Metropolisation Et Develo:

Métropolisation, crise écologique et développement durable Michel Bassand, 2000-01-01
Métropolisation, crise écologique et développement durable sont trois enjeux fondamentaux du monde contemporain. La métropolisation est l'une des causes essentielles de la crise écologique mondiale. Le développement durable quant à lui est considéré comme une stratégie réaliste et efficace pour sortir de cette crise. Cette problématique est l'origine d'une recherche interdisciplinaire menée par des chercheurs de deux hautes écoles suisses et de diverses institutions savonaises sur la métropole de Ho Chi Minh Ville. Cet ouvrage en présente les principaux résultats. Cette analyse fouille d'une métropole du Sud est faite sous l'angle des questions de l'habitat précaire et de l'eau. Ho Chi Minh Ville du fait de sa difficile planification est en effet exemplaire d'une crise urbaine qui s'exprime dans les rapports entre métropolisation, pollution de l'eau et gestion de l'habitat précaire. Même si chaque métropole est unique, les auteurs de cette recherche essentielle nous rappellent que le développement durable mis en œuvre à Ho Chi Minh Ville peut être appliqué au monde entier, que les pays du Nord ont leur part de responsabilité dans l'actuel état des choses et qu'ils doivent inventer avec les pays du Sud un autre mode de développement que celui exercé jusqu'à présent. L'ouvrage s'adresse tous ceux qui ingénieurs, architectes, urbanistes ou experts en sciences sociales sont désireux de comprendre les enjeux de la globalisation. *Metropolitan Economic Development* Alejandra Trejo Nieto, José L. Niño-Amézquita, 2019-08-28
Metropolitan areas are home to a significant proportion of the world's population and its economic output. Taking Mexico as a case study and weaving in comparisons from Latin America and developed countries, this book explores current trends and policy issues around urbanisation, metropolitan economic development and city region governance. Despite their fundamental economic relevance, the analysis and monitoring of metropolitan economies in Mexico and other countries in the Global South under a comparative perspective are relatively scarce. This volume contains empirical analysis based on comparative perspectives with relation to international experiences. It will be of interest to advanced students, researchers and policymakers in urban policy, urban economics, regional studies, economic geography and Latin American studies. Entre la métropolisation et le village global Jean-Marc Fontan, Juan-Luis Klein, 1999-11-04
19:00:00-05:00 Quelles conditions jouent en faveur du développement ou du mal développement des espaces métropolitains ? une époque où les métropoles constituent des entités intermédiaires et de plus en plus détachées de leur espace national, elles participent spécifiquement à la production de la mondialité et demandent véritablement des outils d'analyse adaptés. Cet ouvrage constitue un nouveau maillon dans l'élaboration d'un tel modèle en apportant une lecture transdisciplinaire à la question du développement de l'espace métropolitain. **Border Futures-Zukunft Grenze-Avenir Frontière** Karina Pallagst, Andrea Hartz, Beate Caesar, 2022-05-12
What current discourses are relevant for border areas? What opportunities for and obstacles to integrated territorial development arise from the specific situation of border regions? How can these be utilised or overcome in a goal-oriented way? These questions were central to the discussions of the Border

Futures working group Border regions like the Greater Region or the Trinational Metropolitan Region of the Upper Rhine extend far beyond the immediate border area While institutional structures of cooperation can be perpetuated through agreements and organisations there is a lack of instruments which cross border cooperation structures can deploy in response to changing situations Cross border cooperation faces new challenges from increasing cross border interactions processes of economic structural transformation new energy policies in the national sub spaces and demographic change Another factor is increasing spatial polarisation which influences the further development and future viability of the affected border areas and involves metropolisation issues in urban centres and the provision of public services in rural districts Building on discussions of the Border Futures working group this volume sheds light on cross border cooperation in practice with recent research relevant to planning in border regions in the European context The insights collected here are intended to be usable in the border areas within the territory of the Regional Working Group and should also contribute towards the broader specialist discourse on the further development of cross border cooperation Issues of sustainable cross border governance new spatial functions and new planning instruments play a role here as do the possibilities provided by the current EU structural policy programming period for border areas

Metropolitan Commuter Belt Tourism Michał Jacenty Sznajder, 2017-05-18 With the current rise of metropolitan regions as a present location and driver of the development of rural tourism agritourism food tourism and nature tourism there is a need to analyse the major economic social political and managerial aspects of these types of tourism which occur within the rural urban fringe This book establishes a current inventory and appropriate future selection of commuter belt tourism products for metropolitan areas It also explains how public and private resources can be combined to achieve synergistic effects in tourism promotion and provides a structural analysis for the proper management of tourist organisations in metropolitan areas Additionally there is insight into how the development of metropolitan areas affects rural tourism and agritourism within broader social economic and environmental relations The issue of the growth of metropolitan areas which is a complex and multifaceted challenge is elaborated on with diverse examples in Poland and further afield This is valuable reading for students researchers and academics of tourism as well as rural and urban studies business management farm management and leisure studies

Bavaria Tobias Chilla, Franziska Sielker, 2022-04-14 There are a number of reasons for considering the cross border dimension of Bavaria's spatial development at the present time. First there is a new awareness of cross border development issues on the level of the federal state of Bavaria. This is particularly related to the border between Bavaria and the Czech Republic which is so historically and politically complex that it has long been difficult to address on the Prague-Munich diplomatic level. Tangible developments have recently been seen here on the middle level. At the same time the start of the macro regional strategy EUSALP has led to increased discussion of spatial development instruments in the Alpine region. Second the significance of borders was placed on the political agenda with unexpected force by the flows of refugees that largely began in 2015. After many years of widespread talk of a borderless Europe debates about refugee policies and border controls have made clear that the internal European borders still have considerable political significance. In Bavaria this mainly affects its border region with Austria. Third a new impetus in cross border cooperation on the European level can be identified in recent years: the focus was on activities in the immediate border area based on INTERREG A and Euroregions. These remain important but there is also a new impetus on the higher level where macro regions and numerous bilateral and multilateral forms of cooperation are creating new constellations. In Bavaria this can be seen particularly in the relatively new European Region of Danube-Vltava and through involvement in the Danube and Alpine macro regions. Did the Millennium

Development Goals Work? Manmohan Agarwal, Hany Besada, Leah McMillan, Polonenko, 2017-09-20 With the target date for the Millennium Development Goals (MDGs) behind us this book asks: did they work? And what happens next? Arguing that to effectively look forward we must first look back the editors of this insightful book gather leading scholars and practitioners from a range of backgrounds and regions to provide an in depth exploration of the MDG project and its impact. Contributors use region specific case studies to explore the effectiveness of the MDGs in addressing the root causes of poverty including resource geographies, early childhood development and education, women's rights and disability rights as well as the impact of the global financial crisis and Arab Spring on MDG attainment. Providing a critical assessment that seeks to inform future policy decisions the book will be valuable to those working in the development community as well as to academics and students of international development, international relations and development economics. **Développement durable et**

aménagement du territoire Antonio da Cunha, Jean Ruegg, 2003-01-01 L'expression de développement durable jouit d'un engouement certain au point de devenir incontournable dans bon nombre de domaines touchant les politiques publiques. L'objectif de cet ouvrage est de comprendre et de mesurer plus précisément son apport pour l'aménagement du territoire pris au sens large. D'une manière générale nos territoires connaissent des transformations importantes liées notamment à la mondialisation économique, la mobilité, l'émergence de nouveaux processus d'exclusion sociale et aux limites environnementales. Il en résulte différents phénomènes comme la difficulté croissante à établir une distinction pertinente entre ville et campagne ou entre cultures urbaine et rurale qui posent de véritables défis en termes de régulation territoriale. Cet ouvrage rassemble une

vingtaine de contributions de scientifiques et de praticiens qui sont intervenus dans le cadre du séminaire CUSO organisé par les Instituts romands de géographie et la Communauté d'études pour l'aménagement du territoire en février 2000. Ensemble, elles ouvrent des pistes quant à la manière de gérer les villes et les régions du futur en questionnant les concepts, les méthodes ou les outils du développement durable qui seraient utiles à cette régulation.

[Planning for a Better Urban Living Environment in Asia](#) Anthony Gar-On Yeh, Mee Kam Ng, 2017-11-22. This title was first published in 2000. Asia has developed very rapidly in the last quarter of the century and will be a main focus of the world in the 21st century. With rapid growth and development, the urban areas in the region are undergoing dramatic changes. An appreciation of the heterogeneous nature of Asian cities and the related planning practices is the first step to understand various urban development problems in the region. This book is a consolidated effort by prominent scholars in Asian planning schools to explore urban development and planning practices in Asia. The book reflects on and examines some of the past and current challenges and considers future prospects of urban and regional planning, environment, housing, redevelopment and conservation, and planning education in Asia. This book should be useful to students, teachers, researchers and professionals and people who are interested in urban development, planning and environment in Asia.

Governance and Leadership in Shrinking Cities Stanisław Mazur, 2023-08-24. The aim of this publication is to look in depth at depopulation, a trend that is affecting an increasing number of cities worldwide. It has recently become a critical issue with a range of detrimental social, economic, spatial and financial consequences. However, attempts by central and local governments to combat depopulation have yet to yield satisfactory results. Compelling evidence suggests that one of the reasons for this state of affairs is that the role of local urban leadership in devising solutions, mobilizing resources and creating networks to address the problem has been underestimated. Moreover, according to the authors of this monograph, there is a significant positive correlation between urban leadership and the ability to effectively respond to and counteract the negative effects of depopulation. Without an understanding of the impact of urban leadership on the ability to address the negative consequences of urban depopulation, it is impossible to pursue effective public policies in this regard. This book presents a novel approach to explaining the ability of cities to combat depopulation through the prism of urban leadership quality. It compares domestic empirical research findings with international case studies and offers a comprehensive review of valuable practices to counter urban shrinkage and depopulation from both academic and practical perspectives. Further, the book provides a new interpretation of the processes associated with these trends. The magnitude of the phenomenon in question, the negative spatial, economic and social consequences, as well as the relatively low effectiveness of policies aimed at its mitigation, will make this book an invaluable guide for researchers and students from a wide range of disciplines, including urban studies, economics, public management, leadership studies, local government, climate change and energy transition, and urban movements. The audience will also comprise of policymakers and urban experts such as sociologists, planners, social geographers, economists and architects.

Enjeux du développement urbain durable Antonio da Cunha, 2005-01-01 Inventions humaines les villes constituent des miroirs du changement Les espaces urbains sont au cœur des processus de globalisation de transformation technologique et de recomposition économique et sociale des territoires La qualité de leurs cadres de vie l'organisation des mobilités et l'agencement de leurs formes les incidences environnementales de leurs métabolismes mais aussi leur gouvernance constituent des enjeux d'une brûlante actualité La ville n'est pas durable mais elle peut contribuer à la durabilité Comment inventer les villes de demain L'analyse des transformations urbaines récentes suggère une question majeure comment rendre la ville à la fois supportable pour la nature et l'environnement urbain vivable pour l'homme Cette publication collective laborée dans le cadre éditorial du Programme interuniversitaire Sciences Vie Société a pour objectif d'analyser les problématiques et les enjeux relatifs aux transformations des espaces urbains à l'aide du concept de développement urbain durable Elle montre de quelle façon cette notion permet de renouveler le questionnement sur les formes les structures et les dynamiques urbaines L'écologie urbaine pose de manière centrale les questions du dialogue entre les acteurs de la ville et de leur participation à la conception et la mise en œuvre du projet urbain Cette publication propose aussi un nouveau cadre d'analyse fondé sur la combinaison des politiques publiques et des droits de propriété permettant de dégager des pistes pour mieux gérer les ressources environnementales Enfin elle explore les enjeux des régulations politiques et institutionnelles dans les villes sous l'angle du développement urbain durable et de la gouvernance

Development and Territorial Restructuring in an Era of Global Change Elisabeth Peyroux, Christine Raimond, Vincent Viel, Emilie Lavie, 2023-08-22 Thinking about development and the environment simultaneously is one of the biggest scientific and societal challenges of the 21st century Understanding the interactions between biophysical systems and human activities in an era of global change requires overcoming disciplinary divides and opening up new epistemological perspectives This book explores these challenges using a territorial lens Combining various scales of analyses from global to local and contexts both urban and rural in the North and in the South it analyzes the relationships between environment and development through a variety of geographical objects i.e cities rural and agricultural areas coastlines watershed themes i.e ecological transitions food energy transport agriculture mining activities and methodologies i.e qualitative and quantitative approaches modeling in situ measurements By engaging in a dialogue between social science and natural science disciplines within different fields and with a variety of forms of knowledge production this book provides essential information for understanding and reading the complexity of a globalized world This book is targeted at academics and students in social sciences and at stakeholders in the field of territorial and environmental management
