Metropolitan Cities And Their Hinterlands In Early Modern Europe:

Capital Cities and Their Hinterlands in Early Modern Europe Peter Clark, Bernard Lepetit, 1996 This work provides an analysis of European capital cities and their impact in the early modern period Capital cities were dynamic and influential accounting for more than a third of all European city growth during the 16th and 17th centuries Some were ancient cities like Paris and London a number were new expressions of royal power such as Madrid and Berlin other were colonial cities offshoots of state empires like Dublin or Naples *The Oxford Handbook of Early Modern European History, 1350-1750* Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume I examines Peoples and Place assessing structural factors such as climate printing and the revolution in information social and economic developments and religion including chapters on Orthodoxy Judaism and Islam [Metropolitan Cities and Their Hinterlands in Early Modern Europe](#) Erik Aerts, Peter Clark, 1990 **Urban Achievement in Early Modern Europe** Patrick O'Brien, 2001-04-12 Comparative urban history examines early modern economic and cultural achievements in Antwerp Amsterdam and London **Metropolis and Hinterland** Neville Morley, 2002-12-19 Ancient Rome was one of the greatest cities of the pre industrial era Like other such great cities it has often been deemed parasitic a drain on the resources of the society that supported it Rome's huge population was maintained not by trade or manufacture but by the taxes and rents of the empire It was the archetypal consumer city However such a label does not do full justice to the impact of the city on its hinterland This book examines the historiography of the consumer city model and reappraises the relationship between Rome and Italy Drawing on archaeological work and comparative evidence the author shows how the growth of the city can be seen as the major influence on the development of the Italian economy in this period as its demands for food and migrants promoted changes in agriculture marketing systems and urbanisation throughout the peninsula **Amsterdam's Sephardic Merchants and the Atlantic Sugar Trade in the Seventeenth Century** Yda Schreuder, 2018-10-23 This book surveys the role of Amsterdam's Sephardic merchants in the westward expansion of sugar production and trade in the seventeenth century Atlantic It offers an historical geographic perspective linking Amsterdam as an emerging staple market to a network of

merchants of the Portuguese Nation conducting trade from the Iberian Peninsula and Brazil Examining the Myth of the Dutch the Sephardic Moment and the impact of the British Navigation Acts Yda Schreuder focuses attention on Barbados and Jamaica and demonstrates how Amsterdam remained Europe's primary sugar refining center through most of the seventeenth century and how Sephardic merchants played a significant role in sustaining the sugar trade **Spain, Europe, and the 'Spanish Miracle', 1700-1900** David R. Ringrose, 1998-11-26 A challenging re-examination of Spanish history questioning orthodoxies about Spain's economy and society *Port-Cities and their Hinterlands* Robert Lee, Paul McNamara, 2022-03-14 This interdisciplinary book brings together eleven original contributions by scholars in the United Kingdom continental Europe America and Japan which represent innovative and important research on the relationship between cities and their hinterlands They discuss the factors which determined the changing nature of port hinterland relations in particular and highlight the ways in which port cities have interacted and intersected with their different hinterlands as a result of both in and out migration cultural exchange and the wider flow of goods services and information Historically maritime commerce was a powerful driving force behind urbanisation and by 1850 seaports accounted for a significant proportion of the world's great cities Ports acted as nodal points for the flow of population and the dissemination of goods and services but their role as growth poles also affected the economic transformation of both their hinterlands and forelands In fact most ports irrespective of their size had a series of overlapping hinterlands whose shifting importance reflected changes in trading relations political frameworks migration patterns family networks and cultural exchange Urban historians have been criticised for being concerned primarily with self-contained processes which operate within the boundaries of individual towns and cities and as a result the key relationships between cities and their hinterlands have often been neglected The chapters in this work focus primarily on the determinants of port hinterland linkages and analyse these as distinct but interrelated fields of interaction Marking a significant contribution to the literature in this field *Port Cities and their Hinterlands* provides essential reading for students and scholars of the history of economics *Town and Country in Europe, 1300-1800* S. R. Epstein, 2001 This 2001 book was the first survey of relations between town and country across Europe between 1300 and 1800 **Urban Societies in East-Central Europe, 1500-1700** Jaroslav Miller, 2016-02-11 Whilst much has been written about early modern urban history the majority of this work has focussed on Western Europe with relatively little available in English on towns and cities in the former communist East However in recent years urban scholars have increasingly looked to a much more inclusive picture of Europe that compares and contrasts development across the whole continent Dealing primarily with Bohemia Hungary and the Polish Lithuanian Commonwealth this book provides an insight into a number of key issues concerning the economic social and demographic trends in early modern East Central European urban history Taking a supra-national perspective across a long time span it examines the effects of migration Reformation state building and economic change on the transformation of medieval urban communities into early

modern societies Drawing on a wealth of primary sources particularly the registers of new citizens kept by many towns and cities a fascinating picture of urban development and social structure is reconstructed that not only tells us much about East Central Europe but adds to our knowledge of the whole continent

Innovation and Creativity in Late Medieval and Early Modern European Cities Karel Davids,Bert De Munck,2016-05-23 Late medieval and early modern cities are often depicted as cradles of artistic creativity and hotbeds of new material culture Cities in renaissance Italy and in seventeenth and eighteenth century northwestern Europe are the most obvious cases in point But how did this come about Why did cities rather than rural environments produce new artistic genres new products and new techniques How did pre industrial cities evolve into centres of innovation and creativity As the most urbanized regions of continental Europe in this period Italy and the Low Countries provide a rich source of case studies as the contributors to this volume demonstrate They set out to examine the relationship between institutional arrangements and regulatory mechanisms such as citizenship and guild rules and innovation and creativity in late medieval and early modern cities They analyze whether in what context and why regulation or deregulation influenced innovation and creativity and what the impact was of long term changes in the political and economic sphere

The Early Modern European Economy

Peter Musgrave, 1999-06-07 Until recently study of the early modern economy in Europe has tended to have heroes and villains the former being the progressive and modern economies of the Netherlands and England and the latter being doomed backward and Catholic Italy and Spain This picture has now changed quite drastically and there is far more emphasis on the general growth of the European economy during this period The progressive removal of the neighbouring threats to European prosperity particularly the gradual crippling of Ottoman power created an environment which benefited all societies and not simply the traditionally emphasised Atlantic economies
