Arithmetical Properties of Commutative Rings and Monoids Scott T. Chapman, 2005-03-01 The study of nonunique factorizations of elements into irreducible elements in commutative rings and monoids has emerged as an independent area of research only over the last 30 years and has enjoyed a recent flurry of activity and advancement This book presents the proceedings of two recent meetings that gathered key researchers from around the world *Rings, Modules, Algebras, and Abelian Groups* Alberto Facchini, Evan Houston, Luigi Salce, 2020-02-10 Rings Modules Algebras and Abelian Groups summarizes the proceedings of a recent algebraic conference held at Venice International University in Italy Surveying the most influential developments in the field this reference reviews the latest research on Abelian groups algebras and their representations module and ring theory and topological *Differential Equations And Control Theory* Sergiu Aizicovici, Nicolae H. Pavel, 2001-10-02 Provides comprehensive coverage of the most recent developments in the theory of non Archimedean pseudo differential equations and its application to stochastics and mathematical physics offering current methods of construction for stochastic processes in the field of p adic numbers and related structures Develops a new theory for parabolic equations over non Archimedean fields in relation to Markov processes **Homotopy Methods in Topological Fixed and Periodic Points Theory** Jerzy Jezierski, Wacław Marzantowicz, 2006-01-17 The notion of a fixed point plays a crucial role in numerous branches of mathematics and its applications Information about the existence of such points is often the crucial argument in solving a problem In particular topological methods of fixed point theory have been an increasing focus of interest over the last century These topological methods of fixed point theory are divided roughly speaking into two types The first type includes such as the Banach Contraction Principle where the assumptions on the space can be very mild but a small change of the map can remove the fixed point The second type on the other hand such as the Brouwer and Lefschetz Fixed Point Theorems give the existence of a fixed point not only for a given map but also for any its deformations This book is an exposition of a part of the topological fixed and periodic point theory of this second type based on the notions of Lefschetz and Nielsen numbers Since both notions are homotopy invariants the deformation is used as an essential method and the assertions of theorems typically state the existence of fixed or periodic points for every map of the whole homotopy class we refer to them as homotopy methods of the topological fixed and periodic point theory **Stochastic Processes and Functional Analysis** Alan C. Kriel, Randall J. Swift, 2004-03-23 This extraordinary compilation is an expansion of the recent American Mathematical Society Special Session celebrating M M Rao's distinguished career and includes most of the presented papers as well as ancillary contributions from session invitees This book shows the effectiveness of abstract analysis for solving fundamental problems of stochastic **Finite or Infinite Dimensional Complex Analysis** Joji Kajiwara, Zhong Li, Kwang Ho Shon, 2019-05-07 This volume presents the proceedings of the Seventh International Colloquium on Finite or Infinite Dimensional Complex Analysis held in Fukuoka Japan The contributions offer multiple perspectives and numerous research examples on complex variables Clifford algebra variables hyperfunctions and
