Kearn, 2014-12-18 This book explains the conditions under which great powers are likely to cooperate to improve their security by engaging in qualitative arms control In agreeing to limit or proscribe certain classes of weapons states will constrain their military capabilities and therefore decrease the threat they pose to potential adversaries Focusing on the expected military impact of technological change and the capacity of states to confidently monitor the activities of its negotiating partners it may be possible to forge lasting agreements that improves the security of the participating states However at other times the nature technological change may force states to engage in competitive behavior precluding cooperation and increasing the probability of conflict Examining a diverse set of cases including the Washington Naval Conference The World Disarmament Conference at Geneva the Baruch Plan for the International Control of Atomic Energy and the SALT I Accords including the ABM Treaty this volume presents a persuasive comprehensive and interesting contribution to the literature on arms racing and arms control and should be of interest to students of international relations theory and security studies By presenting a theoretical informed model that explicitly links the security strategies of states to their choices about development and deployment of new weapons and consequently their willingness to engage in arms control cooperation this book provides an important refinement upon existing theoretical and historical approaches

American Sea Power and the Obsolescence of Capital Ship Theory R.B. Watts, 2015-11-16 Since the beginning of the 20th century the United States has sought to achieve Admiral Alfred Thayer Mahan's vision of command of the sea using large battle fleets of capital ships This strategy has been generally successful no force can oppose the U S Navy on the open seas Yet capital ship theory has become increasingly irrelevant Globally irregular warfare dominates the spectrum of conflict especially in the aftermath of 9 11 Fleet engagements are a thing of the past and even small scale missions that rely on capital ships are challenged by irregular warfare In a pattern evident since World War II the U S Navy has attempted to adapt its capital ship theory to irregular conflicts with mixed results before returning to traditional operations with little or no strategic debate This book discusses the challenges of irregular warfare in the 21st century and the need for U S naval power to develop a new strategic paradigm Admirals, Generals, and American Foreign Policy, 1898-1914 Richard D. Challener, 2015-03-08 After the Spanish American War the United States both by design and by accident became involved in the Caribbean and the Far East on a scale that would have seemed highly improbable before 1898 As an emerging world power the United States had to grapple with new issues among them the role of military men and military power in protecting and advancing America's position in the world Richard D Challener has examined civil military relationships in the period 1898 1914 to answer the following questions To what extent did army and navy officers develop opinions on foreign

policy issues Were the admirals and generals consulted by the civilian officials of government and did they participate in decision making How did the President and State Department use the military services in execution of foreign policy Were military and diplomatic policy co ordinated Does an examination of these relationships help to assess either the interpretations of Kennan and the realists or Williams and the New Left And ultimately how effectively did the United States manage to reconcile force and diplomacy This book sustains the case for interpreting 1898 and its aftermath as a deliberate search for an informal or insular empire and shows that American leaders both civil and military accepted an interventionist ethic Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Clad in Iron Howard J. Fuller, 2007-12-30 This work addresses many persistent misconceptions of what the monitors were for and why they failed in other roles associated with naval operations of the Civil War such as the repulse at Charleston April 7 1863 Monitors were ironclads not fort killers Their ultimate success is to be measured not in terms of spearheading attacks on fortified Southern ports but in the quieter much more profound strategic deterrence of Lord Palmerston s ministry in London and the British Royal Navy s potential intervention The relatively unknown Cold War of the American Civil War was a nevertheless crucial aspect of the survival or not of the United States in the mid 19th century Foreign intervention explicitly in the form of British naval power represented a far more serious threat to the success of the Union blockade the safety of Yankee merchant shipping worldwide and Union combined operations against the South than the Confederate States Navy Whether or not the North or South would be clad in iron thus depended on the ability of superior Union ironclads to deter the majority of mid Victorian British leaders otherwise tempted by their desire to see the American experiment in democratic class structures and popular government finally fail Discussions of open European involvement in the Civil War were pointless as long as the coastline of the United States was virtually impregnable Combining extensive archival research on both sides of the Atlantic this work offers an in depth look at how the Union Navy achieved its greatest grand strategic victory in the American Civil War Through a combination of high tech machines armed with monster guns intensive coastal fortifications and a new fleet of high speed Union commerce raiders the North was able to turn the humiliation of the Trent Affair of late 1861 into a sobering challenge to British naval power and imperial defense worldwide

Home Squadron James C Rentfrow, 2014-04-15 This study examines the transformation of the United States Navy as a fighting organization that took place on the North Atlantic Station between 1874 and 1897 At the beginning of this period the warships assigned to this station were collectively administered by a rear admiral but were operationally deployed as individual units each of

whose actions were directed by their captains By 1897 the North Atlantic or Home Squadron as it was known was a group of warships constituting a protean battle fleet that is an organized body moving and fighting in close order which meant that the actions of the captains were directed by a commanding admiral The process of the development of an American battle fleet resulted in the construction of a new organizational identity for the North Atlantic Squadron This process was as critical as the eventual outcome It was not linear but one in which progress in critical areas was modulated by conflicting demands that caused distraction From 1874 1888 exercises in fleet tactics under steam were carried out sporadically utilizing existing wooden cruising vessels From 1889 1894 the last wooden cruisers were decommissioned and the Squadron consisted entirely of new steel warships Ad hoc concentrations of vessels for purposes besides exercise and training retarded the continued development of doctrine and tactics necessary for a multi ship fighting capability during this time However much work was done to develop a concept of multi ship operations From 1895 1897 the identity of the North Atlantic Squadron as a combat unit solidified Tactical exercises were held that had specific offensive and defensive wartime applications These exercises were necessary to develop a combat capability The results of this study demonstrate that the United States government had an interest in developing an offensive naval combat capability as early as the 1870 s Based on the record of the North Atlantic Squadron it is argued that imperial aspirations in the sense of possessing a capability to restrict the actions of other great powers in the Caribbean region existed prior to the War of 1898 However the process of change often resulted in the appearance of capability without the rigorous exercise necessary to possess it **Military Law Review** ,1980 *The Transformation of British and American Naval Policy in the Pre-Dreadnought Era* Robert E. Mullins,John Beeler,2016-09-30 This volume examines the transformation of British and US naval policy from 1870 to 1889 which resulted in the British Naval Defence Act 1889 the construction of the first modern US battleships and began the naval arms race which culminated in World War One In examining the development of strategic thinking in the Royal and US Navies it overturns conventional wisdom regarding genesis of the Naval Defence Act and the US Navy s about face from a defensive to an offensive strategic orientation It pays particular attention to activities of the key individuals in both countries navies who were instrumental in transforming their respective services organizational culture This study will be of interest not only to historians but to political scientists sociologists and others working in the fields of international relations strategic studies policy analysis and military learning adaptation and innovation It is also essential reading for those interested in the naval arms race during this period The Statesman's Year-Book M. Epstein,2016-12-27 The classic reference work that provides annually updated information on the countries of the world **Mobilizing for Modern War** Paul A. C. Koistinen,1997 In this volume Koistinen examines war planning and mobilizing in an era of rapid industrialization and reveals how economic mobilization for defense and war is shaped at the national level by the interaction of political economic and military institutions and by increasingly powerful and expensive weaponry **American War Plans, 1890-1939** Steven T. Ross,2013-09-13 By the

close of the 19th century the United States was no longer a continental power but had become a nation with interests that spanned the globe from the Caribbean to China Consequently the country faced a new set of strategic concerns ranging from enforcing the Monroe Doctrine to defending the Philippines As a result of the United States new geostrategic environment the armed services had to establish a system for the creation of war plans to defend the country s interests against possible foreign aggression A Joint Army and Navy Board established in 1903 ordered the creation of war plans to deal with real and potential threats to American security Each major country was assigned a colour Germany was Black Great Britain Red Japan Orange Mexico Green and China Yellow War plans were then devised in case Washington decided to use force against these or other powers **Princeton Alumni Weekly** ,1938 **Succeeding John Bull** D. Cameron Watt,1984-03-29 This book is based on the Wiles lectures for 1981 delivered at the Queen s University of Belfast in October 1981 It is not a history of Anglo American relations in the century its theme deals with how the United States of America came to replace Britain as the primary world and oceanic power confronting a grouping of land based continental powers the position Britain occupied throughout the nineteenth century This theme is examined in the light of how the process of replacement was conceived and perceived by those groups which had the primary responsibility for the formulation and conduct of foreign relations in each of the two powers Britain and America The author whose earlier study of 1965 of the British foreign policy making elites pioneered this approach in Britain argues the existence and continuity over much of this century of similar groups in the United States
