Risk Assessment In The Food Chain:

Risk Assessment in the Food Chain of Children Peter J. Aggett, Harry A. Kuiper, 2000 his volume presents objective guidelines for assessing the health risks of childhood exposure to food contaminants Leading experts discuss the complex processes of characterizing hazards in the food chain assessing exposures and establishing acceptable intakes Chapters examine the development of metabolic mechanisms for xenobiotics the role of the gastrointestinal tract in handling such substances the susceptibility of children to hepatic toxicity and the neurologic consequences of perinatal exposure to PCBs and dioxins Other topics covered include hazards in breast milk management of pesticide risks in baby food manufacturing bovine spongiform encephalopathy and public health and assessment of novel food hazards Quality and risk management in agri-food chains Brigitte Petersen, Manfred Nüssel, Martin Hamer, 2023-09-04 An apple a day keeps the doctor away While it may be true that a balanced diet is a prerequisite for good health how good is what we eat and drink every day And is it actually possible to fulfil every customer desire with the vast array of foodstuffs on offer BSE dioxin in eggs EHEC sprouts in the light of repeated food safety crises the issue of quality assurance as well as customer oriented quality management has become of prime importance for the agri food industry This sector features highly complex value added chains which means that quality deficiencies or contaminations can quickly lead to far reaching problems with serious consequences for consumers and businesses What can be done to reduce this vulnerability to crises The only solution is to establish systematic methods of quality management which will facilitate the establishment and protection of high standards across companies This book will show which methods are available and how they can reasonably be used The authors present an easy to read guide which not only includes the most important legal provisions standards and accreditation and certification procedures but also develops practical quality assurance strategies and shows how they can be implemented within the agri food industry Microbiological Risk Assessment in Food Processing M. Brown, M Stringer, 2002-09-26 Microbiological risk assessment MRA is one of the most important recent developments in food safety management Adopted by Codex Alimentarius and many other international bodies it provides a structured way of identifying and assessing microbiological risks in food Edited by two leading authorities and with contributions by international experts in the field Microbiological risk assessment provides a detailed coverage of the key steps in MRA and how it can be used to improve food safety The book begins by placing MRA within the broader context of the evolution of international food safety standards Part one introduces the key steps in MRA methodology A series of chapters discusses each step starting with hazard identification and characterisation before going on to consider exposure assessment and risk characterisation Given its importance risk communication is also covered Part two then considers how MRA can be implemented in practice There are chapters on implementing the results of a microbiological risk assessment and on the qualitative and quantitative tools available in carrying out a MRA It also discusses the relationship of MRA to the use of microbiological criteria and another key tool in

food safety management Hazard Analysis and Critical Control Point HACCP systems With its authoritative coverage of both principles and key issues in implementation Microbiological risk assessment in food processing is a standard work on one of the most important aspects of food safety management Provides a detailed coverage of the key steps in microbiological risk assessment MRA and how it can be used to improve food safety Places MRA within the broader context of the evolution of international food safety standards Introduces the key steps in MRA methodology considers exposure assessment and risk characterisation and covers risk communication
