs was not a result of economic and trade liberalization but instead due to neo protectionist developments in the 1980s that acted as a catalyst to transform Japan s nationally based production networks into the now ubiquitous GPNs Through this case study of Japan the author lays out a case for reconsidering the origins of globalization and explores some of the consequences that are likely to flow from progressive evolutionary transition towards a global economy **The CIA and the Marshall Plan** Sallie Pisani,1991 Pisani shows how the U S added a Cold War Corollary to the principle of self determination massive foreign aid and nonmilitary covert operations to reshape war torn Europe in the image of the U S She tells for the first time the story of the top CIA operatives who were instrumental in developing the non military covert intervention policies of the early Cold War years and the Office of Policy Coordination that carried them out **Rise to Globalism** Stephen E. Ambrose,1971 **The Insular Cases and the Emergence of American Empire** Bartholomew H. Sparrow,2006 Focuses on America s first attempts at empire building through a string of U S Supreme Court decisions in the early part of the 20th century that tried to define the legal and constitutional status of America s island territories Puerto

Rico Cuba and the Philippines among others and reveals how the Court provided the rationalization for the establishment of an American empire **Rise to Globalism** Stephen E. Ambrose,1976 NACLA Report on the Americas North American Congress on Latin America,1983 Rise to Globalism Stephen E. Ambrose,1980
