Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field **Perspectives on Method and Theory in the Study of Religion** Armin Geertz, Russel McCutcheon, 2000-04-20 This volume collects select papers on methodology in the study of religion that were originally presented at the XVIIth Congress of the International Association for the History of Religions held in Mexico City in 1995 Granted the status of adjunct proceedings for the Congress the collection opens with the editors

detailed survey of the longstanding importance of discussions on methodology within the IAHR The twenty one essays which follow examine religion and the history of the study of religion within a variety of theoretical contexts The essays are organized in terms of three general sub divisions general issues in methodology from the impact of both postmodernism and reflexive anthropology on the study of religion to the politics of religious studies as practiced in different national settings reflections on the categories commonly employed by scholars working in the field e g religion syncretism gender New Religious Movements sacred power experience etc and finally the collection ends with a review symposium on one of the more sophisticated recent treatments of the problem of defining religion Benson Saler's *Conceptualizing Religion* Brill 1993 Despite carrying out their work in a variety of settings from Denmark and Finland to Britain Switzerland Germany Canada the USA and Mexico the authors all model a similar approach to studying religion as but one instance of human culture

Religion and Society in Middle Bronze Age Greece Hélène Whittaker, 2014-05-12 The Middle Helladic period has received little attention partially because of scholars view of it as merely the prelude to the Mycenaean period and partially because of the dearth of archaeological evidence from the period In this book Hélène Whittaker demonstrates that Middle Helladic Greece is far more interesting than its material culture might at first suggest Whittaker comprehensively reviews and discusses the archaeological evidence for religion on the Greek mainland focusing on the relationship between religious expression and ideology The book argues that religious beliefs and rituals played a significant role in the social changes that were occurring at the time The arguments and conclusions of this book will be relevant beyond the Greek Bronze Age and will contribute to the general archaeological debate on prehistoric religion

The Emergence of Religion in Human Evolution Margaret Boone Rappaport, Christopher J. Corbally, 2019-12-09 Religious capacity is a highly elaborate neurocognitive human trait that has a

solid evolutionary foundation This book uses a multidisciplinary approach to describe millions of years of biological innovations that eventually give rise to the modern trait and its varied expression in humanity's many religions The authors present a scientific model and a central thesis that the brain organs networks and capacities that allowed humans to survive physically also gave our species the ability to create theologies find sustenance in religious practice and use religion to support the social group Yet the trait of religious capacity remains non obligatory like reading and mathematics The individual can choose not to use it The approach relies on research findings in nine disciplines including the work of countless neuroscientists paleoneurologists archaeologists cognitive scientists and psychologists This is a cutting edge examination of the evolutionary origins of humanity's interaction with the supernatural It will be of keen interest to academics working in Religious Studies Neuroscience Cognitive Science Anthropology Evolutionary Biology and Psychology

The Reform Advocate, 1916 **Religion at Work in a Neolithic Society** Ian Hodder, 2014-02-10 This book tackles the topic of religion a broad subject exciting renewed interest across the social and historical sciences The volume is tightly focused on the early farming village of atalhyk which has generated much interest both within and outside of archaeology especially for its contributions to the understanding of early religion The volume discusses contemporary themes such as materiality animism object vitality and material dimensions of spirituality while at the same time exploring broad evolutionary changes in the ways in which religion has influenced society The volume results from a unique collaboration between an archaeological team and a range of specialists in ritual and religion *French Bibliographical Digest*, 1953
