Metropolis and Hinterland Neville Morley, 2002-12-19 Ancient Rome was one of the greatest cities of the pre industrial era Like other such great cities it has often been deemed parasitic a drain on the resources of the society that supported it Rome s huge population was maintained not by trade or manufacture but by the taxes and rents of the empire It was the archetypal consumer city However such a label does not do full justice to the impact of the city on its hinterland This book examines the historiography of the consumer city model and reappraises the relationship between Rome and Italy Drawing on archaeological work and comparative evidence the author shows how the growth of the city can be seen as the major influence on the development of the Italian economy in this period as its demands for food and migrants promoted changes in agriculture marketing systems and urbanisation throughout the peninsula *Metropolis and Hinterland* Neville Daniel
