can guide users in modelling processes to target the existing problems The question is addressed by following a research methodology of design sciences Amongst others it includes a detailed analysis of the research problem a definition of the objective the design and development of solutions and an evaluation of the developed concepts In summary the thesis presents innovative concepts to support modellers and provides a step towards end user enablement in process modelling

Object-Oriented Technology. ECOOP '98 Workshop Reader Serge Demeyer,Jan Bosch,2003-07-31 At the time of writing mid October 1998 we can look back at what has been a very successful ECOOP 98 Despite the time of the year in the middle of what is traditionally regarded as a holiday period ECOOP 98 was a record breaker in terms of number of participants Over 700 persons found their way to the campus of the Brussels Free University to participate in a wide range of activities This 3rd ECOOP workshop reader reports on many of these activities It contains a careful selection of the input and a cautious summary of the outcome for the numerous discussions that happened during the workshops demonstrations and posters As such this book serves as an excellent snapshot of the state of the art in the field of object oriented programming About the diversity of the submissions A workshop reader is by its very nature quite diverse in the topics covered as well as in the form of its contributions This reader is not an exception to this rule as editors we have given the respective organizers much freedom in their choice of presentation because we feel form follows content This explains the diversity in the types of reports as well as in their lay out

Software Fault Prediction Sandeep Kumar,Santosh Singh Rathore,2018-06-06 This book focuses on exploring the use of software fault prediction in building reliable and robust software systems It is divided into the following chapters Chapter 1 presents an introduction to the study and also introduces basic concepts of software fault prediction Chapter 2 explains the generalized architecture of the software fault prediction process and discusses its various components In turn Chapter 3 provides detailed information on types of fault prediction models and discusses the latest literature on each model Chapter 4 describes the software fault datasets and diverse issues concerning fault datasets when building fault prediction models Chapter 5 presents a study evaluating different techniques on the basis of their performance for software fault prediction Chapter 6 presents another study evaluating techniques for predicting the number of faults in the software modules In closing Chapter 7 provides a summary of the topics discussed The book will be of immense benefit to all readers who are interested in starting research in this area In addition it offers experienced researchers a valuable overview of the latest work in this area

Real-Time Massive Model Rendering Sung-eui Yoon,Enrico Gobbetti,David Kasik,Dinesh Manocha,2022-06-01 Interactive display and visualization of large geometric and textured models is becoming a fundamental capability There are numerous application areas including games movies CAD virtual prototyping and scientific visualization One of observations about geometric models used in interactive applications is that their model complexity continues to increase because of fundamental advances in 3D modeling simulation and data capture technologies As computing power

increases users take advantage of the algorithmic advances and generate even more complex models and data sets Therefore there are many cases where we are required to visualize massive models that consist of hundreds of millions of triangles and even billions of triangles However interactive visualization and handling of such massive models still remains a challenge in computer graphics and visualization In this monograph we discuss various techniques that enable interactive visualization of massive models These techniques include visibility computation simplification levels of detail and cache coherent data management We believe that the combinations of these techniques can make it possible to interactively visualize massive models in commodity hardware
