Mexican Government in Transition Robert Edwin Scott, 1964 **Mexican Government in Transition** Robert E. Scott, 1971 Mexico's Politics and Society in Transition Joseph S. Tulchin, Andrew D. Selee, 2003 An exploration of the interrelated trends of Mexico's transitional politics and society Offering perspectives on the problems on the Mexican agenda the authors discuss the politics of change the challenges of social development and how to build a mutually beneficial US Mexico relationship **The Mexican Political System in Transition** Wayne A. Cornelius, Ann L. Craig, 1991 *Energy Transitions in Latin America* Lira Luz Benites Lazaro, Esteban Serrani, 2023-09-30 This book comprehensively analyzes the challenges and opportunities associated with transitioning to sustainable energy systems in Latin America Recognizing that energy transition goes beyond mere changes in energy systems it is also essential to address the imperative of ensuring a just transition and equitable benefits for all particularly for vulnerable populations This recognition emphasizes prioritizing social equity and inclusivity throughout the energy transition process By adopting a critical perspective grounded in multidisciplinary approaches from the social sciences the book delves into the complex energy transition issues exploring the broader social economic and political dimensions involved The book is divided into four parts Part I highlights the changing energy mix in Latin America and the geopolitical implications of the increasing reliance on renewable sources Part II examines the dilemmas faced by countries that rely on oil and gas revenues and the obstacles they face in transitioning to a low carbon economy Part III analyzes the production technology and costs as limits and opportunities for energy transition and adoption of renewable energies Finally part IV explores energy access and the democratization of energy generation in Latin America including efforts to address energy poverty the growth of distributed energy and prosumers *Energy Transitions in Latin America The Tough Route to Sustainable Development* is a valuable resource that will benefit researchers in energy studies and policymakers alike It serves as a comprehensive guide for those seeking to navigate the complexities of energy transitions It is an essential source for fostering informed decision making and driving sustainable development in the region **The Zapatista Movement and Mexico's Democratic Transition** María Inclán, 2018-07-06 Transitions from authoritarian to democratic governments can provide ripe scenarios for the emergence of new insurgent political actors and causes During peaceful transitions such movements may become influential political players and gain representation for previously neglected interests and sectors of the population But for this to happen insurgent social movements need opportunities for mobilization success and survival What happens to insurgent social movements that emerge during a democratic transition but fail to achieve their goals How influential are they Are they able to survive their initial mobilizing boom To answer these questions María Inclán looks at Mexico's Zapatista movement whose emergence she argues was caught between sliding doors of opportunity The Zapatistas were able to mobilize sympathy and support for the indigenous agenda inside and outside of the country yet failed to achieve their goals vis vis the Mexican state Nevertheless

the movement has survived and sustained its autonomy despite lacking legal recognition Inclán examines the vitality of the movement during various tests of the emergent democracy during more competitive elections under various political parties and amid various repressive measures She also looks at state responsiveness to movement demands and the role of transnational networks in the movement's survival Framing the relative achievements and failures of the Zapatista movement within Mexico's democratization is essential to understand how social movements develop and survive and how responsive an electoral democracy really is As such this book offers a test to the quality of Mexico's democracy and to the resilience of the Zapatista movement as it identifies the extent to which emerging political forces have failed to incorporate dissident and previously excluded political actors into the new polity

The Zapatista Movement and Mexico's Democratic Transition María de la Luz Inclán, 2018 Transitions from authoritarian to democratic governments can provide ripe scenarios for the emergence of new insurgent political actors and causes During peaceful transitions such movements may become influential political players and gain representation for previously neglected interests and sectors of the population But for this to happen insurgent social movements need opportunities for mobilization success and survival This book looks at Mexico's Zapatista movement and why the movement was able to mobilize sympathy and support for the indigenous agenda inside and outside of the country yet failed to achieve their goals vis vis the Mexican state

Dual Transitions from Authoritarian Rule Francisco E. Gonzalez, 2008-04-21 An analytically sophisticated and heavily documented study of two Latin American countries in their economic and political move toward democracy Choice In 1982 Latin America experienced a region wide economic collapse that had a drastic effect on governments throughout Central and South America Many were pushed to the verge of failure while several of the most authoritarian Argentina Bolivia Brazil and Uruguay went over the brink Yet somehow Chile's repressive military dictatorship and Mexico's hegemonic civilian regime endured amid the economic chaos Dual Transitions from Authoritarian Rule explains why these two regimes survived the upheaval and how each progressed toward a more open democratic market driven system in later years Using comparative analysis of Chile and Mexico Francisco Gonzalez explains that their governments though different ideologically shared a type of authoritarian rule that maintained the political status quo while aiding proponents of political and economic liberalization Featuring a discussion of parallel phenomena in Brazil Hungary Taiwan

and South Korea Dual Transitions from Authoritarian Rule challenges the received wisdom about sociopolitical and economic change within authoritarian nations A Choice Magazine Outstanding Academic Title Digital Television Transition: Preliminary Information on Progress of the DTV Transition ,2007 Transitions from Authoritarianism Randall Baker,2001-10-30 Baker and his colleagues provide a blend of the theoretical and the empirical evidence in an examination of the nature of bureaucracy under non democratic authoritarian forms of government whether on the right as in Portugal or the left as in Bulgaria In all these instances the bureaucracy was constructed to serve the distorted interests of centralized unaccountable power Following the remarkable spread of democracy in the seventies in Iberia the eighties in much of Latin America parts of Asia and Africa and the nineties in the former USSR and the Warsaw Pact countries the main focus was on reforming the economy and the political institutions Distinguished scholars concentrate on the inherited bureaucracy the arm of government with which the people most often have to deal They highlight the undemocratic and sometimes antidemocratic nature of the civil service that is supposed to serve democracy Others consider the nature of reform as experienced and as needed why there is no major policy for real reform of the bureaucracy in many countries and the similar experience of reforming from the left and the right Contributors discuss specific experiences as case studies and examine the more general question of what lessons can be learned from this unique perspective into comparative public administration reform Essential reading for scholars students policy makers and others involved with comparative government and public administration

Transitions to Democracy Kathryn Stoner,Michael McFaul,2013-04-15 What issues and consequences surround the fall of a government what type of regime replaces it and to what extent are these efforts successful This title provides a collection of writings by scholars and practitioners that are organized into three parts successful transitions incremental transitions and failed transitions **Mexican Local Government in Transition** Enrique Cabrero Mendoza,1998 **Trying to Make It** Rajeev V. Gundur,2022-08-15 Trying to Make It is R V Gundur s journey from the US Mexico border to America s heartland from America s prisons to its streets in search of the true story of the drug trade and the people who participate in it The book begins in the Paso del Norte area encompassing the sister cities of Ciudad Ju rez and El Paso which has been in the public eye as calls for securing the border persist From there it moves on to Phoenix which was infamously associated with the drug trade through a series of kidnappings Finally the book goes on to Chicago which has been a lightning rod of criticism for its gangs and violence Gundur highlights the similarities and differences that exist in the American drug trade within the three sites and how they relate to current drug trade narratives in the US At each stop the reader is transported to the city s historical and contemporary contexts of the drug trade and introduced to the individuals who have lived them Drug retailers street and prison gang members wholesalers and the law enforcement personnel who try to stop them offer readers a comprehensive look at how various illicit enterprises work together to supply the drugs that American users demand Most importantly through a combination of macro and microlevel vantage points and comparative analysis of three key sites in

illicit drug operations the stories in *Trying to Make It* remind us that the people involved in the drug trade for the most part do not deserve vilification Far from being a seemingly uniform widespread threat or an unlimited array of bogeymen and women they are ordinary people living ordinary lives just trying to make it **Transitions to School: Perspectives and Experiences from Latin America** Angel Urbina-García, Bob Perry, Sue Dockett, Divya Jindal-Snape, Benilde García-Cabrero, 2022-08-02 This book showcases the quality work that Latin American researchers have done on transition to school in Latin American countries by offering the English speaking world first hand access to some Latin American transitions research practices and policies This book shows the work carried out in countries such as Brazil Chile Cuba and Mexico with regards to the way in which the transition to primary school is experienced from different stakeholders perspectives and how Latin American educational policies and cultural practices shape such an important process for stakeholders This book was importantly framed by the COVID 19 pandemic which placed the world in a global health emergency and it is our hope that this book will trigger future international collaborations between researchers policy makers and practitioners interested in transitions which could help produce a wealth of empirical evidence to inform educational policies and transitions practices across the world Building networks where diverse experiences are valued and respected as well as analysed can help provide a platform that supports educators and researchers as they continue their work and branch out in new and challenging directions **The Status of the Digital Television Transition** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Telecommunications and the Internet, 2008

Transitions from Authoritarian Rule Guillermo O'Donnell, Philippe C. Schmitter, Laurence Whitehead, 2013-07-16 An array of internationally noted scholars examines the process of democratization in southern Europe and Latin America They provide new interpretations of both current and historical efforts of nations to end periods of authoritarian rule and to initiate transition to democracy efforts that have met with widely varying degrees of success and failure Extensive case studies of individual countries a comparative overview and a synthesis conclusions offer important insights for political scientists students and all concerned with the prospects for democracy Political democracy is not the only possible outcome of transitions from authoritarianism The authors draw out the implications of democracy as a goal and of the uncertainty inherent in transitional situations Democratization is perhaps the central issue in Latin American politics today Case studies focus on Argentina Bolivia Brazil Chile Mexico Peru Uruguay and Venezuela *Greening the Americas* Carolyn Deere-Birkbeck, Daniel C. Esty, 2002 Many of the papers included in this volume were first presented and discussed in the Spring of 2000 at a conference on lessons from the NAFTA for the FTAA Pref **Handbook of Transitions to Energy and Climate Security** Robert Looney, 2016-11-25 An original contribution to our understanding of a phenomenon that is reshaping the world this title thoroughly discusses the transformation of the energy security policy arena brought on by two dramatic developments the increased potential availability of energy in many parts of the world on the supply side and on the

demand side increasing concerns over the harmful effects on the environment brought on by the use of fossil fuels An in depth discussion specifically focuses on what energy security means to different countries and examines which of those countries appear to be managing their energy climate transitions successfully and which are having a more difficult time adapting to the new environment Part 1 introduces the topic covering the main themes and provides an overview of the chapters Part 2 provides a framework for policy evaluation considering the evolving factors affecting energy security and the energy climate policy trilemma Parts 3 to 6 discuss energy transitions in the carbon producing countries Saudi Arabia Canada Iran Russia Mexico in intermediate carbon producing consuming countries China United States UK Brazil Argentina South Africa in carbon consuming countries Germany Japan South Korea Israel India Spain and finally in carbon reduction countries France Denmark Switzerland Part 7 looks at attempts at regional international cooperation Part 8 considers the prospects for the future examining technological breakthroughs This title builds on the theme of unfolding energy transformations driven by but increasingly constrained by climate environmental considerations It is ideal for researchers and students in the areas of environmental politics and policy climate change and energy and climate security as well as for academics and professionals
