Council (U.S.). Panel on Adolescent Pregnancy and Childbearing, 1987 Adolescent Sexual Behavior and Childbearing

Laurie Schwab Zabin, Sarah C. Hayward, 1993 The topic of adolescent pregnancy and childbearing encompasses issues related to sexual activity development and parenting each with its own consequences This volume integrates these issues by examining research from diverse perspectives the authors discuss the biological sociocultural and interpersonal forces that impinge on adolescents The volume focuses on patterns of sexual activity contraceptive use abortion single parenthood adolescent relationships prenatal care and interventions to prevent unwanted adolescent pregnancies Risking the Future

National Research Council Staff, 1987 *Risking the Future; Adolescent Sexuality, Pregnancy, and Childbearing* National Research Childbearing, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1987 02 edition Excerpt younger students use increased more the longer their exposure to the program suggesting that early risk can be reduced with early access to services Finally increased and prompt clinic attendance and increased use of contraception appear to have had a significant impact on pregnancy While conceptions increased dramatically in the control group schools during this period from 32 to 51 percent in the program schools conceptions dropped by 26 percent Zabin et al 1986 The Self Center model differs somewhat from the typical school based clinic Nevertheless if these results can be replicated in other settings they give solid support to the school based clinic movement This program suggests that the provision of free proximate contraceptive services that are linked to a strong education component may accelerate contraceptive behavior among sexually active teenagers without encouraging sexual intercourse among those who are not personally ready for such involvement Further efforts to test this model and compare it with the typical school based clinic model are needed

Pregnancy Testing and Counseling Pregnancy testing is available to teenagers in public health centers hospitals family planning clinics and abortion clinics from private physicians and even at many drugstores This service is generally provided at little or no cost to the client In addition home pregnancy tests are becoming increasingly popular among teenagers as well as adult women because they afford an opportunity to detect a suspected pregnancy in privacy at relatively low cost Although they are not a substitute for laboratory testing and a pelvic exam home tests are generally an accurate indicator of pregnancy when properly used Teenagers **Sexuality in Adolescence** Susan Moore, Doreen Rosenthal, 1993 Susan Moore and Doreen Rosenthal review current work on adolescent sexual development including data from their own studies on sexual risk taking and the social contexts in which young people form their sexual beliefs **HIV, AIDS, and Childbearing** Ruth R. Faden, Nancy E. Kass, 1996 Whether with whom and when to have children are among the most precious of our private decisions Increasingly however the interest of others in these decisions raise difficult questions about the role of government and health professionals in influencing reproductive choice Nowhere is this tension felt more keenly than in the context of HIV and AIDS This book takes on the tough issues related to HIV and childbearing Is there a moral right to have children

What are the limits of persuasion Are there constitutional constraints on interference with reproduction What are the precedents with restricting the childbearing behavior of women who use drugs The book includes original work by doctors lawyers ethicists and public health professionals Also included are the experiences of HIV infected women and their health care providers Interviews were conducted over a two year period with HIV infected women and with health care providers from four cities to examine what issues of childbearing in the context of HIV mean to them The book is divided into four sections on medical and public health issues legal issues ethical and social issues and comments from the community It concludes with recommendations for clinical practice and public policy Public policy makers health care providers practitioners in bioethics pediatrics health law and obstetrics gynecology will find this book invaluable when dealing with issues related to HIV and childbearing

Improving The Life Chances Of Children At Risk David E. Rogers,2019-03-01 This book discusses how to identify those children who are at hazard of becoming less than they might be as adults It explores critical policy issues in broadening access to health care services and reassessing results of major intervention efforts for improving life chances of vulnerable children

Risks and Problem Behaviors in Adolescence Richard M. Lerner,Christine M. Ohannessian,2014-02-04 The articles in this volume illustrate how development is propelled by the bidirectional relations that occur between the person and all levels of the context The authors argue that adolescent life is embedded in a complicated developmental system involving multiple features of the individual e g biology emotions personality and cognition and the multiple levels of his or her social ecology e g peers family school the workplace and the public policy and legal systems that structure and impact behavioural opportunities for and the actions of adolescents These articles have important implications for the design of interventions aimed at adolescent problem behaviours

Adolescent Health: Background and the effectiveness of selected prevention and treatment services ,1991 This three volume work presents the Office of Technology s assessment of the physical emotional and behavioral health status of contemporary American adolescents including those living in poverty racial and ethnic minority groups Native Americans and rural adolescents Specific topics covered are identifying risk and protective factors for adolescent health problems evaluating options in the organization of health services and technologies available to adolescents assessing options in the conduct of national health surveys to improve collection of adolescent health statistics and identifying gaps in research on the health and behavior of adolescents
