Shadmehr, Alaa A. Ahmed, 2025-02-18 An examination of the link between the vigor with which we move and the value that the brain assigns to the goal of the movement Why do we reflexively run toward people we love but only walk toward others In Vigor Reza Shadmehr and Alaa Ahmed examine the link between how the brain assigns value to things and how it controls our movements They find that brain regions thought to be principally involved in decision making also affect movement vigor and that brain regions thought to be principally responsible for movement also bias patterns of decision making Shadmehr and Ahmed first consider the relationship of value and vigor from a behavioral and mathematical perspective considering a series of fascinating observations including for example data showing that people in certain cities tend to walk faster than those living elsewhere through the lens of optimal foraging theory They then go on to explore the neural basis of vigor and valuation synthesizing results from experiments that have measured activity in various brain structures and neuromodulators including dopamine and serotonin They speculate that in the future technologies may be able to predict our personal preferences by measuring our movements through the vigor with which we move we unwittingly reveal one of our well guarded secrets how much we value the object of our attention *The JOLT Effect* Matthew Dixon, Ted McKenna, 2022-09-20

**Predicting Forex and Stock Market with Fractal Pattern** Young Ho Seo,2020-04-09 About this book This book provides you the powerful and brand new knowledge on predicting financial market that we have discovered in several years of our own research and development work This book will help you to turn your intuition into the scientific prediction method In the course of recognizing the price patterns in the chart of Forex and Stock market you should be realized that it was your intuition working at the background for you The geometric prediction devised in this book will show you the scientific way to predict the financial market using your intuition Many of us made a mistake of viewing the financial market with deterministic cycle Even though we knew that market would not show us such a simple prediction pattern we never stop using the concept of deterministic cycle to predict the financial market for example using Fourier transform and other similar techniques Why is that so The reason is simple It is because no one presented an effective way of predicting stochastic cycle Stochastic cycle is the true face of the financial market because many variables in the market are suppressing the predictable cycle with fixed time interval So how we predict the stochastic cycle present in the financial market The key to answer is the Fractal Pattern and Fractal Wave The geometric prediction on Fractal Wave solves the puzzles of the stochastic cycle modelling problem together In another words your intuition more precisely your capability to recognize geometric shape is more powerful than any other technical indicators available in the market Hence the geometric prediction which comes from your intuition would maximize your ability to trade in the financial market In this book Geometric prediction is described as the combined ability to recognize the geometric regularity and statistical regularity from the chart We provide the examples of geometric regularity and statistical regularity In addition we will show you how these regularities are related to your intuition The chart patterns covered in this book include support resistance Fibonacci Price pattern Harmonic Pattern Falling Wedge pattern Rising Wedge pattern and Gann Angles with probability We use these chart patterns to detect geometric regularity Then we use the turning point probability as the mean of detecting statistical regularity In our trading we combine both to improve the trading performance
