Risk By Choice Regulating Health And Safety In The Workplace:

Risk by Choice W. Kip Viscusi, 1983 Commentary on labour legislation concerning occupational safety and occupational health in the USA reviews the work of the Occupational Safety and Health Administration in standard setting examines the value of human life in terms of hazard elimination costs argues that disclosure of information more effective than labour policy in improving employees attitude and trade union attitude towards arduous working conditions References statistical tables

Health and Safety in Contemporary Britain Paul Almond, Mike Esbester, 2018-12-30 This book analyses the perceived legitimacy of health and safety in post 1960 British public life Since 2010 health and safety has appeared to be in crisis being attacked by press politicians and public alike but are these claims of crisis accurate How have understandings of health and safety changed over the past 60 years By exploring the history culture and operation of health and safety in contemporary Britain this book provides a new assessment of an understudied but surprisingly far reaching part of the British political and social landscape Combining archival research with focus group social survey and oral history testimony the book examines the historical background to health and safety how health and safety has been enacted in public and in the workplace the impact of changing economic occupational and social structures on the operation of health and safety and the conflicts and interests that have shaped the area

Rational Risk Policy W. Kip Viscusi, 1998-03-12 Rational Risk Policy is based on Viscusi's Arne Ryde Memorial Lectures delivered at Lund University in 1996 The organizing principle of these lectures is that the irrationality of individual decisions is often embodied in government regulations Rather than overcoming the inadequacies in individual risk beliefs and behaviour governmental regulations often institutionalize them Viscusi examines how consumers and workers perceive risk and the implications of these risk beliefs and behavioural responses to risk for government policy Hazard warnings efforts direct regulation and liability are among the alternative modes of intervention The role of risk tradeoffs with respect to the value of life as well as the consequences of wasteful regulatory expenditures are considered in a discussion of risk analysis Rational Risk Policy also includes a critique of the risk analysis practices used by government agencies as well as a consideration of how liability and social insurance should be integrated into a rational risk management strategy

Oversight of the Office of Management and Budget Regulatory Review and Planning Process United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on Intergovernmental Relations, 1986 Federal Register, 1992-08

Smoking W. Kip Viscusi, 1992 Are the risks of smoking exaggerated Has there been an open and rational discussion about the risks of smoking This book attempts to answer these and many other questions about the subject providing a detailed empirical presentation on smoking behavior as a risky consumer decision Using new empirical data based on several national and regional surveys Viscusi addresses a number of important issues including the sources of information that people have about the risks of smoking the accuracy of their perceptions of the risks associated with smoking and the consistency of smoking decisions with other risky behavior

scrutinizing issues such as whether smokers value risk differently than those who wear safety belts Viscusi also looks at the differences in age groups and how they assess these risks based on public information He provides new insight into the degree to which individuals understand smoking risks and take these risks into account in their behavior With its detailed empirical data and its examination of individual decision making processes this work will interest researchers in public health public policy psychology and economics as well as anyone concerned with this important issue

New Risks: Issues and Management Louis A. Cox, Paolo F. Ricci, 2013-06-29 This volume contains the proceedings of the 1986 annual meeting and conference of the Society for Risk Analysis It provides a detailed view of both mature disciplines and emerging areas within the fields of health safety and environmental risk analysis as they existed in 1986 In selecting and organizing topics for this conference we sought both i to identify and include new ideas and application areas that would be of lasting interest to risk analysts and to users of risk analysis results and ii to include innovative methods and applications in established areas of risk analysis In the three years since the conference many of the topics presented there for the first time to a broad risk analysis audience have become well developed and sometimes hotly debated areas of applied risk research Several such as the public health hazards from indoor air pollutants radon in the home high voltage electric fields and the AIDS epidemic have been the subjects of headlines since 1986 Older areas such as hazardous waste site ranking and remediation air emissions dispersion modeling and exposure assessment transportation safety seismic and nuclear risk assessment and occupational safety in the chemical industry have continued to receive new treatments and to benefit from advances in quantitative risk assessment methods as documented in the theoretical and methodological papers in this volume A theme of the meeting was the importance of new technologies and the new and uncertain risks that they create

Regulatory Reform Act United States. Congress. House. Committee on the Judiciary. Subcommittee on Administrative Law and Governmental Relations, 1984

Liability Robert E. Litan, Clifford Winston, 2010-12-01 The United States has recently witnessed an explosion of personal injury lawsuits involving medical malpractice unsafe products and widespread environmental hazards Jury awards and out of court settlements have escalated in many cases to hundreds of thousands of dollars At the same time premiums for liability insurance have skyrocketed As a result physicians have cut back services and some municipalities and businesses have been denied liability coverage altogether Some experts claim that only fundamental reform of the nation's civil justice system will end this insurance crisis But critics of such wholesale judicial reform contend that the insurance industry has launched a tort reform campaign to cover its own past underwriting mistakes Liability brings together economists and experts in liability law and the insurance industry to assess the merits of the conflicting positions and to formulate sound public policy Led by Robert Litan and Clifford Winston the contributors describe the major changes that have contributed to the insurance crunch and set forth a methodological framework for evaluating the debate over the current liability system They conclude that increases in premiums and cutbacks in coverage have been real but selective that

the forces in the judicial system responsible for rising liability costs are not readily subject to change and that we know too little about the cost and benefits of the current tort system to replace it with an alternative compensation program

Workers' Compensation Morley Gunderson, Douglas Hyatt, 2000-01-01 Topics covered include low back pain in workers compensation payroll taxes unfunded liabilities occupational health and safety private participation the cost appeals litigation

Public Economics in the United States Steven Payson, 2014-06-11 This comprehensive explanation of the U S government s role in economics will be an eye opener for anyone who wants to understand exactly what the government does and doesn t do in this most critical area Most people including many economists are not aware of the great variety of crucial tasks and invaluable analyses undertaken by government economists This three volume set will fill that gap with an all encompassing overview of the major economics related work the government performs across all of its agencies and offices With 45 chapters written by 61 leading experts the work covers every major topic in government economics including such diverse areas as monetary policy defense spending social assistance international trade antitrust and environmental protection In addition to entries by those who teach economics the compendium also features candid observations from government insiders to help readers grasp how things really work But readers will not only gain insight into specific fields and topics they will also be able to better understand the big picture and how its pieces fit together This unique and far reaching set often challenges conventional wisdom even as it presents a novel synthesis of the government s research analysis and actions

Exploring the Domain of Accident Law Don DeWees, David Duff, Michael Trebilcock, 1996-01-04 In the mid 1980s there was a crisis in the availability affordability and adequacy of liability insurance in the United States and Canada Mass tort claims such as the asbestos DES and Agent Orange litigation generated widespread public attention and the tort system came to assume a heightened prominence in American life While some scholars debate whether or not any such crisis still exists there has been an increasing political judicial and academic questioning of the goals and future of the tort system Exploring the Domain of Tort Law reviews the evidence on the efficacy of the tort system and its alternatives By looking at empirical evidence in five major categories of accidents automobile medical malpractice product related accidents environmental injuries and workplace injuries the authors evaluate the degree to which the tort system conforms to three normative goals deterrence corrective justice and distributive justice In each case the authors review the deterrence and compensatory properties of the tort system and then review parallel bodies of evidence on regulatory penal and compensatory alternatives Most of the academic literature on the tort system has traditionally been doctrinal or in recent years highly theoretical Very little of this literature provides an in depth consideration of how the system works and whether or not there are any feasible alternatives Exploring the Domain of Tort Law contributes valuable new evidence to the tort law reform debate It will be of interest to academic lawyers and economists policy analysts policy professionals in government and research organizations and all those affected by tort law reform

In the tradition of the Policy Studies Review Annual series Volume Eight continues to offer the best of recent writing and analysis in a number of policy relevant area Indeed reflecting the shifting nature of policy debates and public attention Volume Eight has introduced seven entirely new substantive areas including such sensitive issues as the viability of the safety net information policy work and labor policy immigration policy and environmental policy The volume is also characterized by explicit attention to two critical aspects of the policy analysis craft the strengths and weaknesses of various methodological approaches and the role noneconomic factors should play in economic policy analysis Drawing from such public sector administrators as William Ruckelshaus and Eleanor Chelimsky academic policy analysts such as Martin Feldstein and Irving Louis horowitz and two congressional support agencies CBO and GAO the volume provides the most timely and relevant assessments of current policy issues It also provides the reader with a framework within which to approach substantie areas as widely disparate as national security and health care The volume is an indispensable tool for those who seek to sort through the confusions and contradictions of present policy statements in order to gain a cogent view of how these and other issues are framed and what viable policy options are available Contents partial METHODS FOR POLICY ANALYSIS S Rosen S Tolchin D McCaffrey J Hall P Dommel S Kelman NONECONOMIC FACTORS IN ECONOMIC POLICY MAKING A Etzioni A Bhattacharya J Fel dman M Fedstein THE SAFETY NET AS PUBLIC POLICY Congressional Budget Office C Murray U S General Accounting Office R Struyk R K Weaver WORK AND LABOR POLICY S Levitan D Bresnik L Datta HEALTH POLICY AND COST CONTAINMENT V Fuchs B B Torrey J Lave DEFENSE AND NATIONAL SECURITY POLICY S Deitchman H Brown R Art D Robertson J Steinbruner I L Horowitz C Danopoulos INFORMATION POLICY E Chelimsky L Perlman R J Perlman P Lengyel ENVIRONMENTAL POLICY W Ruckelshaus M Kraft N Vig R C Kearney J J Stucker W K Viscusi IMMIGRATION POLICY R Mines P Martin E Bean T Sullivan D G Papademetriou *Workers' Compensation Insurance Pricing* David Appel, Philip S. Borba, 2013-04-17 *Economics of Regulation and Antitrust, fourth edition* W. Kip Viscusi, John M. Vernon, Joseph E. Harrington, Jr., 2005-08-19 A substantially revised and updated new edition of the leading text on business and government with new material reflecting recent theoretical and methodological advances includes further coverage of the Microsoft antitrust case the deregulation of telecommunications and electric power and new environmental regulations This new edition of the leading text on business and government focuses on the insights economic reasoning can provide in analyzing regulatory and antitrust issues Departing from the traditional emphasis on institutions Economics of Regulation and Antitrust asks how economic theory and empirical analyses can illuminate the character of market operation and the role for government action and brings new developments in theory and empirical methodology to bear on these questions The fourth edition has been substantially revised and updated throughout with new material added and extended discussion of many topics Part I on antitrust has been given a major revision to reflect advances in economic theory and recent antitrust cases including the case against Microsoft and the Supreme Court s Kodak decision Part II on economic regulation updates

its treatment of the restructuring and deregulation of the telecommunications and electric power industries and includes an analysis of what went wrong in the California energy market in 2000 and 2001 Part III on social regulation now includes increased discussion of risk analysis and extensive changes to its discussion of environmental regulation The many case studies included provide students not only pertinent insights for today but also the economic tools to analyze the implications of regulations and antitrust policies in the future The book is suitable for use in a wide range of courses in business law and public policy for undergraduates as well as at the graduate level The structure of the book allows instructors to combine the chapters in various ways according to their needs Presentation of more advanced material is self contained Each chapter concludes with questions and problems

Economics of Regulation and Antitrust, fifth edition W. Kip Viscusi, Joseph E. Harrington, Jr., David E. M. Sappington, 2018-08-14 A thoroughly revised and updated edition of the leading textbook on government and business policy presenting the key principles underlying sound regulatory and antitrust policy Regulation and antitrust are key elements of government policy This new edition of the leading textbook on government and business policy explains how the latest theoretical and empirical economic tools can be employed to analyze pressing regulatory and antitrust issues The book departs from the common emphasis on institutions focusing instead on the relevant underlying economic issues using state of the art analysis to assess the appropriate design of regulatory and antitrust policy Extensive case studies illustrate fundamental principles and provide insight on key issues in regulation and antitrust policy This fifth edition has been thoroughly revised and updated reflecting both the latest developments in economic analysis and recent economic events The text examines regulatory practices through the end of the Obama and beginning of the Trump administrations New material includes coverage of global competition and the activities of the European Commission recent mergers including Comcast NBC Universal antitrust in the new economy including investigations into Microsoft and Google the financial crisis of 2007 2008 and the Dodd Frank Act the FDA approval process climate change policies and behavioral economics as a tool for designing regulatory strategies

Product Liability Entering the Twenty-First Century Michael J. Moore, W. Kip Viscusi, 2004-05-13 Are liability crises an inevitable part of the modern industrial landscape Does the inherent nature of the insurance industry promote recurring liability crises What have been the effects of the liability reforms of the 1990s Should lawyers be given de facto regulatory authority This report provides perspective on these and other key issues concerning the law and economics of products liability The authors begin with a brief description of the evolution of products liability doctrine in the U S up to the point of the liability crisis of the late 1980s They discuss the economic implications of product risk for both consumers and producers offer economic hypothesis on the implications of the increased scope of liability and subsequent reforms and provide an update of trends in litigation and liability law The book ends with a discussion of pending legislation and prospects for further improvements Moore and Viscusi make the point that effective liability policy calls for a balancing of the incentives for improved public safety on one hand and the benefits of new and
