A Guide to Cancer Genetics in Clinical Practice Sue Clark, 2009-05-01 FIRST PRIZE Winner in the Oncology category of the 2010 BMA Medical Book Competition Intensive research over the last fifteen years has yielded a vast expansion in our understanding of the role of inheritance and genetics in a variety of cancers Several inherited conditions have been identified which result in a high risk of various cancers some of these were previously recognized but the genetic basis underlying them has now been elucidated This knowledge is now entering the sphere of routine clinical care Surgeons gastroenterologists gynaecologists oncologists endocrinologists and many others need an awareness of these disorders an understanding of genetic testing and when it is indicated and how to manage patients with inherited cancer predisposition and their families This book covers the basic concepts of cancer genetics The common inherited cancer syndromes are each dealt with in greater depth with the current management outlined This book is aimed at all clinicians who may encounter these conditions in their practice It aims to facilitate identification of high risk individuals and families to inform interaction with geneticists and other subspecialists to provide a basis for patient management and to stimulate interest in these fascinating conditions

Cancer Genetics for the Clinician Gail L. Shaw, 2012-12-06 Cancer genetics is a quickly growing field within oncology The ability to identify individuals at high risk for cancer improves the chance of early prevention and detection of cancer The results of genetic testing affect quality of life employment and ability to be insured This volume will provide an overview of cancer genetics inherited cancer susceptibility and available services and testing including both the risks and benefits of testing Some of the topics covered include genetics of breast and ovarian cancer testing minors for inherited cancer risk chemoprevention of heritable cancer risk genetics of colorectal cancer insurance issues in genetic testing for cancer ethical and legal issues in genetic testing for cancer susceptibility testing for breast cancer risk in the Ashkenazim estimating individualized risk of breast cancer genetic counseling for the individual with inherited cancer susceptibility and components of a genetic cancer risk clinic While heritable cancers account for between five and ten percent of all cancer cases molecular alterations attributable to specific inherited cancer susceptibility may give us important clues into the mechanism by which cancer occurs not only in predisposed individuals but also for sporadic cases

Multiple Primary Malignancies Andrea Renda, 2009-02-11 In 2006 when my colleague Andrea Renda proposed multiple primary malignancies MPM as the subject of the Biennial Report to the 2008 Congress of the Italian Society of Surgery I together with the Steering Committee quickly

agreed Recent progress in our understanding of the etiopathology of these neoplasms has led to novative and significant progress on the clinical level Importantly the incidence of the onset of two or more tumors in the same patient suggests a more than casual lationship Furthermore the occurrence of MPM derives from several different me anisms viral iatrogenic immunologic environmental and hereditary such that any form of treatment must take into account the etiology of these tumors After an epidemiological introduction this monograph analyzes various aspects of multitumoral syndromes based on the experience of the Department of Surgical Sciences along with that of other clinical departments of the University Federico II of Naples In the discussion of inherited tumors reference is made to the series of patients treated at the Department of Surgery at the University of Siena The many topics that comprise this volume range from carcinogenesis to diagnostic strategies and from epidemiology to innovations in imaging and endoscopic techniques Among the clinical aspects particular emphasis is given to sporadic and hereditary syndromes as these patients are frequently treated by general surgery departments
