whether explanations are clearly identified whether students feel particular teaching assisted them in understanding the subject matter Without student understanding no explanation can be said to be clear We see explanation in a much broader sense Communication in school is a mutual interchange of information among teachers and students students and students during the educational process i e students have an active role in the whole process Mares K ivohlav 1995 Using explanation in a mathematics classroom is a normal procedure but its roles and forms vary Predominantly explanation is seen as a tool for describing relevant phenomena developing students logical thinking and guiding students by inductive judgement to generalizing It leads to clarifying interrelations demonstrating and justifying Skalkov 1999 p 172 Here everything is discussed in a simple manner So this general discussion about different aspects of Teaching Methodology may help the people of the nation and the teachers of the world
