Rise Of New Labour Party Policies And Voter Choices:

The Rise of New Labour Anthony F. Heath, Roger M. Jowell, John K. Curtice, 2001-04-05 This major new work from the well known team of Heath Jowell and Curtice explores the emergence of New Labour from the ruins of old Labour's four successive defeats at the hands of the Conservatives Based on the authoritative British Election Surveys the book explores some of the key questions about contemporary British elections and the social and political factors that decide their outcomes The book begins with the electoral legacy of Margaret Thatcher How far had Margaret Thatcher converted the electorate to her vision of a free market low tax society Did her electoral success prove the popularity of her policies Does any scope remain in Britain for left wing policies The Rise of New Labour explores the reasons for the failure of previous attempts by Labour under Michael Foot and Neil Kinnock to win the electorate's backing for left wing policies and dissects the electoral benefits of Tony Blair's abandonment of socialism The research shows that policies play a much smaller role in electoral change than is usually supposed and that the parties may be less constrained than they imagine The book explores the key assumptions underlying New Labour's diagnosis of the problems the party faced during the eighteen years of Conservative rule It shows that many of these assumptions were at best half truths and that much of the conventional wisdom shared by politicians and commentators about how voters decide is seriously flawed The book concludes by putting forward a new model of electoral behaviour which is better able to account for the wide array of research findings

New Labour Mark Bevir, 2012-12-06 New Labour is the most innovative and powerful political movement in Britain today However New Labour A Critique argues that its apparent pragmatism disguises an ideological commitment to particular forms of social science deploying new institutionalism and communitarianism to respond to the New Right Bevir traces the impact of these forms of social science on the ideas and policies of New Labour paying particular attention to the welfare state and the economy New Labour the new institutionalism and communitarianism typically objectify aspects of the social world to sustain claims to expert knowledge Bevir defends and enacts an alternative interpretive approach to social science This interpretive approach inspires a critique of New Labour as a contingent reworking of a particular socialist tradition rather than the necessary or pragmatic response that it portrays itself as

Bailey, 2009-05-19 Presenting case studies from the UK France Sweden Spain Italy and the transnational Party of European Socialists this text provides a theoretically innovative explanation for the new social democratic turn to Europe It will be of interest to postgraduate students and academics studying researching social democratic parties Leaders without Partisans Diego Garzia, Frederico Ferreira da Silva, Andrea de Angelis, 2021-09-01 Leaders without Partisans examines the changing impact of party leader evaluations on voters behavior in parliamentary elections The decline of traditional social cleavages the pervasive mediatization of the political scene and the media's growing tendency to portray politics in personalistic terms all led to the hypothesis that leaders matter more for the way individuals vote and often the way elections turn out This study offers the most comprehensive longitudinal assessment of this hypothesis so far The authors develop a composite theoretical framework based on currently disconnected strands of research from party media and electoral studies and test it empirically on the most encompassing set of national election study datasets ever assembled The labor intensive harmonization effort produces an unprecedented dataset pooling information for a total of 129 parliamentary elections conducted between 1961 and 2018 in 14 West European countries The book provides evidence of the longitudinal growth in leader effects on vote choice and on turnout The process of partisan dealignment and changes in the structure of mass communication in Western societies are identified as the main drivers of personalization in voting behavior **A More Equal Society?** John Hills, Kitty Stewart, 2005-01-12 As the Labour government approaches the end of its second term in office there is a need to assess the welfare issues that have been put into place and examine what has been achieved Poverty Inequality and Exclusion brings together the expertise of a range of authors to provide this evaluation *Voters or Consumers* Darren Lilleker, Richard Scullion, 2009-05-05 This edited collection seeks to map current thinking and practice in order to assess the extent to which the consumer as opposed to the voter should now be elevated to a central position within our understanding of the relationship between the public and political spheres The volume will firstly offer an overview of how consumerism has been applied to our understanding of political and voter behaviour so outlining the book's key concepts The volume then follows a processual approach to developing its analysis offering essays that explore contrasting critical perspectives on the topic The group of essays focus on conceptualising political consumerism the next look at how political organisations use the tools of positioning and branding so developing an overview of consumer driven political behaviour The focus then moves to the nature of political communication both by parties and the media and how this reflects the neo liberal ontological perspective that encourages voting to be treated as part of consumer behaviour Finally the book turns to the voter consumer looking firstly at the processing of messages and how this can be analysed from a consumerist perspective and finally on voting behaviour itself exploring the extent to which rational choice and economic models of voting have been increasingly a

reflection of a consumerist perspective Each chapter will approach the subject from a discrete perspective which will be outlined within its introduction However the chapters will each explore the following Whether parties or voters are approaching one another using consumerist perspectives How this can be mapped empirically through specific examples or case studies The extent to which consumer behaviour models and perspectives help us understand voter or party behaviour

Class and Politics in Contemporary Social Science Dick Houtman,2017-07-12 Dick Houtman argues that neither authoritarianism nor libertarianism can be explained by class or economic background but rather by position in the cultural domain what he calls cultural capital Although he examines all of the statistics and arguments of the conventional approaches with care and concern Houtman convincingly demonstrates that the conclusions drawn from earlier studies are untenable at a more general theoretical level Despite differences among advocates of class explanations their theories are based on largely identical research findings in particular a strong negative relationship between education and authoritarianism Unobstructed by the conclusions these authors felt called upon to draw from the findings themselves Houtman configures them in a new way The hypotheses derived from this new theory allow for a systematic strict and competitive testing of original theses without ignoring the value of and earlier research After demonstrating that authoritarianism and libertarianism cannot be explained by class or economic background Houtman examines the implications of this argument for today s death of class debate in political sociology He holds it to be unfortunate that the relevance of class to politics is typically addressed by studying the relation between class and voting This conceals a complex cross pressure mechanism that causes this relationship to capture the net balance of class voting and its opposite cultural voting instead of class voting He argues that references to a decline in class voting may be basically correct but dogmatic reliance on the relation between class and voting to prove the point systematically underestimates levels of class voting and produces an exaggerated picture of the decline

The Mediation of Power Aeron Davis,2007-08-07 Providing textbook range and accessibility whilst delivering advanced thinking and new critical directions ten chapters cover a broad range of common media and communications topics

New Labour at the Centre Andrew Hindmoor,2004-11-11 Taking as its starting point Anthony Downs seminal work *An Economic Theory of Democracy* this book draws upon insights generated within economics political psychology and the study

of rhetoric to examine the way in which New Labour achieved and maintained its electoral hegemony from 1994 Journalists and politicians routinely attribute New Labour's electoral success to its occupation of the centre ground This book is interested in the question of how New Labour moved to the right and towards the centre The obvious answer to this question is that New Labour moved by changing its policies Against this the book contends that changes in policy cannot in themselves constitute a complete explanation of changes in spatial position They cannot do so because there is no pre-given and fixed relationship between policies and position such that the rejection of one policy and the adoption of another moves a party from one position to another Policies are not immutably left-wing, right-wing or centrist and so given that the position a party is thought to occupy is a function of the policies to which it is committed parties are not immutably left-wing, right-wing or centrist either The relationship between policy and position and thereby between parties and position is constructed and is in part constructed by parties themselves New Labour did not simply move to the centre It had to persuade the media voters and other parties that it had moved to the centre New Labour achieved and maintained its electoral hegemony not simply by changing one set of policies for another It achieved and maintained its hegemony by successfully constructing its policies as centrist

Racism, Xenophobia, and Distribution John E. Roemer, Woojin Lee, Karine van der Straeten, 2007 Conservative politicians in the last thirty years have capitalized on voters' resentment of ethnic minorities to win votes and undermine government aid to the poor Racism, Xenophobia and Distribution offers a theoretical model to calculate the effect of voters' attitudes about race and immigration on political parties' stances
