Ritual And Religion In The Making Of Humanity:

Ritual and Religion in the Making of Humanity Roy A. Rappaport, 1999-03-25 Roy Rappaport argues that religion is central to the continuing evolution of life although it has been displaced from its original position of intellectual authority by the rise of modern science His book which could be construed as in some degree religious as well as about religion insists that religion can and must be reconciled with science Combining adaptive and cognitive approaches to the study of humankind he mounts a comprehensive analysis of religion s evolutionary significance seeing it as co extensive with the invention of language and hence of culture as we know it At the same time he assembles the fullest study yet of religion s main component ritual which constructs the conceptions which we take to be religious and has been central in the making of humanity s adaptation The text amounts to a manual for effective ritual illustrated by examples drawn from anthropology history philosophy comparative religion and elsewhere *Ritual and Religion in the Making of Humanity* Roy A.

Rappaport, 1999 **Ritual and Religion in the Making of Humanity**, 2001 *Ritual and Religion in the Xunzi* T. C. Kline III, Justin Tiwald, 2014-06-12 Xunzi a founding figure in the Confucian tradition is one of the world s great philosophers and theorists of religion For much of the last century his work has been seen largely as critical of religion particularly the popular beliefs and invocations of supernatural forces that underpin so many religious rituals Contributors to this volume challenge this view and offer a more sophisticated picture of Xunzi He emerges not as critic but rather as an adherent of religion who seeks to give religious practices meaning even though many religious beliefs are mistaken or self serving Each essay offers a powerful illustration of Xunzi as both a religious devotee and as a philosopher of religion drawing on a wide array of disciplines and methodologies **Whenever They Prayed** Rodney A. Werline, 2021-10-11 In *Whenever They Prayed* Dimensions of New Testament Prayer Rodney A Werline shifts the scholarly approach to New Testament prayer from source and genre analyses to seeing prayer as a cultural practice bringing new dimensions of the prayers to light Assisted by ritual theorists such as Catherine Bell Pierre Bourdieu Talal Assad and Roy Rappaport Werline illuminates the genius of the New Testament authors and the members of their communities Through years of embodied practice these authors and members acquired an aptitude that humans uniquely possess the ability through ritual practice to navigate and maintain their relationships with one another and together with their God Werline especially focuses on how their actions brought cultural memory to life assisted in receiving revelations protected them from demonic powers and established and fulfilled their obligations to one another and to that God The full import of these observations however is not possible without placing the prayers within their Second Temple Jewish context Jewish prayers outside the New Testament should not function as mere background but as evidence of a grand cultural enterprise taking place in which members of the early church actively participated *Religion as a Human Capacity* Timothy Light, Brian C. Wilson, 2018-08-14 Prepared in honor of E Thomas Lawson the essays in *Religion as a Human Capacity* represent diverse points of view in the study of religion today Part I

Theoretical Studies offers a broad range of cognitivist theoretical explorations while Part II Studies in Religious Behavior presents cutting edge applications of cognitive and other contemporary theories to religious data This volume celebrates Lawson s critical contributions to cognitive studies of religion and the degree to which his ultimate goal of scholarship as a search for truth is matched by those who have been his colleagues and been influenced by him Religion as a Human Capacity will be of interest to all those concerned with theory and method in the academic study of religion Magical Thinking Stuart McWilliams,2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present Death Rituals and Politics in Northern Song China Mihwa Choi,2017-10-03 In traditional China a funeral and the accompanying death rituals represented a critical moment for the immediate family of the deceased to show their filial piety a core value of the society At the same time death rituals were social occasions and channels for the outward demonstration of belief in a religiously pluralistic society During the Northern Song period however death rituals increasingly became an arena for political contention as attempts were made to transform these practices from a private matter into one subject to state control Death Rituals and Politics in Northern Song China examines how political confrontations over the proper conduct of death rituals during Northern Song dynasty 960 1127 inaugurated a period of Confucian revivalism Mihwa Choi interprets Northern Song court politics family ritual practices burial practices and the popular imagination of the afterlife as sites of contest between groups of varying social status political vision and religious belief She demonstrates that the oversight of ritual affairs by scholar officials helped them gain the political upper hand they sought and more broadly fostered a revival of Confucianism as the dominant value system of Chinese society in the period that followed The Oxford Handbook of Early Christian Ritual Rikard Roitto,2018-10-31 Scholars of religion have long assumed that ritual and belief constitute the fundamental building blocks of religious traditions and that these two components of religion are interrelated and interdependent in significant ways Generations of New Testament and Early Christian scholars have produced detailed analyses of the belief systems of nascent Christian communities including their ideological and political dimensions but have by and large ignored ritual as an important element of early Christian religion and as a factor contributing to the rise and the organization of the movement In recent years however scholars of early Christianity have begun to use ritual as an analytical tool for describing and explaining Christian origins and the early history of the movement Such a development has created a momentum toward producing a more comprehensive volume on the ritual world of Early Christianity employing advances made in the field of ritual studies The Oxford Handbook of Early Christian Ritual gives a manifold account of the ritual world of early Christianity from the beginning of the movement up to the fifth century The volume introduces relevant theories and approaches central topics of ritual life in the cultural world of early Christianity and important Christian ritual themes and practices in emerging Christian groups and factions **An Archaeology of Religion** Kit W. Wesler,2012-04-20 Archaeologists have been increasingly turning their attention to the

study of religion but the field so far has lacked a cross cultural overview This text challenges archaeological conventions by refusing to respect the geographic and temporal boundaries with which archaeologists too often define their field Worldwide in range and comparative in perspective this exploration is guided by several fundamental questions how do we recognize religion in the archaeological record When should we recognize the first activities we call religious What distinguishes a world religion How can we see the formations of modern world religions in the archaeological record An Archaeology of Religion begins with the first glimmers of what might be considered religious expression in the Paleolithic period and concludes with the complexities of world religions today This book is an ambitious attempt to survey how scholars approach the identification of religious sites and practices in the archaeological record **Defining the Sacred** Nicola

Laneri,2015-05-08 Religion is a phenomenon that is inseparable from human society It brings about a set of emotional ideological and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features These include the establishment of intermediaries in the relationship between humans and the divine the construction of ceremonial places for worshipping the gods and practicing ritual performances and the creation ritual paraphernalia Investigating the religious dimensions of ancient societies encounters problems in defining such elements especially with regard to societies that lack textual evidences and has tended to lead towards the identification of differentiation between the mental dimension related to religious beliefs and the material one associated with religious practices resulting in a separation between scholars able to investigate and possibly reconstruct ritual practices i e archaeologists and those interested in defining the realm of ancient beliefs i e philologists and religious historians The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies This approach requires that a higher consideration be given to those elements either artificial buildings objects texts etc or natural landscapes animals trees etc that are created through a materialization of religious beliefs and practices enacted by members of communities These issues are addressed in a series of specific case studies covering a broad chronological framework that from the Pre pottery Neolithic to the Iron Age Cover illustration German Archaeological Institute photo N Becker *World History Encyclopedia [21 volumes]* Alfred J. Image and Imagination in the Phenomenology of Religious Experience Martin Nitsche, Olga Louchakova-Schwartz, 2023 While human beings have probably always been fascinated by images we live in an image obsessed age in which images powerfully shape our lives The writers in this volume are keenly attentive to the ways in which we all are both image bearers and image makers Although their reflections often arise from and relate explicitly to religious imagery their explorations have much wider implications They delve deeply into such issues as the ways in which images both reveal and conceal the ways in which images are interpreted and the ways in which we use images to define ourselves and tell our stories This is a powerful volume full of thought provoking analyses of the phenomenon of the image and its role in human being in the world Topics such as embodiment mysticism ritual touch creation and suffering are explored with sensitivity nuance and insight In short the authors show us a great deal about how images embody whatever it is we take to be sacred Bruce Ellis Benson University of Nottingham This volume presents new findings on religious images in their relationship to appearance and phenomenality to being transcendence liminality reduction original self giving evidence and other topics of regressive and constitutive phenomenology Drawing on Christian Islamic and cross cultural folk testimony the volume creates an incisive reference that opens new avenues for phenomenological research

Death Rituals, Ideology, and the Development of Early Mesopotamian Kingship Andrew C. Cohen, 2005-10-01 At the beginning of Mesopotamia s Early Dynastic period the political landscape was dominated by temple administrators but by the end of the period rulers whose titles we translate as king assumed control This book argues that the ritual process of mourning burying and venerating dead elites contributed to this change Part one introduces the rationale for seeing rituals as a means of giving material form to ideology and hence structuring overall power relations Part two presents archaeological and textual evidence for the death rituals Part three interprets symbolic objects found in the Royal Cemetery of Ur showing they reflect ideological doctrines promoting the office of kingship This book will be particularly useful for scholars of Mesopotamian archaeology and history

Religion and Science as Forms of Life Carles Salazar, Joan Bestard, 2015-01-01 The relationships between science and religion are about to enter a new phase in our contemporary world as scientific knowledge has become increasingly relevant in ordinary life beyond the institutional public spaces where it traditionally developed The purpose of this volume is to analyze the relationships possible articulations and contradictions between religion and science

as forms of life ways of engaging human experience that originate in particular social and cultural formations Contributions use this theoretical and ethnographic research to explore different scientific and religious cultures in the contemporary world *Ecology and the Sacred* Roy A. E. Brashier, 2020-10-26 In early imperial China the dead were remembered by stereotyping them by relating them to the existing public memory and not by vaunting what made each person individually distinct and extraordinary in his or her lifetime Their posthumous names were chosen from a limited predetermined pool their descriptors were derived from set phrases in the classical tradition and their identities were explicitly categorized as being like this cultural hero or that sage official in antiquity In other words postmortem remembrance was a process of pouring new ancestors into prefabricated molds or stamping them with rigid cookie cutters Public Memory in Early China is an examination of this pouring and stamping process After surveying ways in which learning in the early imperial period relied upon memorization and recitation K E Brashier treats three definitive parameters of identity name age and kinship as ways of negotiating a person s relative position within the collective consciousness He then

examines both the tangible and intangible media responsible for keeping that defined identity welded into the infrastructure of Han public memory
